**Ribbon Societies in Nineteenth-century Ireland and Its Diaspora** Kyle Hughes (Lecturer in British history), Donald M. MacRaild, 2018 This is the first full length study of Irish Ribbonism tracing the development of the movement from its origins in the Defender movement of the 1790s to the latter part of the century when the remnants of the Ribbon tradition found solace in a new movement the quasi constitutional affinities of the Ancient Order of Hibernians Placing Ribbonism firmly within Ireland's long tradition of collective action and protest this book shows that owing to its diversity and adaptability it shared similarities but also stood apart from the many rural redresser groups of the period and showed remarkable longevity not matched by its contemporaries The book describes the wider context of Catholic struggles for improved standing explores traditions and networks for association and it describes external impressions Drawing on rich archives in the form of state surveillance records show trial proceedings and press reportage the book shows that Ribbonism was a sophisticated and durable underground network drawing together various strands of the rural and urban Catholic populace in Ireland and Britain *Ribbon Societies in Nineteenth Century Ireland and its Diaspora* is a fascinating study that demonstrates Ribbonism operated

more widely than previous studies have revealed *Handbook on Small Nations in the Global Economy* D. van den Bulcke, Alain Verbeke, Wenlong Yuan, 2009 These studies of the international competitiveness of small open economies demonstrate the critical importance of foreign direct investment as an engine of economic development multinational enterprises are the key drivers of international competitiveness Alan M Rugman University of Reading UK Globalization has made every country small The global economic crisis has made sure that every country has increasingly realised that it is open and vulnerable as well This volume is both timely and relevant Small country studies should become mainstream for scholars in business economics and politics Rob van Tulder RSM Erasmus University the Netherlands This book provides a fresh and clear eyed view of the relationship between multinationals and location advantages of countries It is one of the first attempts to build a constructive bridge between the theory of international business and the outstanding contribution of Michael Porter about the drivers of competitiveness The authors address crucial issues demanding the attention of teachers researchers practitioners and political leaders Philippe Gugler University of Fribourg Switzerland This unique extensive Handbook illustrates that multinational enterprises can contribute substantially to the competitive advantage of small countries It advances the notion that small nations increasingly need to rely on both home grown and foreign multinational enterprises to achieve domestic economic success in industries characterized by international competition The expert contributors explore the roles of firms in a range of small successful open economies driven by such multinational enterprises across the globe They juxtapose country data sets against Professor Michael Porter's paradigm of single diamond components and show that these single diamond components reflect merely a set of initial conditions which can be improved upon through both inward and outward direct investment Concluding that multinational enterprises create resource linkages between the home and host environments in which they operate this Handbook proves to be a fascinating read for academics students and researchers with an interest in business and management economics and international economics **The Oxford Handbook of British Politics** Matthew Flinders, Andrew Gamble, Colin Hay, Michael Kenny, 2009-07-16 The study of British politics has been reinvigorated in recent years as a generation of new scholars seeks to build upon a distinct disciplinary heritage while also exploring new empirical territory and finds much support and encouragement from previous generations in forging new grounds in relation to theory and methods It is in this context that The Oxford Handbook of British Politics has been conceived The central ambition of the Handbook is not just to illustrate both the breadth and depth of scholarship that is to be found within the field It also seeks to demonstrate the vibrancy and critical self reflection that has cultivated a much sharper and engaging and notably less insular approach to the terrain it seeks to explore and understand In this emphasis on critical engagement disciplinary evolution and a commitment to shaping rather than re stating the discipline The Oxford Handbook of British Politics is consciously distinctive In showcasing the diversity now found in the analysis of British politics the Handbook is built upon three foundations The first principle that underpins the volume is a

broad understanding of the political It covers a much broader range of topics themes and issues than would commonly be found within a book on British politics This emphasis on an inclusive approach also characterises the second principle that has shaped this collection namely diversity in relation to commissioned authors The final principle focuses on the distinctiveness of the study of British politics Each chapter seeks to reflect on what is distinctive both in terms of the empirical nature of the issue of concern and the theories and methods that have been deployed to unravel the nature and causes of the debate The result is a unique volume that draws upon the intellectual strengths of the study of British politics reflects the innate diversity and inclusiveness of the discipline isolates certain distinctive issues and then reflects on their broader international relevance and finally looks to the future by pointing towards emerging or overlooked areas of research

**Transatlantic Divide** Alberto Martinelli, 2007-11-08 The book describes interprets and analyzes the key features of European society and American society and major social trends in the United States and in the European Union in the last 50 years The United States of America and the European Union are the two strongest economic powers in the contemporary world roughly equivalent in terms of GNP market size and scientific potential but asymmetrical in terms of political influence and military might The US and the EU can be both seen as successful examples of economic development and of political and cultural modernization But they have followed different paths to reach such a position They can be considered as two variants of Western modernity The systematic description of trends for the US and the EU taken as whole societies and the interpretation of similarities and differences and of major changes over time would be already a significant scientific work since they would fill a void in today's social science literature In fact there are several studies comparing the US with one or more European countries but there is no comparative study of the United States with the European Union taken as a single society The importance of the comparison is self evident for discussing such questions as what kind of society the US and the EU constitute how similar and how different are they are they two variants of Western modernity or two wholly distinct models of society American exceptionalism and European uniqueness are the two societal models converging or diverging which are the distinctive features the American model of society is it departing from its core culture and institutions is there a European society in the making how diverse are the member countries of the EU which are the distinctive features of the European project which model of society seems more reactive to the challenges of globalization The approach is new insofar as it assumes the countries of the European Union as increasingly forming a single society with gradually converging trends and common features and considers the differences among member countries as regional differences within the European society The conclusion is that in spite of different foreign policy perspectives and different national priorities however the US and the EU are bound not only to compete but also to work together Although the relationship will be more or less turbulent more or less friendly according to the events of global politics and to the characters of governments and leaders of the two unions it will remain a close relationship for long time As any sea the Atlantic ocean not only divides but also unites the

peoples on its shores      *Politics in the Republic of Ireland* John Coakley, Michael Gallagher, 2012-12-12 Politics in the Republic of Ireland is now available in a fully revised fourth edition Building on the success of the previous three editions this text continues to provide an authoritative introduction to all aspects of politics in the Republic of Ireland Written by some of the foremost experts on Irish politics it explains analyzes and interprets the background to Irish government and contemporary political processes Crucially it brings the student up to date with the very latest developments New patterns of government formation challenges to the established political parties ever deepening if sometimes ambivalent involvement in the process of European integration a growing role in the politics of Northern Ireland and sustained discussion of gender issues are among these developments along with evidence revealed by several tribunals of enquiry that Irish politics is not as free of corruption as many had assumed      *The Irish Yearbook of International Law, Volume 6, 2011* Fiona de Londras, Siobhán Mullally, 2013-08-23 The Irish Yearbook of International Law is intended to stimulate further research into Ireland's practice in international affairs and foreign policy filling a gap in existing legal scholarship and assisting in the dissemination of Irish thinking and practice on matters of international law On an annual basis the Yearbook presents peer reviewed academic articles and book reviews on general issues of international law Designated correspondents provide reports on international law developments in Ireland Irish practice in international fora and the European Union and the practice of joint North South implementation bodies in Ireland In addition the Yearbook reproduces documents that reflect Irish practice on contemporary issues of international law Publication of the Irish Yearbook of International Law makes Irish practice and *opinio juris* more readily available to Governments academics and international bodies when determining the content of international law In providing a forum for the documentation and analysis of North South relations the Yearbook also makes an important contribution to post conflict and transitional justice studies internationally As a matter of editorial policy the Yearbook seeks to promote a multilateral approach to international affairs reflecting and reinforcing Ireland's long standing commitment to multilateralism as a core element of foreign policy      **Irish English, volume 1 - Northern Ireland** Karen P. Corrigan, 2010-01-15 An overview of English as it is spoken in the Northern dialect regions of Ireland      The Destruction of Cultural Heritage in Iraq Peter G. Stone, Joanne Farchakh Bajjaly, 2008 Discussion of the issues surrounding the destruction of cultural property in times of conflict has become a key issue for debate around the world This book provides an historical statement as of 1st March 2006 concerning the destruction of the cultural heritage in Iraq In a series of chapters it outlines the personal stories of a number of individuals who were and in most cases continue to be involved These individuals are involved at all levels and come from various points along the political spectrum giving a rounded and balanced perspective so easily lost in single authored reports It also provides the first views written by Iraqis on the situation of archaeology in Iraq under Saddam and an overview and contextualisation of the issues surrounding the looting theft and destruction of the archaeological sites the Iraqi National museum and the libraries in Baghdad since the

war was launched in 2003 Beyond this it examines our attitudes towards the preservation of cultural and heritage resources and in particular the growing political awareness of their importance Although related to a single conflict taking place at a specific time in history the relevance of this work goes far beyond these self imposed boundaries PETER STONE is Professor of Heritage Studies and Head of School of Arts and Cultures at Newcastle University JOANNE FARCHAKH BAJJALY is a Lebanese archaeologist and Middle East correspondent for the French magazine Arch ologia [International encyclopedia of adolescence](#) Jeffrey Jensen Arnett,2007 Publisher description [The Irishness of Irish Music](#) John O'Flynn,2017-07-05 This book brings together important material from a range of sources and highlights how government organizations musicians academics and commercial companies are concerned with and seek to use a particular notion of Irish musical identity Rooting the study in the context of the recent history of popular traditional and classical music in Ireland as well as providing an overview of aspects of the national field of music production and consumption O Flynn goes on to argue that the relationship between Irish identity and Irish music emerges as a contested site of meaning His analysis exposes the negotiation and articulation of civic ethnic and economic ideas within a shifting hegemony of national musical culture and finds inconsistencies between and among symbolic constructions of Irish music and observed patterns in the domestic field More specifically O Flynn illustrates how settings genres social groups and values can influence individual identifications or negations of Irishness in music While the apprehension of intra musical elements leads to perceptions of music that sounds Irish style and authenticity emerge as critical articulatory principles in the identification of music that feels Irish The celebratory and homogenizing discourse associated with the international success of some Irish musical forms is not reflected in the opinions of the people interviewed by O Flynn at the same time an insider outsider dialectic of national identity is found in various forms of discourse about Irish music Performers and composers discussed include Bill Whelan Riverdance Sinéad O Connor The Corrs Altan U2 Martin Hayes Dolores Keane and Gerald Barry
