Reference Grammar Of Mbili:

A Reference Grammar of Mbili Funwi F. Ayuninjam, 1998-08-20 A Reference Grammar of Mbili explores the major linguistic components of the Mbili language from a primarily descriptive point of view and within the cultural context of this Bantu language spoken in Cameroon

A Reference Grammar of Mbili Funwi F. Ayuninjam, 1998 A Reference Grammar of Mbili explores the major linguistic components of the Mbili language from a primarily descriptive point of view and within the cultural context of this Bantu language spoken in Cameroon It presents a detailed and accessible account of the roots and history of the language clearly situated within both the Niger Congo language group in general and the Grassfield Bantu language sub group specifically The language portion begins with a descriptive introduction to the sound segments of Mbili and the methods of combining them It then moves into the suprasegments of the language including tone stress and intonation it investigates the interaction of tone tense and mood as well as the distribution of tone and intonation in Mbili Segmental and suprasegmental phonemes are related in terms of what they require tolerate and exclude The next presentation deals with the morphology of nouns and verbs On the one hand it establishes a structural identification of the noun classes and determines a functional and semantic categorization of the classifiers on the other hand it identifies and relates the temporal aspectual and modal categories of Mbili and also studies the semantics of the verb through a case grammar analysis Finally the book approaches syntax through a clause and sentence level of analysis to explain the nature of sentence structure in a manner related to English sentence structure The appendix contains a lexicon as well as traditional folk stories and their translations to convey aspects of Cameroonian culture and examples of the nature of the Mbili language

On reconstructing Proto-Bantu grammar Koen Bostoen, Gilles-Maurice de Schryver, Rozenn Guérois, Sara Pacchiarotti, 2023-03-15 This book is about reconstructing the grammar of Proto Bantu the ancestral language at the origin of current day Bantu languages While Bantu is a low level branch of Niger Congo the world s biggest phylum it is still Africa s biggest language family This edited volume attempts to retrieve the phonology morphology and syntax used by the earliest Bantu speakers to communicate with each other discusses methods to do so and looks at issues raised by these academic endeavours It is a collective effort involving a fine mix of junior and senior scholars representing several generations of expert historical comparative Bantu research It is the first systematic approach to Proto Bantu grammar since Meeussen s Bantu Grammatical Reconstructions 1967 Based on new bodies of evidence from the last five decades most notably from northwestern Bantu languages this book considerably transforms our understanding of Proto Bantu grammar and offers new methodological approaches to Bantu grammatical reconstruction

Negation Patterns in West African Languages and Beyond Norbert Cyffer, Erwin Ebermann, Georg Ziegelmeyer, 2009-08-27 This volume deals with issues on negation patterns in languages of West Africa and the adjacent north and east The first aim is to provide data on various aspects of negation in African languages Although the topics addressed here reflect a great diversity of negation patterns the following typological

features have been identified to be prominent in our region conflict or even incompatibility between negation and focus use of other indirect means of negating non indicative mood covered under the term Prohibitive different negation patterns in different Tense Aspect Moods e g Imperfective vs Perfective lack of negative indefinites and disjunctive negative marking often referred to as double negation The articles presented here show that areal factors have played a significant role in the development of negation strategies in the languages of West Africa and beyond On the other hand genetic factors seem to be less prominent

An Introduction to Linguistic Typology Viveka Velupillai,2012 Offers an introduction to linguistic typology that covers various linguistic domains from phonology and morphology over parts of speech the NP and the VP to simple and complex clauses pragmatics and language change This title also includes a discussion on methodological issues in typology

The Emergence of Distinctive Features Jeff Mielke,2008-03-13 The Emergence of Distinctive Features will be of essential interest to phonologists and typologists as well as to syntacticians cognitive scientists and scholars outside linguistics

interested in the nature of language and its acquisition **BOOK JACKET**

Functional Structure from Top to Toe Peter Svenonius,2014 This volume consists of nine original chapters on central issues in theoretical syntax all written by

distinguished authors who have made major contributions to generative syntax plus an introductory chapter by the editor

Dedicated to Tarald Taraldsen the collection reflects the diverse energies that have pushed the cartographic program

forward over the last decade The first three papers deal with subject extraction the que qui alternation and relative clause

formation Luigi Rizzi presents arguments that subjects are criterial and that subject extraction is highly restricted Hilda

Koopman and Dominique Sportiche concur suggesting that what appears to be subject extraction in French has been

misanalyzed and involves a relative structure Adriana Belletti shows that children avoid using object relatives preferring

subject relatives even when it requires passivization The fourth paper by Ian Roberts analyzes the loss of pro drop in the

history of French and Brazilian Portuguese The papers by M Rita Manzini and Richard S Kayne both present novel analyses

of complementizers suggesting that they are essentially nominal rather than verbal The final three papers address the

relationship of morphology to syntax The first two argue for a syntactic approach to word formation Guglielmo Cinque s in a

typological context and Anders Holmberg s within an analysis of Finnish focus constructions The final paper by Edwin

Williams presents an argument for the limitations of the syntactic approach to word formation *Typological Studies*

Guglielmo Cinque,2014-02-04 In this book Cinque takes a generative perspective on typological questions relating to word

order and to the syntax of relative clauses In particular Cinque looks at the position of the Head vis vis the relative clause in

relation to the position of the verb vis vis his object a general cross linguistic analysis of correlatives the need to distinguish a

sentence grammar from a discourse grammar type of non restrictives with languages differing as to whether they possess

both one the other or neither a selective type of extraction from relative clauses and a tentative sketch of a more ample work

in progress on a unified analysis of externally headed internally headed and headless relative clauses **The Paradigmatic**

Structure of Person Marking Michael Cysouw, 2009-01-29 This book explores person markers the linguistic elements that provide points of reference to speech act participants Michael Cysouw develops a new framework for the typology of person marking based on the rejection of the notion of plurality for its analysis When a mother says Mummy is going to say goodnight now Mummy is the person marker in a way that in English is confined to motherese but which is used more commonly in some other languages and may also be characteristic of much earlier forms Dr Cysouw divides the person markers of 400 languages into paradigms He considers how the structure of these person paradigms relates to their function His investigation provides a clear account of how person markers work syntactically pragmatically and semantically as well as giving fresh insights into aspects of linguistic change language relatedness and the interfaces between discourse syntax and semantics The combination of a typological and a comparative approach results in the first outline of a cognitive map of the paradigmatic structure of person marking

Coordination and Subordination Sandra Pereira, Clara Pinto, Fernanda Pratas, 2016-06-22 Recent studies on the syntax and semantics of complex sentences have dealt with several challenges to the traditional boundaries between coordination and subordination Some constructions belong to one of the two types according to syntactic criteria but relate to the other type on semantic grounds whereas other constructions are not compatible with either the canonical syntactic or semantic tests traditionally employed to establish this distinction Other constructions by contrast seem to have evolved in such a way that they now cross the divide between both types The collection of papers in this volume delves further into the theoretical implications of previous analyses and focuses on a wide array of data from different languages taking those challenges as a point of departure to develop innovative perspectives and to advance thought provoking ideas
