Quantum-like Models And Coherent Effects - Proceedings Of The 27th Workshop Of The Infn Eloisation

Project Padma Kant Shukla, Renato Fedele, 1995-10-17 On July 17 2012 the centenary of Henri Poincaré's death was commemorated his name being associated with so many fields of knowledge that he was considered as the Last Universalist In Pure and Applied Mathematics Physics Astronomy Engineering and Philosophy his works have had a great impact all over the world Poincaré acquired in his lifetime such a reputation that both nationally and internationally his life and career were made the object of various articles in the daily papers not only in France but also in the USA Some of his philosophical concepts have even caused sharp controversies in the Press as we will discover in this book This work presents an original portrait of Henri Poincaré based on various press cuttings from The New York Times The San Francisco Sunday Call The Times The Sun The Washington Post that chronicled unknown anecdotes of his life for example his first name was actually not Henri but Henry he obtained his high school diploma in sciences with a zero in mathematics etc Such an approach enables the discovering of many forgotten or unknown aspects of his scientific and philosophical works as well as his important role in the public sphere *Quantum Aspects Of Beam Physics - Advanced Icfa Beam Dynamics Workshop* Pisin Chen, 1999-04-19 The frontiers of beam research point to increasingly high energy greater brightness and lower emittance beams with ever increasing particle species These demands in turn have triggered a rapidly growing number of beam phenomena that involve quantum effects Concurrently the violent accelerations which are becoming available through novel accelerator research may perhaps help to investigate fundamental physics associated with general relativity In view of these exciting developments and the important role they may play in the next century the world's first conference on the Quantum Aspects of Beam Physics held at Monterey California in January 1998 attracted a broad spectrum of experts from beam physics particle physics laser science astrophysics condensed matter physics nuclear and atomic physics At the end of the meeting a new term quantum beam physics was coined This book collects together the excellent reviews and papers on new advances in the field which were presented during the workshop It should be a valuable reference to all physicists interested in the frontiers of quantum beam physics *Quantum Aspects Of Beam Physics, 18th Advanced Icfa Beam Dynamics Workshop* Pisin Chen, 2002-05-24 This proceedings volume records the advances in quantum beam physics since the first meeting in Monterey 1998 In addition to further progress regarding quantum effects in beam dynamics photon electron interaction in beam handling beam phenomena under strong fields and quantum methodologies in beam physics the newly introduced topics the physics of condensed beams as well as astro beam physics and laboratory astrophysics have also been well documented by world experts in the field This book should be a valuable reference to those who are interested in the joint frontiers of beam physics and other fields such as astrophysics and condensed matter physics New Aspects of Plasma Physics Padma K. Shukla, 2008 The 2007 ICTP Summer College on Plasma Physics was held at the Abdus Salam

International Centre for Theoretical Physics ICTP Trieste Italy during the period 30 July to 24 August 2007 The purpose of the summer college was to provide training for young scientists from all over the world mainly from third world countries and to give them the opportunity to interact with senior scientists in an informal manner A large number of talks were given by invited speakers and experts with information about the most recent advances in magnetic confinement fusion and tokamak physics intense laser plasma interactions and plasma based particle acceleration turbulence dusty plasmas and the emerging field of quantum plasmas A selected number of papers from the invited speakers appear in this book New Perspectives In

The Physics Of Mesoscopic Systems: Quantum-like Descriptions And Macroscopic Cohe Renato Fedele, Salvatore De Martino, Silvio De Siena, S De Nicola, Gennaro Miele, 1997-10-22 The very fast progress registered during the last few decades in physics has clearly shown the great necessity to give an interdisciplinary character to the scientific programs This has made the intersection between different branches of physics more and more important This volume contains theoretical and experimental results concerning the relationships among quantum like models macroscopic coherence and stochastic mechanics The wide range of topics covering particle accelerator physics plasma physics quantum optics superconductivities and mesoscopic gravitation is presented from a cross disciplinary point of view Scientific and Technical Aerospace Reports, 1995 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database *Proceedings of the 1999 Particle Accelerator Conference*, 1999 **Quantum-like Models and Coherent Effects** INFN ELOISATRON

Shukla, 1995-01-01 This volume is devoted to the use of the quantum like description that has been successful in describing numerous physical scenarios in many branches of physics including the dynamics of charged particle beams in accelerators and the propagation of electromagnetic wave energy in nonlinear media such as plasmas and optical fibres The quantum like approach seems therefore to form a common basis for understanding the observations in many diverse field of science *Annual Report Physical Research Laboratory* (Ahmadābād, India), 1994 **Subject Guide to Books in Print**, 1991
