Changing and Unchanging Face of U.S. Civil Society Marcella Ridlen Ray, 2017-12-02 Ray has written a book that should be read by anyone interested in the current debates about the general health of civil society in the United States American Journal of Sociology The formation maintenance and well being of American civil society is a topic of intense debate in the social sciences Until now this debate has lacked rigor with the term civil society commonly used interchangeably and imprecisely with other terms such as civic engagement Today s discourse also lacks methodological discipline and relies too heavily on narrowly selected evidence in support of a particular argument In this invaluable contribution to the debate Marcella Ridlen Ray supplies an empirical study based on a theoretical model of democratic civil society one that posits high levels of communication diversity autonomy mediation and voluntary association In Ray s account the emergent story of U S civil society is that of a dynamic

institution not necessarily one that is linear in its progression It is a tale of flux resilience and stability over the long term that is consistent with subtexts on political equilibrium she notes in the work of early political analysts such as Aristotle Machiavelli Locke Burke and later Tocqueville Ray dispels the widely accepted myth that Americans are increasingly apathetic and withdrawn from common interests The evidence reveals a persistence of long standing public spiritedness despite the fact that individuals use wider discretion in deciding if and how to attach to community and despite a historical lack of enthusiasm for performing civic duties in lieu of more pleasurable leisure activity This public spiritedness continues to reflect embedded religious cultural values that disproportionately influence how and when people dedicate time and money to associational life U S civil society has grown more inclusive and democratic as Americans venture at growing rates across differences in perspective

Changing America ,1998 This chart book is designed to document current differences in well being by race and Hispanic origin and to describe how such differences have evolved over the past several decades The charts included in this book show key indicators of well being in seven broad categories 1 population 2 education 3 labor markets 4 economic status 5 health 6 crime and criminal justice and 7 housing and neighborhoods Each section begins with a brief introduction and overview of the charts presented This information provides a benchmark for measuring future progress and can highlight priority areas for reducing disparities across racial and ethnic groups All the racial and ethnic groups considered here have experienced substantial improvements in well being over the second half of the century but disparities between groups have persisted or in some cases widened An example is the decline in the relative economic status of Hispanics over the past 25

years reflecting the increasing proportion of Hispanics with lower average levels of education in large part because of immigration The section on education which makes disparities in educational attainment and achievement clear contains information on family participation in literacy activities and preschool education One chart reviews computer use by elementary school children and two charts cover reading and mathematics proficiency scores both of which have implications for the pursuit of higher education Three charts focus on the educational attainment of adults over 25 years old An appendix provides a list of other government publications and Internet addresses for more information Contains 49 graphs and bar charts SLD
