Negation is the first book to analyse English negation over the whole of its documented history using a wide database and accessible terminology. After an introductory chapter the book analyses evidence from the whole sample of Old English documents available and from several Middle English and Renaissance documents showing that the range of forms used at any single stage is wider and the pace of their change considerably faster than previously commonly assumed. The book moves on to review current formalised accounts of the situation in Modern English tracing the changes in rules for expressing negation that have intervened since the earliest documented history of the language. Since the standard is only one variety of a language it also surveys the means of negation used in some non standard and dialectal varieties of English. The book concludes with a look at relatively recently born languages such as Pidgins and Creoles to investigate the degree of naturalness of the principles that rule the expression of English negation.

Pragmatic Organization of Discourse in the Languages of Europe Giuliano Bernini, Marcia L. Schwartz, 2011-12-22

The volume is a collection of papers reporting the results of investigations on the interaction of discourse and sentence structure in the languages of Europe. The subjects discussed in the book include morphosyntactic characteristics of spontaneous spoken texts, different patterns of word order in a pragmatic perspective, the coding of the pragmatic functions topic and focus in sentences with non canonical word orders, e.g. dislocations, clefts, the range of functions of verb subject order in declarative clauses and the notion of theticity, prosodic patterns of deaccenting of given information, deixis and anaphora, coding of definiteness and article systems. The book provides the empirical basis for the comparative survey of major phenomena found in the languages of Europe which have pragmatic relevance. Beside traditional areas of investigation at the interface between syntax and pragmatics such as dislocations, new areas are explored such as the prosody of given information. Data are considered within a functional typological approach.
