However his use of the leading figures of the British Romantic movement Byron and Shelley remains largely unexplored terrain The classic Danish authors of the eighteenth century Holberg Wessel and Ewald were influential figures who prepared the way for the Golden Age of Danish poetry Kierkegaard constantly refers to their dramatic characters whom he often employs to illustrate a philosophical idea with a pregnant example or turn of phrase Finally while Kierkegaard is not an obvious name in musicology his analysis of Mozart's Don Giovanni shows that he had a keen interest in music on many different levels

The Evolution of Culture Leslie A White, 2016-06-16 One of the major works of twentieth century anthropological theory written by one of the discipline's most important complex and controversial figures has not been in print for several years Now Evolution of Culture is again available in paperback allowing today's generation of anthropologists new access to Leslie

White's crucial contribution to the theory of cultural evolution. A new substantial introduction by Robert Carneiro and Burton J. Brown assess White's historical importance and continuing influence in the discipline. White is credited with reintroducing evolution in a way that had a profound impact on our understanding of the relationship between technology, ecology, and culture in the development of civilizations. A materialist, he was particularly concerned with societies' ability to harness energy as an indicator of progress, and his empirical analysis of this equation covers a vast historical span. Fearlessly tackling the most fundamental questions of culture and society during the cold war, White was frequently a lightning rod both inside and outside the academy. His book will provoke equally potent debates today and is a key component of any course or reading list in anthropological or archaeological theory and cultural ecology.

Diversity and Empires Sophie Rose, Elisabeth Heijmans, 2023-06-02. Examining diversity as a fundamental reality of empire, this book explores European colonial empires both terrestrial and maritime to show how they addressed the questions of how to manage diversity. These questions range from the local to the supra-regional and from the management of people to that of political and judicial systems. Taking an intersectional approach incorporating categories such as race, religion, subjecthood, and social and legal status, the contributions of the volume show how old and new modes of creating social difference took shape in an increasingly globalized early modern world and what contemporary legacies these diversity formations left behind. This volume shows diversity and imperial projects to be both contentious and mutually constitutive: on the one hand, the conditions of empire created divisions between people through official categorizations such as racial classifications and designations of subjecthood; and through discriminately applied extractive policies from taxation to slavery. On the other hand, imperial subjects, communities, and polities within and adjacent to the empire asserted themselves through a diverse range of affiliations and identities that challenged any notion of a unilateral universal imperial authority. This book highlights the multidimensionality and interconnectedness of diversity in imperial settings and will be useful reading to students and scholars of the history of colonial empires, global history, and race.

Eighteenth-Century Coffee-House Culture, vol 1 Markman Ellis, 2017-07-05. This book attempts to make an intervention in debates about the nature of the public sphere and the culture of politeness. It is intended for historians and scholars of literature, science, and medicine.

The Symbolism of Globalization, Development, and Aging Steven L. Arxer, John W. Murphy, 2012-09-14. This book looks at the symbolic side of globalization, development, and aging. Many of the dimensions that are discussed represent updates of past debates, but some are entirely new. In particular, globalization is accompanied by subtle social imagery that profoundly shapes the way institutions and identities are imagined. The process of aging and persons' sense of identity is no exception. The underlying assumptions that pervade globalization inform how critical dimensions of aging are discussed and institutionalized. The application of marketplace imagery, for example, may impact attempts for holism in how aging is studied.

and the prospects for human agency during the aging process This book offers a special look into how temporality technology normativity and empiricism structure the symbolic side of globalization and influence dominant images of the aging process Current debates about globalization and aging are expanded by helping readers see the social imagery that is both subtly behind globalization and at the forefront of shaping the aging experience
