Reform Of The Cap And Rural Development In Southern Europe:

The Reform of the CAP and Rural Development in Southern Europe George Stathakis, 2017-10-24 Today the use of the term countryside reflects a dual historical shift due to the decreasing importance of agriculture both in terms of employment and production in European economies and the shift toward the environment An increasing part of rural populations is being drawn into non agricultural sectors such as tourism construction manufacturing and the conventional and innovative services thereby granting a more diversified and contemporary role to the countryside The environmental shift has questioned many of the very fundamental premises governing the relationship between social practices and nature Agenda 2000 and the ongoing debate concerning the CAP reforms are connected to a large extent with these new realities This engaging book focuses on the prospects for the development of the Southern European countryside during a transitional period of a major policy paradigm shift Bringing together case studies from Portugal Spain France Italy and Greece the book discusses the key issues mentioned above as well as the restricting factors and prospects of the adjustments required The Reform of the CAP and Rural Development in Southern Europe Charalampos P. Kasimēs, George Stathakis, 2003 Taking into account Agenda 2000 and the ongoing debate concerning the CAP reforms this engaging book brings together important case studies to focus on the prospects for the development of the Southern European countryside

Power and Gender in European Rural Development Henk de Haan, 2017-11-28 Since the early 1990s new public and private actors emphasizing issues such as landscape nature environment and food safety have challenged EU rural development policies This book looks at this innovative framework and in particular the impacts of the interactions between established interests and newcomers in local power relations Specific attention has been given to the gendered nature of these processes Case studies from throughout Western Europe analyze local rural power relations and present overviews of the significance of rural gender relations The book demonstrates that traditional and new forms of social organization in rural areas create new forms of political participation Changing forms of social capital and political participation not only influence the relation between state and civil society but also male female relationships The book argues that the dynamics of these gendered power relations produce competing discourses which can often hinder policy making and implementation *Agriculture in Mediterranean Europe* Dionisio Ortiz Miranda, Eladio Vicente Arnalte Alegre, Ana Maria Moragues Faus, 2013-06-25 This volume illustrates and deepens the understanding of current agrarian dynamics developing in Mediterranean countries in the light of recent theoretical contributions The book compiles and analyses a set of Mediterranean case studies that show the range of transformations shaping contemporary agriculture in Southern Europe

Young People in Rural Areas of Europe Birgit Jentsch, 2017-07-05 Based on a two year European research project on policies and young people in rural development this edited volume examines these issues and compares young people's experiences of rural life in the UK Ireland Finland France Germany Austria and Portugal It reviews relevant policies and highlights not only the pressures on young people in

rural areas but also what might be done to address these issues *Rural Sustainable Development in the Knowledge Society* Dr Hilary Tovey, Dr Karl Bruckmeier, 2012-11-28 Based on the EU funded CORASON research project this volume brings together and compares studies into rural and sustainable development processes in 12 European countries In doing so it identifies key trends and reveals the changing nature of development processes on the way towards a knowledge society The book examines the differences between the preconditions and contexts relevant to rural development strategies and those relevant to sustainable development strategies It explores whether the concept goals and nature of rural development is better understood and adopted by rural actors than those of sustainable development Finally by focusing on the ideas and practices of sustainable resource management a component in both rural and sustainable development objectives it links with knowledge used by actors involved in rural development *Unravelling desertification* M. Juntti, 2023-08-28 This book analyses processes of desertification from a social science perspective and unravels the policy related to drivers of desertification Desertification is addressed both as a concept surrounded by a multitude of different discourses and as a tangible unsustainable process that is connected to a complex set of policies and changing land management practices The focus is on Southern Europe where desertification has been a long standing problem in many areas and where in some places the loss of productive capacity has worsened considerably over the last few decades By focusing on four specific case study areas in Portugal Spain Italy and Greece the scope of the book will cover the human dimension of desertification exploring in particular how the framework of existing policies has affected land management decisions and desertification processes The emphasis will be on how policies may have contributed to desertification alleviation and mitigation as well as to a worsening of desertification processes By using an actor network approach the book specifically investigates the importance of networks of actors that shape the nature and direction of policies that affect desertification processes In this sense this book aims at providing a first glance into the complex policy economic and socio cultural networks that operate at the local regional and national levels in areas of Southern Europe affected by desertification and to analyse how these networks hinder or promote the implementation of policies aimed at alleviating the threat of desertification With its broad remit this exciting book will appeal to many different audiences not only including academics and students of various disciplines but also practitioners at the local regional Mediterranean and international e g EU spatial levels in a variety of fields such as environmental and agricultural policy making agricultural extension services farming organisations environmental NGOs media representatives and many other environmental stakeholder groups **International Migration and Rural Areas** Myriam Simard, 2016-04-22 While immigrants are still predominantly choosing urban areas to locate to there is now increasing evidence of immigration to rural areas which poses its own challenges for those relocating from the scarcity of high quality jobs to the provision of public and private services Addressing the shortcomings in current research this book employs an innovative approach by exploring this relationship from a cross national comparative global perspective It draws

lessons from case studies across a range of geographical and political contexts including Canada the USA Ireland Scotland Greece and Russia Bringing together migration experts from a range of academic disciplines International Migration and Rural Areas contributes to conceptual developments and also identifies policy concerns which can be pursued at national sub national and supra national levels As such it will appeal to policy makers as well as scholars across a range of disciplines including geography politics demography social policy sociology and anthropology *Environmental Challenges in the Mediterranean 2000-2050* Antonio Marquina Barrio, 2004-02-29 This book addresses six key factors that will affect environmental policies in the Mediterranean region during the next fifty years population growth climate change soil erosion and desertification water scarcity food production and urbanization and pollution The authors assess these as potential sources of violent conflict The interdisciplinary approach makes this a relevant and useful reference for a broad range of professionals specialists and researchers *Southern Europe in the Mediterranean Context* Eric Vaz, 2020-01-15 Since the process of Southern Europe s integration in the European Union the Mediterranean region has seen a more considerable gap between central and northern European countries and its Southern European counterpart Thus in a European context of social cohesion it becomes necessary to better understand Southern Europe without escaping to the common perception of the complexity of Mediterranean culture As a significant player throughout history Southern Europe consistently established a platform of diversity and freedom bringing peace between different historic cultural traditions Moreover the southern frontier of Europe to Africa and Asia has become a crucial determinant in the current times of change
