Peoples Land A Reader On Land Reform In The Us:

The People's Land Peter Barnes,1975 *Land Ownership Patterns and Their Impacts on Appalachian Communities*,1981 Bibliography of Agriculture ,1976 *Monitoring Ownership of U.S. Real Estate* D. David Moyer,1981 This bibliography lists by author the source materials from the 3 volume report Monitoring Foreign Ownership of U S Real Estate prepared by the Economics Statistics and Cooperatives Service U S Department of Agriculture in 1979 **Who Owns Appalachia?** Appalachian Land Ownership Task Force,2021-10-21 Long viewed as a problem in other countries the ownership of land and resources is becoming an issue of mounting concern in the United States Nowhere has it surfaced more dramatically than in the southern Appalachians where the exploitation of timber and mineral resources has been recently aggravated by the ravages of strip mining and flash floods This landmark study of the mountain region documents for the first time the full scale and extent of the ownership and control of the region s land and resources and shows in a compelling yet non polemical fashion the relationship between this control and conditions affecting the lives of the region s people Begun in 1978 and extending through 1980 this survey of land ownership is notable for the magnitude of its coverage It embraces six states of the southern Appalachian region Virginia West Virginia Kentucky Tennessee North Carolina and Alabama From these states the research team selected 80 counties and within those counties field workers documented the ownership of over 55 000 parcels of property totaling over 20 million acres of land and mineral rights The survey is equally significant for its systematic investigation of the relations between ownership and conditions within Appalachian communities Researchers compiled data on 100 socioeconomic indicators and correlated these with the ownership of land and mineral rights The findings of the survey form a generally dark picture of the region local governments struggling to provide needed services on tax revenues that are at once inadequate and inequitable economic development and diversification stifled increasing loss of farmland a traditional source of subsistence in the region Most evident perhaps is the adverse effect upon housing resulting from corporate ownership and land speculation Nor is the trend toward greater conglomerate ownership of energy resources the expansion of absentee ownership into new areas and the search for new mineral and energy sources encouraging Who Owns Appalachia will be an enduring resource for all those interested in this region and its problems It is moreover both a model and a document for social and economic concerns likely to be of critical importance for the entire nation *Facing South* David Bowman,Anita Parlow,Carl Abbott,Wayne Greenhaw,Allen Tullos,John Siceloff,Bill Finger,Valerie Quinney,Chip Hughes,Alvin Rosenbaum,Susan Moss, Throughout the country and even this region people view the South through myth and stereotype It s not surprising If they turn to newspapers to television and radio to popular films and literature to most history books and folklore they encounter these distortions They find insulting portraits of Southerners whitewashed presentations of southern economics and politics selective visions of history misunderstandings of relationships between people and between people and their land and work Many trivial qualities are

romanticized other important ones are totally ignored Blacks are presented only as victims of racism and labor struggles are completely forgotten This view is inevitable when people simply treat the South as an aberration of mainstream America or a remnant of some past culture We at Southern Exposure look at the South from another perspective This is our home we are of it and examine it that we may know more of ourselves and our neighbors These are the politics and culture that surround us and affect us daily that we must analyze praise and attack so our lives can grow and prosper And this is the ground from which we must view the larger world By listening to local tobacco farmers discuss the pressures on them to expand or die we can better understand Earl Butz s plan for US agribusiness By hearing a bluesman s story we come to appreciate how a particular culture evolves from material hardship and inspires immense creativity

Library,1975 *The New Larned History for Ready Reference, Reading and Research* Josephus Nelson Larned,1924 *The Unsettling of America* Wendell Berry,2015-09-15 Since its publication in 1977 *The Unsettling of America* has been recognized as a classic of American letters In it Wendell Berry argues that good farming is a cultural and spiritual discipline Today s agribusiness however takes farming out of its cultural context and away from families As a result we as a nation are more estranged from the land from the intimate knowledge love and care of it Sadly his arguments and observations are more relevant than ever Although this book has not had the happy fate of being proved wrong Berry writes there are people working to make something comely and enduring of our life on this earth Wendell Berry is one of those people writing and working as ever with passion eloquence and conviction [A Covenantal Imagination](#) William Johnson Everett,2021-12-15 This harvest of articles drawn from William Johnson Everett s career of teaching and research on four continents and in a variety of institutions shows the breadth depth and diversity of his interests Like spotlights in the wider field of Christian social ethics they illuminate the key threads that have held together an emerging tapestry of thought woven around the powerful concept of covenant Whether lifting up concepts of covenant federalism and corporation the oikos of work family and faith the public nature and mission of the church or the ethical meaning of journey metaphors his rich and artful style leads us into thinking more deeply about the way our lives are joined in a covenantal imagination about a more just and sustainable world **Compost Science** ,1974 *Human Scale Revisited* Kirkpatrick Sale,2017-04-15 Big government big business big everything Kirkpatrick Sale took giantism to task in his 1980 classic *Human Scale* and today takes a new look at how the crises that imperil modern America are the inevitable result of bigness grown out of control and what can be done about it The result is a keenly updated carefully argued case for bringing human endeavors back to scales we can comprehend and manage whether in our built environments our politics our business endeavors our energy plans or our mobility Sale walks readers back through history to a time when buildings were scaled to the human figure as was the Parthenon democracies were scaled to the societies they served and enterprise was scaled to

communities Against that backdrop he dissects the bigger is better paradigm that has defined modern times and brought civilization to a crisis point Says Sale retreating from our calamity will take rebalancing our relationship to the environment adopting more human scale technologies right sizing our buildings communities and cities and bringing our critical services from energy food and garbage collection to transportation health and education back to human scale as well Like Small is Beautiful by E F Schumacher Human Scale has long been a classic of modern decentralist thought and communitarian values a key tool in the kit of those trying to localize create meaningful governance in bioregions or rethink our reverence of and dependence on growth financially and otherwise Rewritten to interpret the past few decades Human Scale offers compelling new insights on how to turn away from the giantism that has caused escalating ecological distress and inequality dysfunctional governments and unending warfare and shines a light on many possible pathways that could allow us to scale down survive and thrive

America as Second Creation David E. Nye,2004-09-17 An exploration of the dialogue that emerged after 1776 between different visions of what it meant to use new technologies to transform the land After 1776 the former American colonies began to reimagine themselves as a unified self created community Technologies had an important role in the resulting national narratives and a few technologies assumed particular prominence Among these were the axe the mill the canal the railroad and the irrigation dam In this book David Nye explores the stories that clustered around these technologies In doing so he rediscovers an American story of origins with America conceived as a second creation built in harmony with God s first creation While mainstream Americans constructed technological foundation stories to explain their place in the New World however marginalized groups told other stories of destruction and loss Native Americans protested the loss of their forests fishermen resisted the construction of dams and early environmentalists feared the exhaustionof resources A water mill could be viewed as the kernel of a new community or as a new way to exploit labor If passengers comprehended railways as part of a larger narrative about American expansion and progress many farmers attacked railroad land grants To explore these contradictions Nye devotes alternating chapters to narratives of second creation and to narratives of those who rejected it Nye draws on popular literature speeches advertisements paintings and many other media to create a history of American foundation stories He shows how these stories were revised periodically as social and economic conditions changed without ever erasing the earlier stories entirely The image of the isolated frontier family carving a homestead out of the wilderness with an axe persists to this day alongside later images and narratives In the book s conclusion Nye considers the relation between these earlier stories and such later American developments as the conservation movement narratives of environmental recovery and the idealization of wilderness
