People Politics And Community In The Later Middle Ages:

People, Politics, and Community in the Later Middle Ages Joel Thomas Rosenthal, Colin Richmond, 1987 *Political Culture in Late Medieval Britain* Linda Clark, Christine Carpenter, 2004 Eight studies of aspects of C15 England united by a common focus on the role of ideas in political developments of the time The concept of political culture has become very fashionable in the last thirty years but only recently has it been consciously taken up by practitioners of late medieval English history who have argued for the need to acknowledge the role of ideas in politics While this work has focused on elite political culture interest in the subject has been growing among historians of towns and villages especially as they have begun to recognise the importance of both internal politics and national government in the affairs of townsmen and peasants This volume the product of a conference on political culture in the late middle ages explores the subject from a variety of perspectives and in a variety of spheres It is hoped that it will put the subject firmly on the map for the study of late medieval England and lead to further exploration of political culture in this period Contributors CAROLINE BARRON ALAN CROMARTIE CHRISTOPHER DYER MAURICE KEEN MIRI RUBIN BENJAMIN THOMPSON JOHN WATTS JENNY WORMALD LINDA CLARK is editor History of Parliament CHRISTINE CARPENTER is Reader in History University of Cambridge **A Companion to Britain in the Later Middle Ages** S. H. Rigby, 2008-04-15 This authoritative survey of Britain in the later Middle Ages comprises 28 chapters written by leading figures in the field Covers social economic political religious and cultural history in England Ireland Scotland and Wales Provides a guide to the historical debates over the later Middle Ages Addresses questions at the leading edge of historical scholarship Each chapter includes suggestions for further reading

Political Representation in the Later Middle Ages Hwa-Yong Lee, 2008 This book explores the theory of political representation as articulated by the fourteenth century Italian thinker Marsilius It combines historical research on Marsilius with an analysis of the contemporary theory of representative democracy Modern theorization of political representation identifies the relation between the represented and the representative as a central theme In order to assess how a representative system can reasonably be expected to operate for the benefit of the whole people political representation must be understood through a comprehensive conception of the political process as a whole To this end Marsilius provides us with a perspective from which to examine the philosophical foundations of political representation and to reconsider the nature and significance of political representation that is an understanding of political representation in terms of the transfer of power This book suggests that in modern democratic societies where the people effectively cease to be a political agent and their formal authority becomes increasingly notional Marsilius conception of political representation which rejects the depoliticisation and deauthorisation of ordinary citizens has much to offer It can in principle offer a coherent alternative approach to building political representation as an effective scheme of public action for all *Ireland and the English World in the Late Middle Ages* B. Smith, 2009-04-14 This volume extends the British Isles approach pioneered by Robin Frame and

Rees Davies to the later middle ages Through examination of issues such as frontier formation colonial identities and connections with the wider world it explores whether this period saw the bonds between the British Isles weaken strengthen or simply alter **Guilds and the Parish Community in Late Medieval East Anglia, C. 1470-1550** Ken Farnhill,2001

The parish and the guild were the two poles round which social and religious life revolved in late medieval England This study drawing freely on East Anglian records shows how influential they were in the lives of their communities in the years before the break with Rome and provides an implicit commentary on the impact of the Henrician Reformation at parish level The records of many of the guilds or fraternities of East Anglia in the years 1470 1550 are examined for evidence of their form function and popularity the spread of fraternities across East Anglia the size of individual guilds types of member and the benefits of guild membership are all studied in detail The social and religious functions of the fraternities are then compared with the parish through a study of the records of two Norfolk market towns Wymondham and Swaffham and two Suffolk villages Bardwell and Cratfield A final chapter studies the fortunes of the guilds during the early years of the Reformation up to their dissolution in 1548 KEN FARNHILL is research associate at the Centre for Medieval Studies University of York The Convent and the Community in Late Medieval England Marilyn Oliva,1998 Detailed study of female monasticism in the later middle ages with particular emphasis on the nuns importance to the local community

Controlling Misbehavior in England, 1370-1600 Marjorie Keniston McIntosh,2002-06-20 In this important study Professor McIntosh argues against the suggestion that social regulation was a distinctive feature of the decades around 1600 resulting from Puritanism Instead through an examination of 255 village and small town communities distributed throughout England Professor McIntosh demonstrates that concern with wrongdoing mounted gradually between 1370 and 1600 In an attempt to maintain good order and enforce ethical conduct local leaders prosecuted people who slandered or quarrelled with their neighbours engaged in sexual misdeeds operated unruly alehouses or refused to work Professor McIntosh also explores who the offenders were as well as the factors that led to misbehaviour and shaped responses to it More generally Professor McIntosh sheds light on the transition from medieval to early modern patterns and succeeds here in opening up little known sources and new research methods **Representing Medieval Genders and Sexualities in Europe** Dr Alison More,Dr

Elizabeth L'Estrange,2012-10-01 Transcending both academic disciplines and traditional categories of analysis this collection illustrates the ways genders and sexualities could be constructed subverted and transformed Focusing on areas such as literature hagiography history and art history from the Anglo Saxon period to the early sixteenth century the contributors examine the ways men and women lived negotiated and challenged prevailing conceptions of gender and sexual identity In particular their papers explore textual constructions and transformations of religious and secular masculinities and femininities visual subversions of gender roles gender and the exercise of power and the role sexuality plays in the creation of gender identity The methodologies which are used in this volume are relevant both to specialists of the Middle Ages and

early modern periods and to scholars working more broadly in fields that draw on contemporary gender studies

Armstrong, 2020-11-12 Explains the history of England's northern borderlands in the fifteenth century within a broader social political and European context English Political Culture in the Fifteenth Century Michael Hicks, 2003-09-02 A new and original study of how politics worked in late medieval England throwing new light on a much discussed period in English history

Catholic England, 2013-01-01 The Reformation transformed English religion For many the spirituality of the preceding period remains largely unknown or overburdened with Protestant mythology of decadence These sources seek to explore the nature of religious belief and practice in pre Reformation England using original source material to make the debates accessible This consideration of the sources begins with an analytical chapter discussing the varieties of spirituality in later medieval England and the ways in which they received expression through participation in church services actions like pilgrimages charitable foundations devotional readings and instruction Opposition to prevailing spirituality expressed through Lollardy is also considered The sources demonstrate with immediacy and potency these diverse expressions of faith and observance Many of the documents are translated for the first time from unpublished manuscript material This study demonstrates the vitality of the pre Reformation religious practices but also addresses the key methodological questions which arise from the sources about the nature of the material its reliability as historical evidence and the validity of external actions as testimony to intellectual and emotional experience The Puritan Ideology of Mobility Scott McDermott, 2022-02

The Puritan Ideology of Mobility Corporatism the Politics of Place and the Founding of New England Towns before 1650 examines the ideology that English Puritans developed to justify migration their migration from England to New England migrations from one town to another within New England and often their repatriation to the mother country Puritan leaders believed firmly that nations colonies and towns were all bodies politic that is living and organic social bodies However if a social body became distempered because of scarce resources or political or religious discord it became necessary to create a new social body from the old in order to restore balance and harmony The new social body was articulated through the social

ritual of land distribution according to Aristotelian distributive justice The book will trace this process at work in the founding of Ipswich and its satellite town in Massachusetts *Patriarchy and Families of Privilege in Fifteenth-Century England* Joel T. Rosenthal, 1991-09-29 There are contends Joel Rosenthal two suppositions that have achieved almost full and unquestionable acceptance in contemporary social history and family studies The first is that at any given time in any given culture one particular form or model of the family dominates the second is that historical changes in the family operate in a single and compelling direction In *Patriarchy and Families of Privilege in Fifteenth Century England* the author joins quantitative and legal evidence with case studies to yield a depiction of the family as something at once corporeal fictive and symbolic

The Bishopric of Durham in the Late Middle Ages Christian Drummond Liddy, 2008 New study sets the medieval palatinate of Durham firmly in the context of a community built round the cult of St Cuthbert

The Commercialisation of English Society, 1000-1500 R. H. Britnell, 1996 The commercialisation of English society offers a major new interpretation of social and economic change in England over five centuries By 1500 English livelihoods depended more upon money and commercial transactions than ever before the institutional framework of markets had been transformed and urban development was more pronounced These changes were not however caused by any unilinear development of population output or money supply This pioneering study examines both institutional and economic transformation and the social changes that resulted and stresses the limited importance of formal trading institutions for the development of local trade Commercial transition is throughout analysed from a broader perspective that looks at the changing power relations within medieval society which might loosely be described as feudal and considers how these relations were affected by such commercial development
