Scotland and Europe, 1850-1900 " John Morrison, 2017-07-05 Painting Labour in Scotland and Europe 1850 1900 explores hitherto unrecognized European variations in the phenomena of rural labour imagery particularly in Scotland In exploring these distinctions relative to Scotland and Europe it looks to develop a new understanding of the commonalities and idiosyncrasies of rural labour imagery which have often been treated as homogenous Lacking the detailed analysis that has been accorded other images writing about Scottish painting has often been appended to analyses of English or French imagery It has generally been understood as intellectually divorced from the sometimes brutal realities of evolving Scottish nineteenth century urbanism or simply ignored Painting Labour in Scotland and Europe 1850 1900 sets out systematically to discuss the Scottish rural painting in relation to its particular Scottish historical context both sociological and aesthetic and its English and European counterparts Alongside canonical Scottish images by major figures such as James Guthrie the book explores many hitherto under researched and unconsidered paintings by nineteenth century Scottish artists and considers them in relation to major English and Continental Realist and Romantic painters The juxtaposition of J F Millet with W D McKay and Edwin Landseer with George Reid makes for a volume that will appeal both to an academic audience and to one interested in European art history more generally

Scottish Trade in the Wake of Union (1700-1760) Philipp Robinson Rössner, 2008 The monograph examines the trends structure and fluctuations in Scotland s foreign trade 1700 1760 in two parts Part I is a general examination of the sources the institutional as well as socio economic framework and the general trend in Scotland s foreign trades 1700 1760 Part II consists of a detailed case study on Scottish trade with German ports based on a comprehensive examination of contemporary customs accounts and trade statistics The monograph s main aim is to highlight the pan

European contingency matrix which Scottish foreign trade was exposed to after 1700 It is also intended to shed new light on hitherto overlooked aspects such as the responsibility of the new English customs system in Scotland 1707 for creating a peculiarly Scottish pattern of trade thereafter Fighting for a Living Erik-Jan Zürcher,2025-10-01 Fighting for a Living investigates the circumstances that have produced starkly different systems of recruiting and employing soldiers in different parts of the globe over the last 500 years It does so on the basis of a wide range of case studies taken from Europe Africa America the Middle East and Asia The novelty of Fighting for a Living is that it is not military history in the traditional sense concentrating at wars and battles or on military technology but that it looks at military service and warfare as forms of labour and at the soldiers as workers Military employment offers excellent opportunities for this kind of international comparison Where many forms of human activity are restricted by the conditions of nature or the stage of development of a given society organized violence is ubiquitous Soldiers in one form or another are always part of the picture in any period and in every region Nevertheless Fighting for a Living is the first study to undertake a systematic comparative analysis of military labour It therefore speaks to two distinct and normally quite separate communities that of labour historians and that of military historians *Scottish Life and Society: Bibliography for Scottish ethnology* ,2000 Spaces for Feeling Susan Broomhall,2015-03-05 Spaces for Feeling explores how English and Scottish people experienced sociabilities and socialities from 1650 to 1850 and investigates their operation through emotional practices and particular spaces The collection highlights the forms practices and memberships of these varied spaces for feeling in this two hundred year period and charts the shifting conceptualisations of emotions that underpinned them The authors employ historical literary and visual history approaches to analyse a series of literary and art works emerging forms of print media such as pamphlet propaganda newspapers and periodicals and familial and personal sources such as letters in order to tease out how particular communities were shaped and cohered through distinct emotional practices in specific spaces of feeling This collection studies the function of emotions in group formations in Britain during a period that has attracted widespread scholarly interest in the creation and meaning of sociabilities in particular From clubs and societies to families and households essays here examine how emotional practices could sustain particular associations create new social communities and disrupt the capacity of a specific cohort to operate successfully This timely collection will be essential reading for students and scholars of the history of emotions *William Wallace* Graeme Morton,2014-10-08 A deconstruction of the national biography and mythology of William Wallace Freed from the historian s bedrock of empiricism by a lack of corroborative sources the biography of this short lived late medieval patriot has long been incorporated into the i History of the English People: Book VIII (cont.) The Revolution (1683-1760) John Richard Green,1880 **Scottish Trade with German Ports, 1700-1770** Philipp Robinson Rössner,2008 The monograph contributes to the field of eighteenth century comparative European history Based mainly on British and German customs accounts it is a bilateral case study of the basic working

mechanisms within a much larger framework the eighteenth century Atlantic economy The Scottish customs records are unique insofar as they allow precise reconstructions of Scotland's trade volume in yearly series after 1743 which can be broken down by singular countries commodities As the Scottish German trade pattern linked back into the Atlantic framework it is hoped that the present model study will encourage further research into cross country studies of North Sea and Atlantic trade the most dynamic branch of European commerce post 1700

Scotland in the Age of the French Revolution Bob Harris, 2005 Despite the profusion of work in recent decades on Irish and English politics in the French revolutionary era Scotland in this period remains largely neglected barely featuring in some recent books ostensibly on the history of Britain The essays in this volume written by scholars from Britain and Ireland will help fill this gap While not presenting a single uniform view several of them at the very least cast doubt on the notion of a Scotland in this period of adamant stability and begin to recover some powerful dissident voices in the political exchanges of the 1790s They show that the stability discerned in retrospect by some historians was not what struck most contemporaries who were witness to the successive often alarming strains and challenges of the period which served cumulatively to shatter any complacency which existed about the terms of elite rule and authority in a society undergoing profound and rapid change
