People Penguins And Plastic Trees:

People, Penguins, and Plastic Trees Christine Pierce, Donald VanDeVeer, 1995 Stressing the importance of understanding the grounds and the consequences of ethical or normative decision making this collection of classic essays compiled by Pierce and VanDeVeer examines disputes surrounding animals ecosystems the land and their own proper place in the ongoing network of lives on this planet A central question is how can we live lives that are both personally satisfying but which are also ecologically sound and responsible

The Blackwell Companion to Natural Theology William Lane Craig, J. P. Moreland, 2012-02-27 With the help of in depth essays from some of the world's leading philosophers The Blackwell Companion to Natural Theology explores the nature and existence of God through human reason and evidence from the natural world Provides in depth and cutting edge treatment of natural theology's main arguments Includes contributions from first rate philosophers well known for their work on the relevant topics Updates relevant arguments in light of the most current state of the art philosophical and scientific discussions Stands in useful contrast and opposition to the arguments of the new atheists

Paternalistic Intervention Donald Vandever, 2014-07-14 Donald VanDeVeer probes the moral complexities of the question under what conditions is it permissible to intervene invasively in the lives of competent persons for example by deception force or coercive threat for their own good In a work with broad significance for law public policy professional client relations and private interactions he presents a theory of an autonomy respecting paternalism Originally published in 1986 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Essays on Political Morality Richard Mervyn Hare, 1998 R M Hare one of the most widely discussed of today's moral philosophers presents a selection of essays in which

he brings ethical theory lucidly to bear on moral problems arising in politics He examines our obligation to obey the law the limits of legitimate lawbreaking civil violence and war rights of various sorts and their supposed conflict with utility justice distributive and retributive and care of the environment His arguments are amply illustrated by specific examples The volume substantiates the author's claim that help with such problems can be found in philosophy and particularly in his own ethical theory which draws together the best insights of Kant and utilitarians *Historical Dictionary of North American Environmentalism* Edward Robert Wells, Alan M. Schwartz, 1997 An attempt to capture the people places and events which have contributed to the development of environmentalism around the world attempting to place each term used in the context of a developing movement Although the focus of this volume is the history of North American environmentalism entries that are not purely North American in scope have been included because they somehow helped to shape environmentalism on this continent *A Trip Too Far* Rosaleen Duffy, 2013-06-17 Environmentally sustainable tourism or ecotourism has become a major area of interest for governments the private sector and international lending institutions It is regarded as a way of allowing economic development whilst protecting against environmental degradation especially in those countries with fragile ecosystems However despite the beneficial intentions of ecotourism it tends to be regarded uncritically by environmental organizations governments and the private sector alike Rosaleen Duffy presents this analysis of ecotourism linking it with environmental ideologies and the politics of North South relations By the extensive use of case study and interview material she formulates ideas and proposals that should be important for the development of ecotourism around the globe **Agriculture and the Undergraduate** National Research Council, Board on Agriculture, 1992-02-01 This book presents efforts to chart the comprehensive changes needed to meet the challenges of undergraduate professional education in agriculture The United States needs to invest in the future in human capital and the scientific knowledge base to revitalize one of its leading industries the agricultural food and environmental system That objective can be met by educating all students about agriculture as well as by educating others specifically for careers in agriculture *Agriculture and the Undergraduate* includes perspectives on rewarding excellence in teaching and formulating curricula to reflect cultural diversity the environment ecology agribusiness and business humanities and the social sciences and the economic and global contexts of agriculture Lake Issyk-Kul: Its Natural Environment J. Klerx, Beishen Imanackunov, 2012-12-06 Lake Issyk Kul is a closed lake located in the Tien Shan mountain belt of the Republic of Kyrgyzstan It is the world's fifth deepest lake 668 m and the second largest high altitude lake in the world 1607 m above sea level The lake is affected by several environmental threats of both anthropogenic and natural origin decline of the lake level resulting in progressively increasing salinity incomplete vertical water exchange and risk of contamination by past and present industrial activity Although the lake has been intensively studied the information is only available in unpublished reports or local scientific journals This book presents for the first time to an international audience the main physical chemical biological and geological characteristics of

the lake the fruits of many years of observations complemented by recent results of international projects Case studies of similar problems in other parts of the world are presented together with ethical aspects of the environmental protection of the lake

Encountering Nature Thomas Heyd, 2016-04-29 This book argues that an attentive encounter with nature is of key importance for the development of an environmentally appropriate culture The fundamental idea is that the environmental degradation that we are increasingly experiencing is best conceived as the consequence of a cultural mismatch our cultures seem not to be appropriate to the natural environment in which we move and on which we depend in thoroughgoing ways In addressing this problem Thomas Heyd weaves together a rich tapestry of perspectives on human interactions with the natural world ranging from traditional modes of managing human communities that include the natural environment to the consideration of poetic travelogues ecological restoration and botanic gardens The volume is divided into three parts which respectively consider the relation of human beings to nature in terms of ethics aesthetics and culture It engages the current literature in each of these areas with the help of inter disciplinary approaches as well as on the basis of personal encounters with natural spaces and processes The ultimate aim of this book is to make a contribution to the development of a cultural fabric that is suitable to the natural spaces and processes in which we may thrive and on which we all depend as individuals and as a species

Persons and Immortality Kenneth A. Bryson, 2022-02-07 The religious belief in personal immortality depends on the evidence for the existence of God an immaterial soul or mind and human nature We also need to support the view that God will always want to maintain relationships with us in the afterlife So immortality is a hard sell The suffering of innocent victims suggests that the existence of a loving God is not self evident Furthermore the soul s separation from the body at death raises the troublesome problem of personal identity How can that be me in the afterlife without my body The tradition from Plato to Descartes plants the seed of personal immortality in our rational nature But the deconstruction of human nature suggests that our species is not special Yet the belief in immortality lingers The first step in the reconstruction of personal immortality is found in systems theory or belief that the whole individuates the part This view suggests that we are the outcome of relationships rather than eternal natures entering into relationships We are the product of relationships taking place at three basic levels 1 In psyche where being human is the result of a tendency toward good and evil 2 As social entities where the existence of other human beings individuates us 3 In being s unconcealment where the intelligibility of things provides a foundation for epistemic life Heidegger s view of the nothing or horizon surrounding being allows us to identify God as creator entering into personal relationships with us a view supported by contemporary science That will be me in the afterlife if the relationships that individuate me in my pre mortem state continue into my post mortem existence The reversal in being s unconcealment suggests that human death continues the cycle of personal existence

Morality's Progress Dale Jamieson, 2002 Morality's Progress is the summation of nearly three decades of work by Dale Jamieson a leading figure in environmental ethics and bioethics The twenty two papers here are invigoratingly diverse but together tell a unified story about various aspects of the morality of our relationships to animals and to nature The volume begins by addressing the possibility of moral progress and the value of practical ethics It then moves on to discuss the nature of animal minds and our moral duties with respect to animals it concludes with essays that address larger environmental questions Considered as a whole Morality's Progress is an attempt to draw out the moral consequences of a thoroughgoing Darwinian Naturalism The perspective that informs this work is philosophically naturalist morally consequentialist and metaethically constructivist Jamieson's essays will convince sceptics that thinking about our moral relations to animals and nature can offer great intellectual reward and his work here sets a challenging controversial agenda for the future

Connection on the Ice Patti H. Clayton, 1998 On Friday October 7 1988 Roy Ahmaogak of Barrow Alaska discovered three young gray whales trapped in ice off the Arctic coast The three week rescue operation that followed cost more than a million dollars and grew to include the White House the Soviet Union the environmental community Eskimo whalers Alaskan oil companies school children and journalists from around the world the Alaska National Guard and a host of other corporate governmental scientific and individual participants Some called it a non event a fiasco an absurd waste of money while others considered it the most extraordinary animal rescue effort ever undertaken In any case it is a story not likely to be forgotten Both complex and moving this story grounds Patti Clayton's overview of environmental ethics theory Using the story as a touchstone for critical comparison Clayton explores three major traditions of environmental philosophy extensionism ecofeminism's care ethic and Heideggerian Phenomenology In doing so she guides readers through the evolution and central concepts of each tradition moving intriguingly between theory and the well known rescue story as an apt illustration of the complexities of ethical deliberation Clayton's critical thinking leads to a deeper appreciation of the ways in which different sets of assumptions yield unique interpretations of such issues Readers

have the opportunity to consider the implications of this environmental ethics issue as a microcosm of human nonhuman interaction. The unifying narrative of the whale story which is based on the commentary of participants and observers provides both an engaging vehicle for the study of environmental ethics and a real world testament to the multifaceted nature of human nonhuman relationships encouraging readers to reflect on the connection of such incidents in their own lives. Author note: Patti H. Clayton is Visiting Lecturer in the Division of Multidisciplinary Studies at North Carolina State University.

International Environmental Law, Policy, and Ethics Alexander Gillespie, 2014-08-21. This second edition of *International Environmental Law Policy and Ethics* revises and expands this groundbreaking study into the question of why the environment is protected in the international arena. This question is rarely asked because it is assumed that each member of the international community wants to achieve the same ends. However, in his innovative study of international environmental ethics, Alexander Gillespie explodes this myth. He shows how nations like individuals create environmental laws and policies which are continually inviting failure as such laws can often be riddled with inconsistencies and be ultimately contradictory in purpose. Specifically, he seeks a nexus between the reasons why nations protect the environment, how these reasons are reflected in law and policy, and what complications arise from these choices. This book takes account of the numerous developments in international environmental law and policy that have taken place since the publication of the first edition, most notably at the 2002 World Summit on Sustainable Development and the 2012 Rio+20 United Nations Conference on Sustainable Development. Furthermore, it addresses recent debates on the economic value of nature and the problems of the illegal trade in species and toxic waste. The cultural context has also been considerably advanced in the areas of both intangible and tangible heritage, with increasing attention being given to conservation, wildlife management, and the notion of protected areas. The book investigates the ways in which progress has been made regarding humane trapping and killing of animals, and how, in contrast, the Great Apes initiative and similar work with whales have failed. Finally, the book addresses the fact that while the notion of ecosystem management has been embraced by a number of environmental regimes, it has thus far failed as an international philosophy.

Conflicts Of Rights John Rowan, 2018-04-24. This book examines two moral theories of rights justification and applies them to four social issues: redistributive taxation, affirmative action, pornography, and abortion. It assesses the ethical status of several candidate social policies that continue to be debated in the public arenas.

Understanding Environmental Philosophy Andrew Brennan, Y.S. Lo, 2014-12-05. Environmental philosophy is one of the exciting new fields of philosophy to emerge in the last forty years. *Understanding Environmental Philosophy* presents a comprehensive critical analysis of contemporary philosophical approaches to current ecological concerns. Key ideas are explained, placed in their broader cultural, religious, historical, political, and philosophical context, and their environmental policy implications are outlined. Central ideas and concepts about environmental value, individual wellbeing, ecological holism, and the metaphysics of nature set the stage for a discussion of how to establish moral rules and priorities, and whether it is

possible to transcend human centred views of the world The reader is also helped with an annotated guide to further reading questions for discussion and revision as well as boxed studies highlighting key concepts and theoretical material A clear and accessible introduction to this most dynamic of subjects Understanding Environmental Philosophy will be invaluable for a wide range of readers Eco-facts and Eco-fiction William H. Baarschers,2013-04-15 Ozone friendly recyclable zero waste elimination of toxic chemicals such environmental ideals are believed to offer solutions to the environmental crisis Where do these ideals come from Is the environmental debate communicating the right problems Eco Facts and Eco Fiction examines serious errors in perceptions about human and environmental health Drawing on a wealth of everyday examples of local and global concerns the author explains basic concepts and observations relating to the environment Removing fear of science and technology and eliminating wrong perceptions lead to a more informed understanding of the environment as a science a philosophy and a lifestyle By revealing the flaws in today s environmental vocabulary this book stresses the urgent need for a common language in the environmental debate Such a common language encourages the effective communication between environmental science and environmental decision making that is essential for finding solutions to environmental problems
