Morality and Legality of Secession Pau Bossacoma Busquets, 2019-11-19 This book explores secession from three normative disciplines political philosophy international law and constitutional law The author first develops a moral theory of secession based on a hypothetical multinational contract Under this contract theory injustices do not determine the existence of a right to secede but the requirements to exercise it The book's second part then argues that international law is more inclined to accept and advance a remedial right approach to secession Therefore justice as multinational fairness is to be fully institutionalized under the constitutional law of liberal democracies The final part proposes constitutionalizing a qualified right to secede with the aim of fostering recognition and accommodation of national pluralism as well as cooperation and compromise between majority and minority nations

into issues concerning anthropology's academic origins to present a groundbreaking study that reveals how ethnography and ethnology originated during the eighteenth rather than the nineteenth century developing parallel to anthropology or the natural history of man Han F Vermeulen explores primary and secondary sources from Russia Germany Austria the United States the Netherlands Hungary the Czech Republic Slovakia France and Great Britain in tracing how ethnography originated as field research by German speaking historians and naturalists in Siberia Russia during the 1730s and 1740s was generalized as ethnology by scholars in G ttingen Germany and Vienna Austria during the 1770s and 1780s and was subsequently adopted by researchers in other countries Before Boas argues that anthropology and ethnology were separate sciences during the Age of Reason studying racial and ethnic diversity respectively Ethnography and ethnology focused not on other cultures but on all peoples of all eras Following G W Leibniz researchers in these fields categorized peoples primarily according to their languages Franz Boas professionalized the holistic study of anthropology from the 1880s into the twentieth century The Nation ,1866
