assumption that the intimate link between the exclusive intellectual culture of British elites and the study of the ancient Greeks and Romans and their languages meant that working class culture was a Classics Free Zone Making use of diverse sources of information both published and unpublished in archives museums and libraries across the United Kingdom and Ireland Hall and Stead examine the working class experience of classical culture from the Bill of Rights in 1689 to the outbreak of World War II They analyse a huge volume of data from individuals groups regions and activities in a huge range of sources including memoirs autobiographies Trade Union collections poetry factory archives artefacts and documents in regional museums This allows a deeper understanding not only of the many examples of interaction with the Classics but also what these cultural interactions signified to the working poor from the promise of social advancement to propaganda exploited by the elites to covert and overt class war A People s History of Classics offers a fascinating and insightful exploration of the many and varied engagements with Greece and Rome among the working classes in Britain and Ireland and is a must read not only for classicists but also for students of British and Irish social intellectual and political history in this period Further it brings new historical depth and perspectives to public debates around the future of classical education and should be read by anyone with an interest in educational policy in Britain today

Structure and Agency in Young People's Lives Magda Nico,Ana Caetano,2021-05-12 Structure and Agency in

Young People's Lives brings together different takes on the possible combinations of agency and structure in the life course thus rejecting the notion that young individuals are the single masters of their lives but also the view that their social destinies are completely out of their hands How did I get here This is a question young people have always asked themselves and is often asked by youth researchers There is no easy and single answer The lives that are told on one hand and their interpretation on the other may have the underlying idea of own doing or the idea of social determinism or more accurately and frequently a combination of the two This collection constitutes a comprehensive map on how to make sense of youth's biographies and trajectories it questions and reshapes the discussion on the role and responsibility of youth studies in the understanding of how people juggle opportunities and constraints and contributes to escaping what Furlong and Cartmel identified as the epistemological fallacy of late modernity in which young people find themselves responsible for collective failures or inevitabilities It can thus interest students researchers and professors youth workers and all of those who work for and with young people

Rankin, 2018-10-08 Silicon Valley gets all the credit for digital creativity but this account of the pre PC world when computing meant more than using mature consumer technology challenges that triumphalism The invention of the personal computer liberated users from corporate mainframes and brought computing into homes But throughout the 1960s and 1970s a diverse group of teachers and students working together on academic computing systems conducted many of the activities we now recognize as personal and social computing Their networks were centered in New Hampshire Minnesota and Illinois but they connected far flung users Joy Rankin draws on detailed records to explore how users exchanged messages programmed music and poems fostered communities and developed computer games like The Oregon Trail These unsung pioneers helped shape our digital world just as much as the inventors garage hobbyists and eccentric billionaires of Palo Alto By imagining computing as an interactive commons the early denizens of the digital realm seeded today's debate about whether the internet should be a public utility and laid the groundwork for the concept of net neutrality Rankin offers a radical precedent for a more democratic digital culture and new models for the next generation of activists educators coders and makers
