Reflective Heart:

At the Heart of Teaching Grace Hall McEntee, 2003-01-01 Featuring engaging narratives this how to book delves into reflection as a concept and provides specific replicable tools for professional practice Each chapter draws on a particular school situation demonstrating the value of teacher reflection and describing the nuts and bolts of the process including protocols for handling many different circumstances Written by public school teachers who offer lessons learned and strategies that work this volume provides insights to help teachers build reflective practice with their students including protocols for classroom problem solving presents scenarios for individual students their parents and teachers to talk together about a student s performance including protocols for conducting family meetings shows what can happen when teachers come together to share stories of their daily lives including protocols for conducting a focus group and offers advice for reflecting alone and with a group including protocols for both types of reflection Cardiovascular Imaging and Image Analysis Ayman El-Baz, Jasjit S. Suri, 2018-10-03 This book covers the state of the art approaches for automated non invasive systems for early cardiovascular disease diagnosis It includes several prominent imaging modalities such as MRI CT and PET technologies There is a special emphasis placed on automated imaging analysis techniques which are important to biomedical imaging analysis of the cardiovascular system Novel 4D based approach is a unique characteristic of this product This is a comprehensive multi contributed reference work that will detail the latest developments in spatial temporal and functional cardiac imaging The main aim of this book is to help advance scientific research within the broad field of early detection of cardiovascular disease This book focuses on major trends and challenges in this area and it presents work aimed to identify new techniques and their use in biomedical image analysis Key Features Includes state of the art 4D cardiac image analysis Explores the aspect of automated segmentation of cardiac CT and MR images utilizing both 3D and 4D techniques Provides a novel procedure for improving full cardiac strain estimation in 3D image appearance characteristics Includes extensive references at the end of each chapter to enhance further study **The Heart and its Attitudes** Stephen Darwall, 2024-04-30 Philosophers don t often write about the heart At least analytical philosophers don t Why is this Philosophers are said to live life in their heads rather than from their hearts But even if that is so why don t they think and write about the heart Moreover it can hardly have escaped philosophers attention that matters of the heart are central to what we human beings value most about our lives including our lives with animals Philosophers write a lot about friendship and love but they tend to do so in terms that leave out heartfelt connection They speak rather of commitment to one another and each other s well being or taking each other as ends or sharing deliberative standpoints or living life together or a whole host of other topics and much less about mutual emotional vulnerability and sharing and being in one another s hearts Surely one explanation of philosophers reticence is that talk of the heart seems unavoidably metaphorical It turns out to be easy enough however to cash the metaphor in if we simply take heart refers to a cluster of emotional susceptibilities that have an

essentially reciprocating structure The heart aims at heartfelt connection at shared experience of joys and sorrows hopes and fears and other personal emotions We seek naturally to share these feelings with others and must suppress our natural tendencies if we wish to avoid doing so Our heart s wish is to be open to other hearts in the hope that they will be open to ours and thereby us in return This book is a systematic treatment perhaps the first of attitudes of the heart remorse versus guilt love trust gratitude personal anger versus righteous anger jealousy and others and their role in mediating personal relationship attachment and connection This is obviously interesting in its own right but it also shows how heartfelt attitudes mirror more extensively studied reactive attitudes of guilt resentment and blame attitudes of the will Whereas the latter mediate moral relations of mutual respect and accountability attitudes of the heart are the currency of heartfelt connection and personal relationship

Theological Reflection across Religious Traditions

Edward Foley,2015-02-12 Theological reflection connecting real life ministry and religious traditions is a core component of most pastoral training It is also a hallmark of practical theology and a common spiritual exercise among ordinary Christians trying to discern how their beliefs might influence daily living Yet our society is increasingly pluralistic with growing numbers of people from varying belief systems from Islam to Buddhism as well as an increasing number of atheists In this book Edward Foley reimagines theological reflection in interfaith contexts and with those of no faith tradition The book addresses and celebrates diverse beliefs and envisions the practice of theological reflection in such contexts Theological Reflection Across Religious Traditions introduces readers to the basics of traditional forms of theological reflection then considers how it might be reconceived in different contexts from interfaith ministers working together to reduce poverty and homelessness to people of diverse or no faith traditions strategizing to secure the dignity of undocumented immigrants Beyond suggestions for collaborative social action the book offers tools for productive interfaith conversation through a process Foley calls reflective believing This is a groundbreaking rethinking of theological reflection for today s world proposing that people across the religious landscape can participate in reflective believing for personal and communal benefit without sacrificing their own integrity
