## **Reform Of Time Magic And Modernity:**

**The Reform of Time** Maureen Perkins, 2001-03-20 Perkins communication and cultural studies Curtin U of Technology challenges the idea that the decline of magic is the result of the rise of scientific knowledge and the spread of education She argues that 19th century marginalization of superstition is part of a social history of time management In the course of her discussion she relates differing concepts of time to colonial discourse surveys technological developments in the calculation of time and assesses the role of popular beliefs in astrology books of fate and prophetic dreaming Distributed by Stylus Annotation copyrighted by Book News Inc Portland OR The Magical Imagination Karl Bell, 2012-02-23 Innovative history of the popular magical imagination and ordinary people's experience of urbanization in nineteenth century England

*Magical Thinking* Stuart McWilliams, 2011-12-08 Examining how scholarly writing has contended or conspired with discourses of enchantment from the Middle Ages to the present New Perspectives in British Cultural History Rosalind Crone, David Gange, Katy Jones, 2021-03-04 This book is composed of a selection of papers presented at a conference in Cambridge in December 2005 Cultural history is a relatively new sub discipline Over the past few decades it has become increasingly apparent that a new generation of historians has emerged These scholars have become concerned with research sources and questions traditionally beyond the scope of the discipline of history Indeed recent monographs in history have demonstrated a growing awareness of the cultural imagination in analyses of patterns of change and continuity in the past Such a movement has also encouraged the development of new networks between different disciplines in the Arts and Social Sciences The authors of these chapters come from a wide range of academic backgrounds While all are concerned with crucial issues of the past they represent a substantial variety of disciplines In addition to the historians are those trained and working in literary studies art history design music and science As early career scholars the research they present is cutting edge these contributions represent the very latest trends in cultural studies and demonstrate the attempts of new researchers to answer the most current and challenging questions that are being proposed in this field **Making Magic** Randall Styers, 2004-01-15 Since the emergence of religious studies and the social sciences as academic disciplines the concept of magic has played a major role in defining religion and in mediating the relation of religion to science Across these disciplines magic has regularly been configured as a definitively non modern phenomenon juxtaposed to distinctly modern models of religion and science Yet this notion of magic has remained stubbornly amorphous In *Making Magic* Randall Styers seeks to account for the extraordinary vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that He argues that this persistence can best be explained in light of the Western drive to establish and secure distinctive norms for modern identity norms based on narrow forms of instrumental rationality industrious labor rigidly defined sexual roles and the containment of wayward forms of desire Magic has served to designate a form of alterity or deviance against which dominant Western notions of appropriate religious piety legitimate scientific rationality and orderly

social relations are brought into relief Scholars have found magic an invaluable tool in their efforts to define the appropriate boundaries of religion and science On a broader level says Styers magical thinking has served as an important foil for modernity itself Debates over the nature of magic have offered a particularly rich site at which scholars have worked to define and to contest the nature of modernity and norms for life in the modern world *On Time* On Barak,2013-07-19 In this pioneering history of transportation and communication in the modern Middle East On Barak argues that contrary to accepted wisdom technological modernity in Egypt did not drive a sense of time focused on standardization only Surprisingly the introduction of the steamer railway telegraph tramway and telephone in colonial Egypt actually triggered the development of unique timekeeping practices that resignified and subverted the typical modernist infatuation with expediency and promptness These countertempos predicated on uneasiness over dehumanizing European standards of efficiency sprang from and contributed to non linear modes of arranging time Barak shows how these countertempos formed and developed with each new technological innovation during the nineteenth and early twentieth centuries contributing to a particularly Egyptian sense of time that extends into the present day exerting influence over contemporary political language in the Arab world The universal notion of a modern mechanical standard time and the deviations supposedly characterizing non Western settings from time immemorial On Time provocatively argues were in fact mutually constitutive and mutually reinforcing

**The colonisation of time** Giordano Nanni,2020-10-20 The Colonisation of Time is a highly original and long overdue examination of the ways that western European and specifically British concepts and rituals of time were imposed on other cultures as a fundamental component of colonisation during the nineteenth century Based on a wealth of primary sources it explores the intimate relationship between the colonisation of time and space in two British settler colonies Victoria Australia and the Cape Colony South Africa and its instrumental role in the exportation of Christianity capitalism and modernity thus adding new depth to our understanding of imperial power and of the ways in which it was exercised and limited All those intrigued by the concept of time will find this book of interest for it illustrates how western European time s rise to a position of global dominance from the clock to the seven day week is one of the most pervasive enduring and taken for granted legacies of colonisation in today s world The Cambridge History of Magic and Witchcraft in the West David J. Collins, S. J.,2015-03-02 This book presents twenty chapters by experts in their fields providing a thorough and interdisciplinary overview of the theory and practice of magic in the West Its chronological scope extends from the Ancient Near East to twenty first century North America its objects of analysis range from Persian curse tablets to US neo paganism For comparative purposes the volume includes chapters on developments in the Jewish and Muslim worlds evaluated not simply for what they contributed at various points to European notions of magic but also as models of alternative development in ancient Mediterranean legacy Similarly the volume highlights the transformative and challenging encounters of Europeans with non Europeans regarding the practice of magic in both early modern colonization and more recent

decolonization     Nostradamus Stéphane Gerson, 2012-10-30 We all know the name Nostradamus but who was he really Why did his predictions become so influential in Renaissance Europe and then keep resurfacing for nearly five centuries And what does Nostradamus's endurance in the West say about us and our own world In Nostradamus How an Obscure Renaissance Astrologer Became the Modern Prophet of Doom historian Stéphane Gerson takes readers on a journey back in time to explore the life and afterlife of Michel de Nostredame the astrologer whose Prophecies have been interpreted adopted by successive media and eventually transformed into the Gospel of Doom for the modern age Whenever we seem to enter a new era whenever the premises of our worldview are questioned or imperiled Nostradamus offers certainty and solace In 1666 guests at posh English dinner parties discussed his quatrain about the Great Fire of London In 1942 the Jewish writer Irène Némirovsky latched her hopes for survival to Nostradamus prediction that the war would soon end And on September 12 2001 teenagers proclaimed on the streets of Brooklyn that this guy Nostradamus had seen the 9/11 attacks coming Through prodigious research in European and American archives Gerson shows that Nostradamus a creature of the modern West rather than a vestige from some antediluvian era tells us more about our past and our present than about our future In chronicling the life of this mystifying figure and the lasting fascination with his predictions Gerson's book becomes a historical biography of a belief the faith that we can know tomorrow and master our anxieties through the powers of an extraordinary but ever more elusive seer     The Spectralities Reader Maria del Pilar Blanco, Esther Peeren, 2013-08-29 The Spectralities Reader is the first volume to collect the rich scholarship produced in the wake of the spectral turn of the early 1990s which saw ghosts and haunting conjured as compelling analytical and methodological tools across the humanities and social sciences Surveying the past twenty years from an interdisciplinary and cross cultural perspective the Reader displays the wide range of concerns spectrality in its diverse elaborations has been called upon to elucidate The disjunctions produced by globalization the ungraspable quality of modern media the convolutions of subject formation in terms of gender race and sexuality the elusiveness of spaces and places and the lingering presences and absences of memory and history have all been reconceived by way of the spectral A primer for the wide readership engaged with cultural interpretations of ghosts and haunting that go beyond the confines of the fictional and supernatural The Spectralities Reader includes twenty five groundbreaking texts by prominent contemporary thinkers from Jacques Derrida and Gayatri Spivak to Avery Gordon and Arjun Appadurai as well as a general introduction and six section introductions by the editors
