Architecture Form(s) Identity Greta Allegretti, Carola D'Ambros, Chiara Lionello, Enrico Miglietta, Valerio Maria Sorgini, Greta Maria Taronna, 2022-08-03 Architecture form s identity Spaces for the absence of memory is a collection of essays on the theme of memory its possible loss weakness ability to build individual and collective identities and on the way architecture inserts itself in this process determining different spaces of reflection These texts all arise from a common research ground which saw the editors personally involved in an inter doctoral Workshop The Memory as Construction of the Subject Designing for the Absence of Memory 2018 19 with a collaboration between Politecnico di Milano AUID and the Universidad de Sevilla HAC Ph D schools in which the theme of memory and the construction of a more holistic space that dialogues with it was at the center of the design reflection These contributions all built around that very rich relationship between memory and architecture have led to a necessary desire to broaden the horizons and thematic limits reached by the workshop considering them as a starting point for the collection of different perspectives able to investigate some issues in a more specific way **The Routledge Companion to Architecture and Social Engagement** Farhan Karim, 2018-05-11

Socially engaged architecture is a broad and emerging architectural genre that promises to redefine architecture from a market driven profession to a mix of social business altruism and activism that intends to eradicate poverty resolve social exclusion and construct an egalitarian global society The Routledge Companion to Architecture and Social Engagement offers a critical enquiry of socially engaged architecture s current context characterized by socio economic inequity climate change war increasing global poverty microfinance the evolving notion of professionalism the changing conception of public and finally the growing academic interest in re visioning the social role of architecture Organized around case studies from the United States Brazil Venezuela the United Kingdom South Africa Rwanda Burkina Faso Nigeria Nepal Pakistan Iran Thailand Germany Australia Taiwan and Japan the book documents the most important recent developments in the field By examining diverse working methods and philosophies of socially engaged architecture the handbook shows how socially engaged architecture is entangled in the global politics of poverty reconstruction of the public sphere changing role of the state charity and neoliberal urbanism The book presents debates around the issue of whether architecture actually empowers the participators and alleviates socio economic exclusion or if it instead indirectly sustains an exploitive capitalism Bringing together a range of theories and case studies this companion offers a platform to facilitate future lines of inquiry in education research and practice **Kenosis Creativity Architecture** Randall S. Lindstrom, 2021-03-21 Kenosis Creativity

Architecture locates and explores creativity s grounding in the ancient concept of kenosis the emptying that allows creativity to happen that makes appearance possible It concretises that grounding through architecture a primal expression of human creativity critically examining for the first time kenotic instantiations evidenced in four iconic international projects works by Kahn Pei Ando and Libeskind Then in a final turn the potentiality of architecture s own emptying is probed Architect and

author Randall Lindstrom draws on Western and Eastern philosophy including that of Heidegger Levinas Derrida Vattimo Nishida and Nishitani as well as on the theology of Christianity Judaism and aspects of Buddhism Hinduism and Islam Every chapter expands the argument that if responsiveness to our world is taken seriously if proper and sustainable responses are to be realised then a deeper understanding of creativity and so kenosis is essential This book opens up a way of thinking about creativity and humanity's readiness to be creative It thereby presents a crucial enquiry at the nexus of architecture philosophy and theology for researchers graduate and postgraduate students and practitioners alike *Tectonic Affects in Contemporary Architecture* Yonca Hurol, 2022-09-28 Tectonics is an old ontological concept which simultaneously claims to cover the aesthetics meaning and the technological technical in architecture However since the advent of modernity the relationship between architecture and building technology has been problematic Some of these problems which are reflected in the theories of architecture and tectonics relate to the separation of the technology technical dimension from the aesthetic artistic rendering one of them dominant over the other This book explores the tectonic affects in architecture because these do not separate building technology and aesthetics or meaning Affects are preconscious aesthetic feelings which can cause meanings if we start thinking about these affects The book claims that tectonic affects can generate aesthetic value and meaning It adopts a practical position towards architectural aesthetics and meaning and concentrates on tectonic affects

Handbook of Research on Methodologies for Design and Production Practices in Interior Architecture Garip, Ervin, Garip, S. Banu, 2020-11-20 Studio environments can be defined as multi dimensional integrated production spaces where basic design trainings take place and where design issues including theoretical notions such as sociological political phenomenological and other dimensions are discussed Present approaches within the literature and social media on this topic gives cause for students to evaluate their future professions over finished and pictorial products rather than ontological and processual means While there are many resources available on the present approaches of aesthetics and visuality of interior spaces there is not much research available on new design methodologies related design processes and new applied methods in interior architecture Based on different contexts these methods of design practice have the potential to enrich design processes and create multiple discussion platforms within project studios as well as other design media These different representations and narration methods for research in the context of interior architecture can be effectively used in design processes The Handbook of Research on Methodologies for Design and Production Practices in Interior Architecture proposes new design methodologies and related design processes and introduces new applied method approaches while presenting alternative methods that have been used within design studios in the field of interior architecture The chapters deal with four major sections the design process and interdisciplinary approaches then scenario development and content followed by material texture and atmosphere and concluding with new approaches to design While highlighting topics such as spatial perception design strategies architectural atmosphere and design thinking this book is of interest to architects

Organic Design in Twentieth-Century Nordic Architecture Erik Champion, 2019-02-18 Organic Design in Twentieth Century Nordic Architecture presents a communicable and useful definition of organic architecture that reaches beyond constraints The book focuses on the works and writings of architects in Nordic countries such as Sigurd Lewerentz Jørn Utzon Sverre Fehn and the Aaltos Aino Elissa and Alvar among others It is structured around the ideas of organic design principles that influenced them and allowed their work to evolve from one building to another Erik Champion argues organic architecture can be viewed as a concerted attempt to thematically unify the built environment through the allegorical expression of ongoing interaction between designer architectural brief and building as process With over 140 black and white images this book is an intriguing read for architecture students and professionals alike

Morality and Architecture Revisited David Watkin, 2001-08 When Morality and Architecture was first published in 1977 it received passionate praise and equally passionate criticism An editorial in Apollo entitled The Time Bomb claimed that it deserved to become a set book in art school and University art history departments and the Times Literary Supplement savaged it as an example of that kind of vindictiveness of which only Christians seem capable Here for the first time is the story of the book's impact In writing his groundbreaking polemic David Watkin had taken on the entire

modernist establishment tracing it back to Pugin Viollet le Duc Corbusier and others who claimed that their chosen style had to be truthful and rational reflecting society's needs. Any critic of this style was considered antisocial and immoral. Only covertly did the giants of the architectural establishment support the author. Watkin gives an overview of what has happened since the book's publication, arguing that many of the old fallacies still persist. This return to the attack is a revelation for anyone concerned with architecture's past and future.

Morality and Architecture Revisited contains the entire text of the book *Morality and Architecture* plus additional material by David Watkin on the controversy that the book created.

African Identity in Post-Apartheid Public Architecture Jonathan Alfred Noble, 2016-12-05. Since the end of Apartheid there has been a new orientation in South African art and design, turning away from the colonial aesthetics to new types of African expression. This book examines some of the fascinating and impressive works of contemporary public architecture that concretise imaginative dialogues with African landscapes, craft and indigenous traditions. Referring to Frantz Fanon's classic study of colonised subjectivity *Black Skin White Masks*, Noble contends that Fanon's metaphors of mask and skin are suggestive for architectural criticism in the context of post-Apartheid public design. Taking South Africa's first democratic election of 1994 as its starting point, the book focuses on projects that were won in architectural competitions. Such competitions are conceived within ideological debates and studying them allows for an examination of the interrelationships between architecture, politics and culture. The book offers insights into these debates through interviews with key parties concerned: architects, competition jurors, politicians, council and city officials, artists and crafters, as well as people who are involved in the day-to-day life of the buildings in question.

Great Tours! Barbara Abramoff Levy, Sandra Mackenzie Lloyd, Susan Porter Schreiber, 2002-02-07. Creating tours that are interesting and educational for visitors and guides is a challenge every historic site faces. *Great Tours* helps you focus clearly on the material culture and significance of your site and then shows you how to use that focus to train and energize your guides.
