Warplane Hal Sundt,2023-10-03 The A 10 is the Air Force s unlikely success story an airplane designed to support the Army and one that ground troops came to venerate Throughout its tumultuous life the A 10 became the Forrest Gump of airplanes a singular character whose story coincides with almost every major development in aviation technology and military engineering history Inspired by the biography of a tank busting German pilot in World War II the task of developing the A 10 fell to Pierre Sprey a precocious civilian who d enrolled at Yale when he was just 15 years old and now barely 30 was exiled to a Pentagon backwater with little if any supervision The end result was one of the finest military aircraft ever built a plane essentially constructed around a 19 5 foot 4 000 pound cannon that fired 30mm depleted uranium bullets at a blistering rate Looking like it was assembled from discarded airplane parts it is probably the ugliest combat aircraft ever built affectionately known as the Warthog or the Flying Gun But it is also an incredibly reliable ground attack aircraft beloved by ground troops from Iraq to Afghanistan Still the A 10 has been fighting for its life since it was the mere zygote of an idea in Sprey s mind From the time he recommended the Air Force develop an airplane like the A 10 Sprey s reputation and intellect were relentlessly attacked by military bureaucrats Stubbornly Sprey could not be silenced and his plane would not be grounded Despite repeated attempts to replace it with stealth aircraft and drones hundreds of A 10s remain in flight today serviced by dedicated and imaginative engineers and maintainers and defended by a fervent cohort of advocates descended from the Military Reform movement The A 10 has achieved a kind of cult status Warthog pilots direct the immense discipline intellect and physical excellence required to be a fighter pilot towards something that can t even fly as fast as a regional jet one might take from Cleveland to Chicago This is the story of intra service rivalries Pentagon obsessions with speed and stealth over tactical simplicity and an aircraft that shows no sign of obsolescence
