**Building the Critical Anthropology of Climate Change** Hans A. Baer, Merrill Singer, 2024-08-14 This book applies a critical perspective to anthropogenic climate change and the global socio ecological crisis The book focuses on the critical anthropology of climate change by opening up a dialogue with the two main contending perspectives in the field namely the cultural ecological and the cultural interpretive perspectives Guided by these the authors take a firm stance on the types of changes that are needed to sustain life on Earth as we know it Within this framework they explore issues of climate and social equity the nature of the

current era in Earth's geohistory the perspectives of the elite polluters driving climate change and the regrettable contributions of anthropologists and other scholars to climate change Engaging with perspectives from sociology political science and the geography of climate change the book explores various approaches to thinking about and responding to the existential threat of an ever warming climate In doing so it lays the foundation for a brave new sustainable world that is socially just highly democratic and climatically safe for humans and other species This book will be of interest to researchers and students studying environmental anthropology climate change human geography sociology and political science

**Foundations of Real-World Economics** John Komlos, 2023-03-20 The 2008 financial crisis the rise of Trumpism and the other populist movements which have followed in their wake have grown out of the frustrations of those hurt by the economic policies advocated by conventional economists for generations Despite this textbooks remain frozen in time continuing to uphold traditional policies as though nothing has happened Foundations of Real World Economics demonstrates how misleading it can be to apply oversimplified models of perfect competition to the real world The math works well on college blackboards but not so well on the Main Streets of America This volume explores the realities of oligopolies the real impact of the minimum wage the double edged sword of free trade and other ways in which powerful institutions cause distortions in mainstream models Bringing together the work of key scholars like Kahneman Minsky and Schumpeter this textbook takes into consideration the inefficiencies that arise when the perfectly competitive model is applied to the real world dominated by multinational oligopolies The third edition has been updated throughout bringing in new material on the financial crises the rise of populism racism inequality climate change and the Covid 19 pandemic A must have for students studying the principles of economics as well as micro and macroeconomics this textbook redresses the existing imbalance in economic teaching as John Komlos focuses on the paradigm of humanistic economics

*The New Environmentalism?* Davide Torsello, 2016-03-03 Drawing on rich ethnographic work in both Eastern and Western Europe The New Environmentalism presents a range of case studies to explore the impact of corruption in EU funded structural development projects With detailed analyses of the forms and contexts of environmentalism the book reveals the manner in which corruption is generated by the planning and implementation procedures of the projects demonstrating in each case that environmental movements emerge as by products of these processes using corruption as part of a discourse employed in support of their action against political regional and state institutions as well as to communicate their goals to local citizens Shedding light on the ways in which revelations about corruption are adopted as a means to fostering civic participation in environmental movements and influencing institutional trust this book contributes to our understanding of the loss of legitimacy and trust in local and global political institutions Comparative in approach The New Environmentalism provides new insights into the emergence of strong civic movements at local and trans local levels in resistance to citizens sense of increasing alienation from political participation and decision making As such it will be of interest to anthropologists sociologists and political

scientists concerned with questions of legitimacy corruption and activism      **Land Change Science** Garik Gutman,Anthony C. Janetos,Christopher O. Justice,Emilio F. Moran,John F. Mustard,Ronald R.
