Regarding Politics Essays On Political Theory Stability And Change:

Regarding Politics Harry Eckstein, 2021-01-08 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992 New Directions in Quantitative Comparative Sociology, 2021-10-18 The comparative method is at the core of sociological inquiry and gained new importance emphasis and practitioners particularly after the second world war as a consequence of a large variety of international and global scale developments The contributions to this book regard nations or countries as contextual units of analysis and treat them as variables Theoretical explanations are presented of how social phenomena are systematically related to characteristics of the nation states and these explanations are tested empirically using the qualitative tools of mainstream sociology The chapters in this book can be useful to a broad audience and a range of social scientists who are interested in the understanding of contemporary social phenomena that are no longer limited to national borders but that are transnational or of a global order Contributors are Toril Aalberg Wil Arts Carole B Burgoyne Loek Halman Piet Hermkens Guillermina Jasso Mebs Kanji James R Kluegel Ola Listhaug David S Mason Petr Mat ju Neil Nevitte Thorleif Pettersson David A Routh Svetlana Sidorenko Stephenson Johan Verweij Bernd Wegener and Peter Van Wijck *Toward a Credible Pacifism* Dustin Ells Howes, 2010-07-02 Advocates of pacifism usually stake their position on the moral superiority of nonviolence and have generally been reluctant or unwilling to concede that violence can be an effective means of conducting politics In this compelling new work which draws its examples from both everyday experience and the history of Western political thought author Dustin Ells Howes presents a challenging argument that violence can be an effective and even just form of power in politics Contrary to its proponents however Howes argues that violence is no more reliable than any other means of exercising power Because of this there is almost always a more responsible alternative He distinguishes between violent and nonviolent power and demonstrates how the latter can confront physical violence and counter its claims This brand of pacifism gives up claims to moral superiority but recuperates a political ethic that encourages thoughtfulness about suffering and taking responsibility for our actions Cuba and the Politics of Passion Damián J. Fernández, 2010-01-01 Cuban politics has long been remarkable for its passionate intensity and yet few scholars have explored the effect of emotions on political attitudes and action in Cuba or elsewhere This book thus offers an important new approach by bringing feelings back into the study of politics and showing how the politics of passion and affection have interacted to shape Cuban history throughout the twentieth century Damián Fernández characterizes the politics of passion as the pursuit of a moral absolute for the nation as a whole While such a pursuit rallied the Cuban people around charismatic leaders such as Fidel Castro Fernández finds that it also set the stage for disaffection and disconnection when the grand goal never fully materialized At the same time he reveals

how the politics of affection taking care of family and friends outside the formal structures of government has paradoxically both undermined state regimes and helped them remain in power by creating an informal survival network that provides what the state cannot or will not

Elections in Japan, Korea, and Taiwan under the Single Non-Transferable Vote Bernard Norman Grofman, Sung-Chull Lee, Edwin Winckler, Brian Woodall, 2010-09-22 In recent years there has been a marked resurgence of interest in the effects of electoral laws on important aspects of politics such as party competition In this volume a distinguished group of scholars looks at the impact of one set of electoral rules the single non transferable vote on electoral competition in Japan Korea and Taiwan Under this plan citizens are allowed one vote even though there is more than one seat to be filled In comparative studies of the adoption and rejection of the single nontransferable vote and the consequences of its use across different settings the contributors explore the differences in the operation and effects of the application of the same rule in different countries Arguing that any single feature of a political system is embedded in a political structure and cannot be understood in isolation the authors demonstrate how the same rule can have different consequences depending on the context in which it operates The contributors offer fresh insights into the comparative study of political institutions as well as into the operation of particular electoral rules In addition to the editors the contributors include Kathleen Bawn John Boland Jean Marie Bouissou Gary Cox John Fu Sheng Hsieh Arend Lijphart Emerson Niu Steven R Reed and Frances Rosenbluth among others Bernard Grofman is Professor of Political Science University of California at Irvine Edwin A Winckler is at the East Asian Institute Columbia University Brian Woodall is Assistant Professor in the School of International Affairs Georgia Institute of Technology Sung Chull Lee is Assistant Professor of Political Science University of California at Irvine

Democracy and Institutions Markus M. L. Crepaz, Thomas Albert Koelble, David Wilsford, 2010-06-08 Institutions are the channels of political power This volume explores Arend Lijphart s life work the design of political institutions All the contributors to this volume share the fundamental insight that the design of political institutions matters in how democracies work The essays in this volume offer both theoretical insights into the context and implications of Lijphart s ideas and empirical exploration of the ideas Two chapters by Thomas Koelble and Andrew Reynolds examine and apply Lijphart s insights to South Africa while another study by Jack Nagel explores the fascinating institutional changes taking place in New Zealand Essays by Bernard Grofman and Rein Taagepera examine Lijphart s work from a theoretical perspective and place Lijphart s work in the wider neo institutionalist school of thought Milton Esman applies the principle of power sharing to mobilized communities not only in democratic societies but also to those which are governed by authoritarian rule Bingham

Powell offers an empirical approach to the crucial question of the connection between political institutions and responsiveness of policy makers Markus M L Crepaz and Vicki Birchfield argue that in this age of globalization countries with consensual political institutions will not only systematically refract the pressures of globalization but will be able to absorb the domestic consequences of globalization more successfully than majoritarian countries Finally Arend Lijphart responds to the arguments made in these essays extending and adding novel concepts and insights to his conceptual framework The book will be of interest to political scientists lawyers and sociologists who study institutions the impact of electoral systems and constitutional design In addition those who study globalization will be attracted by the relevance of domestic political institutions and their refractory effects as the tides of globalization wash against the domestic shores Markus M L Crepaz is Associate Professor of Political Science University of Georgia Thomas A Koelble is Associate Professor of Political Science University of Miami David Wilsford is President and Professor the Institute for American Universities

Suleiman, 2013-11-26 For every citizen of the world there is no more urgent issue than the spread of democracy Democracy is what the WTO protestors are calling for it s the main concern of human rights advocates and it s only long term way to end terrorism But how does democracy spread What can be done to encourage and support This remarkable new collection brings together some of the best minds in variety of fields to discuss the conditions that promote and sustain or undermine and extinguish democratic institutions and ideas Spanning political thought from ancient Athens to contemporary sub Saharan Africa the contributors develop an outline of how democracy develops Several key factors emerge Democratic transitions are always heavily shaped by the ideas and practices of past regimes like tribal traditions in Africa international political and economic pressure to liberalize as in Asia and current economic conditions The quality of democracy is almost always improved by the elimination of religion as the center of the state by the move from democracy as protection of the individual from the state to democracy as enhancer of rights and by the progression from a focus on the individual to a focus on the community Expansive in its coverage and fundamental in its significance *The Making and Unmaking of Democracy* is a volume to learn from argue against and expand upon
