

The Other Scale Forms

If you were to quit right now with the knowledge you've gained thus far, you'd know as much as many fine players. Certainly, countless solos have been recorded within the confines of the standard box shape and extended box shape. The fact that you bought this book, however, probably means you want to learn as much as you can about the pentatonic scale. This means, among other things, learning the scale over the entire neck. So let's proceed now with the four remaining scale forms.

Second Scale Form

Below we find the fingering for the second form in A minor pentatonic, which begins on the note C. Two things about this scale should be noted. Firstly, this form is simply the continuation of the extended box shape we learned in the previous chapter. All we've done is continue the scale down the remaining strings. Secondly, this form would also go by another name. Can you guess what it is? You guessed it—the C major pentatonic scale. (I told you they were the same scale!)

This example should help to get this form under your fingers. Remember to roll your first finger for the seventh-fret string crossings. It should be noted that most players prefer to use fingers 1 and 3 for the top two strings in this form, even though one-finger-per-fret logic would dictate fingers 2 and 4.

Here we ascend through the form using double stops. I prefer to use fingers 3 and 4 for the tenth fret in measure 1. You could also barre your third finger if you'd like.
