Redwood Railways:

Redwood Railways Gilbert H. Kneiss, 1956 **Redwoods, iron horses, and the Pacific: The story of the California Western "Skunk" Railroad** Spencer Crump, 2025-06-18 Spencer Crump's *Redwoods Iron Horses and the Pacific* is a fascinating and richly detailed history of the California Western Railroad famously known as the Skunk Train. Nestled in the breathtaking redwood forests of Northern California, this legendary railway has carried passengers and freight for over a century, weaving its way through rugged landscapes and captivating generations of travelers. Crump traces the origins of the railroad from its founding in the late 19th century as a vital logging route to its transformation into one of California's most iconic scenic railways. Through engaging storytelling and meticulous research, he explores the challenges faced by its builders, the economic forces that shaped its evolution, and the unforgettable experiences of those who rode the rails. The book brings to life the unique character of the Skunk Train, named for the distinctive smell of its early gas-powered railcars. Crump captures the romance of rail travel through the towering redwoods, the role of the railway in local communities, and the enduring charm that has made it a beloved attraction. With historical photographs, vivid descriptions, and a deep appreciation for railroad heritage, *Redwoods Iron Horses and the Pacific* is an essential read for train enthusiasts, California history buffs, and anyone who has ever dreamed of a journey through the majestic forests of the Pacific Coast. Whether you're a historian or an armchair traveler, this book offers an unforgettable ride through time and terrain on one of America's most scenic railways. *The Redwoods* United States. National Park Service, 1964 **Trains**, 1962 **The Home of the Redwood** Redwood Lumber Manufacturers Association, 1897 **Historic Redwood National and State Parks** Gail L. Jenner, 2016-05-01 If redwood trees could share their stories, what would they say? Some of these giants are thousands of years old, but all have witnessed some truly unique moments in history. *Historic Redwood National and State Parks* is a vibrant collection of essays sharing different parts of Redwood National Park's history, from the Native Americans and the early explorers to park visitors today. Celebrate the 100th anniversary of the National Park Service and learn more about the cultural, political, and natural history of Redwood National and State Parks. **Logging Railroads of Humboldt and Mendocino Counties** Katy M. Tahja, 2013 Locomotive steam whistles echo no more in the forests of the north California coast. A century ago, Humboldt and Mendocino Counties had more than 40 railroads bringing logs out of the forest to mills at the water's edge. Only one single railroad ever connected to the outside world, and it too is gone. One railroad survives as the Skunk Train in Mendocino County, and it carries tourists today instead of lumber. Redwood and tan oak bark were the two products moved by rail, and very little else was hauled other than lumberjacks and an occasional picnic excursion for loggers' families. Economic depressions and the advent of trucking saw railroads vanish like a puff of steam from the landscape. City of Wood James Michael Buckley, 2024-11-19 2025 John Brinckerhoff Jackson Prize Association of American Geographers How San Franciscans exploited natural resources such as redwood lumber to produce the first major metropolis.

of the American West California's 1849 gold rush triggered creation of the instant city of San Francisco as a base to exploit the rich natural resources of the American West City of Wood examines how capitalists and workers logged the state's vast redwood forests to create the financial capital and construction materials needed to build the regional metropolis of San Francisco Architectural historian James Michael Buckley investigates the remote forest and its urban core as two poles of a regional city This city consisted of a far reaching network of spaces produced as company owners and workers arrayed men and machines to extract resources and create human commodities from the region's rich natural environment Combining labor urban industrial and social history City of Wood employs a variety of sources including contemporary newspaper articles novels and photographs to explore the architectural landscape of lumber from backwoods logging camps and company towns in the woods to busy lumber docks and the homes of workers and owners in San Francisco By imagining the redwood lumber industry as a single community spread across multiple sites a City of Wood Buckley demonstrates how capitalist resource extraction links different places along the production value chain The result is a paradigm shift in architectural history that focuses not just on the evolution of individual building design across time but also on economic connections that link the center and periphery across space
