Reflexive Architecture:

Reflexive Architecture Neil Spiller, 2002-08-23 Reflexive Architecture breaks all conceptions of the building as a static architectural object. This title provides an extensive overview of cutting edge technologies designed to create reflexive buildings that evolve and respond intelligently to their particular surroundings and environments. First ever overview of projects in reflexive architecture. Provides detailed coverage of the latest developments in computer design software. Stunning illustrations throughout. Paravartan : an enquiry on reflex phenomenon in responsive, adaptive and intelligent behaviours of reflexive spatial system archetypes Parantap Bhatt, 2012-07-07 This book is an analytical enquiry of reflex phenomenon in spatial components of a reflexive space. It is a quest in search for meaning of building a reflexive spatial system. The study analyses the ways in which emergent technologies can transform built spaces from being mere mute objects in an environment to elevate them into adaptive experiential spaces for the people who use it. It is envisioned to briefly and clearly understand the forces in a responsive built environments in the digital age that manifest itself in various forms of spatial flexibility. Here it specifically intends to address the issues of a reflexive spaces and how such spaces can transform the experience of a user through technological advancements. The document also tends to explain how reflexive spaces are built and maintained to follow different patterns of behaviour in a singular space. Poetics in Architecture Leon van Schaik, 2002-07-09 Can architecture directly engage with the inner experience of people? Does it have universal or spiritual content? Poetics in Architecture attempts to address these questions by looking at the essence of meaning of architecture and considering the human response to buildings. Schaik's concern is that by focusing on technical refinements and new procedural models architects are in danger of alienating the collective human connections we make with buildings. This title brings together the views of a fascinating and diverse group of architects and theoreticians from all over the world including Bolles Wilson, Boyarsky, Wilson, Winka, Dubbledam, Sean, Godsell, Mark, Goulthorpe of dECOI and Tom Kovac. **The Inhabitable Flesh of Architecture** Professor Marcos Cruz, 2013-12-31 Today's architecture has failed the body with its long heritage of purity of form and aesthetic of cleanliness. A resurgence of interest in flesh, especially in art, has led to a politics of abjection, completely changing traditional aesthetics and is now giving light to an alternative discussion about the body in architecture. This book is dedicated to a future vision of the body in architecture, questioning the contemporary relationship between our Human Flesh and the changing Architectural Flesh. *Dimensions.
