Simon, 2023-04-28 The Sediq and Truku Indigenous peoples on the mountainous island of Formosa, today called Taiwan, say that their ancestors emerged in the beginning of time from Pusu Qhuni, a tree-covered boulder in the highlands. Living in the mountain forests, they observed the sacred law of Gaya, seeking equilibrium with other humans, the spirits, animals, and plants. They developed a politics in which each community preserved its autonomy, and sharing was valued more highly than personal accumulation of goods or power. These lifeworlds were shattered by colonialism, capitalist development, and cultural imperialism in the twentieth century. Based on two decades of ethnographic field research, Truly Human portrays these peoples' lifeworlds, teachings, political struggles for recognition, and relations with non-human animals. Taking seriously their ontological claims that Gaya offers moral guidance to all humans, Scott E. Simon reflects on what this particular form of Indigenous resurgence reveals about human rights, sovereignty, and the good of all kind. Truly Human contributes to a decolonizing anthropology at a time when all humans need Indigenous land-based teachings more than ever. Living Dead in the Pacific Mark Munsterhjelm, 2014-01-31 Colonized since the 1600s, Taiwan is largely a nation of settlers. Yet within its population of 23 million are some 500,000 Aboriginal people. Genetic research has permeated both the political and popular spheres, as Taiwanese nationalists and Chinese nationalists argue over the significance of migration theories, and as the media proliferates genetic theories on predispositions to alcoholism. As this book demonstrates, genetics serve on the one hand to reinforce claims to a unique national identity and on the other hand to reinforce anti-Aboriginal prejudices. Increasingly, genetic research on Aborigines is being integrated into biotechnology planning, both in the country and through controversial US patent applications. The legacy of this work has been mass violations of the rights of Taiwanese Aborigines. Examining a troubling revival of racially configured genetic research and the questions of sovereignty it raises, *Living Dead* in

the Pacific details a history of exploitation and resistance that represents a new area of conflict facing Aboriginal people both within Taiwan and around the world

Introduction to the Sociology of Missions Robert L. Montgomery, 1999-11-30 While much work has been done to apply anthropological insights to the study of missions the sociological perspective has been generally neglected by missiologists This volume defines the sociology of missions as a discrete subdiscipline within the sociology of religion and provides a working set of conceptual resources for those involved in mission work to use in furthering their understanding of their task The author reviews the major areas of sociology that are most relevant to missions and presents his findings as a basis for discussion and a stimulus to further exploration of relevant sociological concepts and theories One of his main goals is to increase dialogue between missiologists and sociologists of religion by providing the former with a sociological perspective and the latter with a deeper understanding of the missionary enterprise
