Computers Helping People with Special Needs Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, 2003-08-02 Success and efficiency are the latest standards and scales of our society Virtual surroundings and communication rooms electronic portals and platforms are pushing us into a new world of personal and professional interaction and cooperation The network to subdue violence is fragile and crumbly tradition is no longer a power of our community What of leisure time dreams and fantasy What of education in the family at school and at university Travelling round the world to develop yourself how man becomes man pleading for a new determination of the idea of education a mission of past centuries inadequate nowadays Regarding September 11th last year the conflicts and confrontations round the globe and events in our direct surroundings these questions seem to be a cry at least to reflect upon what is happening around us and where we all of us still play an active role An International Conference on Computers Helping People with Special Needs is like an island is this a topic at all these days is it worth discussing the area of ICT and the situation of people with disabilities persons who are segregated from developing their personal and professional careers Indeed the biennial meeting has never included these actualities but the basic idea behind ICCHP starting in 1989 was to focus on these fringe groups and to offer a platform of exchange on all aspects of Human Computer Interaction and the usage of ICT for people with special needs **Major Information**

Shipper, 2014-08-13 Today's views of leadership and management have significantly expanded to incorporate a variety of elements such as rewards visions and worker participation However most perspectives still view leadership as something that is assigned to a designated person who then exercises influence downward toward subordinate followers In many ways the persistent top down command and

control theme that supports established leadership thought and practice prevents organizations from fully tapping into their human resources in turn limiting their flexibility to meet the challenges of increasingly dynamic complex and competitive environments Shared Entrepreneurship replaces the top down approaches of the past with a new framework that draws strengths and innovation from collaboration and sharing This book is divided into two main sections The first section consists of six chapters which provide an in depth overview and discussion of shared entrepreneurship The second section consists of eight original case studies commissioned by the authors featuring such companies as Herman Miller Inc SRC Holdings and W L Gore Associates **India ... *India China Relations* D P Tripathi, B R Deepak, 2011-07-01 India and China had a glorious history of cultural and material exchanges which developed into friendship and subsequently into camaraderie during first half of the twentieth century when both India and China fought western imperialism Owing to serious misconceptions and misjudgements the relations remained under the shadow of animosities and mutual distrust for over three decades until Rajiv Gandhi s China visit in 1988 After 62 years of diplomatic relations between the two there is a certain maturity in the relations as both are sharing new responsibilities in the stupendously changing global architecture *India China Relations Future Perspectives* is a collection of eighteen essays by eminent Indian and Chinese scholars diplomats and political personalities who look at the complex and multi layered relationship from different perspectives covering various domains such as civilizational dialogue through history the 1950s brotherhood the border and various other issues pertaining to education agriculture security defense and economic complementarities etc The complex and multi layered character of the relationship makes it difficult to define as an adversarial or competitive for there has been cooperation at various levels between the two such as climate change and many other multilateral forums like G20 and BRICS Notwithstanding the cooperation there have been incremental yet cautious approaches towards cooperation in various fields from both the sides As the global economic and political scenario is undergoing a tremendous change and its shift to Asia is visible the contributors feel that India and China need to handle the hypersensitive issues with care and tap the existing complementarities appropriately or else the Asian century would not only be a distant dream but could also endanger the peace and stability of the region and the world

*Advances in Object-Oriented Database Systems* Asuman Dogac, M. Tamer Özsu, Alexandros Biliris, Timos Sellis, 2013-11-09 Object oriented database management systems OODBMSs have generated significant excitement in the database community in the last decade This interest stems from a real need for data management support for what are called advanced application areas that are not well served by relational technology The case for object oriented technology has been made on three fronts First is the data modeling requirements of the new applications Some of the more important shortcomings of the relational systems in meeting the requirements of these applications include 1 Relational systems deal with a single object type a

relation A relation is used to model different real world objects but the semantics of this association is not part of the database Furthermore the attributes of a relation may come only from simple and fixed data type domains numeric character and sometimes date types Advanced applications require explicit storage and manipulation of more abstract types e g images design documents and the ability for the users to define their own application specific types Therefore a rich type system supporting user defined abstract types is required 2 The relational model structures data in a relatively simple and flat manner Non traditional applications require more complex object structures with nested objects e g a vehicle object containing an engine object
