Reform and Growth Ajay Chhibber, R. Kyle Peters, Barbara J. Yale, 2017 Although the quest for growth remains as elusive as it was more than a decade ago there is now much greater consensus on the policies and institutional changes that are needed to foster growth and economic development But debate continues on the timing sequencing and local adaptation of these reforms Furthermore although the benefits of reform are well documented the reasons as to why and when reforms occur still remain somewhat unclear Many countries go through long periods of stagnation or even decline without being able to create an environment for change while others seem able to break the hold of vested interests and start following paths of reform In October 2004 the Operations Evaluation Department OED of the World Bank held a conference on the Effectiveness of Policies and Reform This event provided a forum at which participants over 500 government officials civil society representatives and World Bank staff could discuss how to improve the effectiveness of World Bank support for development policies and reform programs Included in this volume are the contributions of distinguished development practitioners on issues such as the links between good performance and policy change how windows of opportunity can best be used to promote reform how ownership of policies and reform programs can be encouraged and how developed country policies can be improved to create a better global environment for development Provided by publisher

The Political Economy of Macroeconomic Policy Reform in Latin America Eduardo Wiesner, 2009-01-01 This book is a must read for anyone interested in policy reforms in Latin America The author combines tremendous experience in the field and deep knowledge of economic theory a rare combination Alberto Alesina Harvard University US One of the key contributions of this book is its insistence on the importance of policy institutional and political accountability for evaluating and enhancing macroeconomic performance and for reducing inequality John B Taylor Stanford University and Hoover Institution US Dr Wiesner combines a command of modern political and economic theories and detailed knowledge of Latin America to clarify why reform of policies and institutions has proved so difficult in that region His general conclusion is that initial conditions of inequality and poverty reduce the demand for reform but he finds that the process manifests itself differently in different countries He identifies several necessary conditions for breaking out of these vicious circles Scholars and practitioners alike can learn from his impressively thorough and detailed analysis Avinash K Dixit Princeton University US This book argues insightfully that underdevelopment is the result of the political economy difficulties some countries have in the effectiveness of public expenditures in general and of social pro poor expenditures in particular The policy implication is that reform strategies should focus on identifying the wrong political incentives in public expenditures Ricardo Hausmann Harvard University US Eduardo Wiesner's book makes an important contribution to the understanding of development by blending together the interdependent issues of i macroeconomic performance and volatility ii equity and distributive justice iii fiscal deficits and the redistributive effectiveness of social public expenditures and iv the demand for the right institutions and for policy reform in Latin America It does this by examining recent macroeconomic crises from a political economy perspective and finds that information is the critical algorithm that links together the demand for macroeconomic stability macroeconomic performance and ultimately distributive justice This volume is geared toward those interested in the political economy of development and policy reform in general and in Latin America including academics policy makers and the general reader

Rana, Wai-Mun Chia, 2017-12-28 Jumpstarting South Asia focuses on the slowing pace of economic growth and makes the case for a two pronged strategy to jumpstart South Asian economies South Asian countries should complete the economic reform process that they had begun in the 1980s and the early 1990s and implement the more microeconomic reforms namely the sectoral and governance and institutional reforms to enhance competition and improve the operation of markets They should also implement the second round of Look East policies or LEP2 to link themselves to production networks in East Asia their fastest growing market and develop production networks in manufacturing and services within their region This book argues that the proposed strategy will lead to a win win situation for all countries in South Asia and East Asia and also reinvigorate economic integration within South Asia The book identifies the remaining policy agenda for each South Asian country
