papers written by scholars at the East Asian Institute to address those problems during the period 1999-2001. The authors, with their knowledge and experience in China studies, provide in-depth observations and professional analyses of some of the most important issues for the Chinese economy at the turn of the century. Some of the observations and analyses lead to enlightening policy recommendations. The solid scholarship combined with the policy orientation of these papers will appeal greatly to researchers in academia, governments, and other institutions. The policy-oriented and fact-based analyses will also be of interest to practitioners in business, including business consultants.

Career Frontiers Maury Peiperl, 2000. The topic of careers has become both increasingly important and increasingly complex. Contemporary economies have brought about changes in the nature of careers and uncertainty in the structure and longevity of firms and their ability to offer long-term employment. Corporate policy makers struggle with alternatives to traditional employment structures while individuals struggle to decide whether and how they ought to become more independent of such structures, pursuing what some have called post-corporate or boundaryless careers. This volume is an integrated survey of some of the best current thinking and research on careers. Presented as a series of chapters by an international group of experts and knit together through themes and dialogues, it advances our understanding of the deeper meaning of changes in careers and of the interrelationships and longer-term consequences of those changes.

Bird in a Cage Stanley B. Lubman, 1999. This book analyzes the principal legal institutions that have emerged in China and considers implications for U.S. policy of the limits on China's ability to develop meaningful legal institutions.

Musical Renderings of the Philippine Nation Christi-Anne Castro, 2011-05-05. The first cultural history of the Philippines during the twentieth century. *Musical Renderings of the Philippine Nation* focuses on the relationships between music performance and ideologies of nation. Spanning the hundred years from the Filipino American War to the 1998 Centennial celebration of the nation's independence from Spain, the book has added emphasis on the period after World War II. Author Christi Anne Castro describes the narratives of nation embedded in several major musical genres such as classical music and folkloric song and dance and enacted by the most well-known performers of the country, including Bayanihan, The Philippine National Dance Company, and the Philippine Madrigal Singers. Castro delves into the ideas and works of prominent native composers, from the popular art music of Francisco Santiago and Lucio San Pedro to the People Power anthem of 1986 by Jim Paredes of the group Apo Hiking Society. Through both archival research and ethnographic fieldwork, Castro reveals how individuals and groups negotiate with and contest the power of the state to define the nation as a modern and hybrid entity within a global community.

The Chinese and Indian Corporate Economies Raj Brown,2017-02-03 This is a compelling analysis of the corporate economies of China and India which are having a huge impact not just on the international economy but also in the geopolitical and international strategy sphere as a result of an accelerated globalisation by these two countries which is unleashing powerful economic challenges to corporate structures economic institutions and law worldwide The big question is how after centuries of underdevelopment China and now India are emerging powerfully and pulling ahead of Western European economies Analysing the role of the state and the adroit use of law and their impact on the corporate evolution of both China and India provides greater clarity and insight into why China has evolved as a manufacturing nation utilizing cheap abundant labour while India has not exploited such advantages but instead focused on IT and higher value industries even abroad as Tata has demonstrated in the motor industry in Europe Again while Chinese corporations have expanded abroad as an arm of the state into Asia Middle East Africa Europe Latin America and parts of the southern states of the USA India has pushed principally into Europe through the efforts of powerful minority capitalists of Parsi and Gujerati background overcoming technological gaps and differences through acquisitions and absorptions of existing corporations in particular industries especially in steel automobiles and textiles In China state owned corporations have been dominant In India though state owned enterprises have been powerful since 1951 it has been private capitalists with an established stronghold since the colonial period and even under the Socialist period from 1951 1991 who have been the more productive main actors both in India and abroad
