The Making of Visual News Thierry Gervais, Gaëlle Morel, 2020-09-23 The Making of Visual News sets out to show how photography has changed the way we read report and sell the news It investigates how photographs first became news images at the end of the nineteenth century and how magazines in the USA the UK France and Germany have put them to use ever since Drawing on a wide selection of images author Thierry Gervais in collaboration with Gaëlle Morel analyses news photographs in the context of their original presentation in print Highly illustrated the book contains 85 full colour magazine layouts and spreads offering the reader a view of how photographs were and are used in print publications including Life Picture Post the Berliner Illustrierte Zeitung and VU It examines how photographs were employed to attract new readers throughout the twentieth century arguing that photography was the main tool by which news editors sought to communicate the news and attract a broader readership Looking beyond the roles of photographer and journalist this study also highlights the contributions of picture editors and artistic directors by commissioning photographs and incorporating images into magazine layouts these figures played critical but often overlooked roles in the construction of visual news even as they crafted unique styles for their publications Charting changes in technology and reportage as well as broader social and political histories The Making of Visual News offers new insight into the history of photojournalism making this an essential resource for students and scholars of photojournalism and the history of photography media and culture

History of Photography Laurent Roossens, 1994 **Robert Lebeck, Fotoreportagen** Karl Steinorth, 1993 **Photohistorica**, 1990 **Photographic Literacy** Katherine M. H. Reischl, 2018-12-15 Photography introduced to Russia in 1839 was nothing short of a sensation Its rapid proliferation challenged the other arts including painting and literature as well as the very integrity of the self If Leo Tolstoy and Fyodor Dostoevsky greeted the camera with skepticism in the nineteenth century numerous twentieth century authors welcomed it with a warm embrace As Katherine M H Reischl shows in *Photographic Literacy* authors as varied as Leonid Andreev Ilya Ehrenburg and Alexander Solzhenitsyn picked up the camera and reshaped not only their writing practices but also the sphere of literacy itself For these authors a single photograph or a photograph as illustration is never an endpoint their authorial practices continually transform and

animate the frozen moment But just as authors used images to shape the reception of their work and selves Russian photographers including Sergei Prokudin Gorsky and Alexander Rodchenko used text to shape the reception of their visual work From the diary to print the literary word imbues that photographic moment with a personal life story and frames and reframes it in the writing of history In this primer on photographic literacy Reischl argues for the central place that photography has played in the formation of the Russian literary imagination over the course of roughly seventy years From image to text and back again she traces the visual consciousness of modern Russian literature as captured through the lens of the Russian author photographer

Photography and Doubt Sabine T. Kriebel,Andrés Mario Zervigón,2016-11-25 Recent decades have seen photography's privileged relationship to the real come under question Spurred by the postmodern critique of photography in the 1980s and the rise of digital technologies soon thereafter scholars have been asking who and what built this understanding of the medium in the first place Photography and Doubt reflects on this interest in photography's referential power by discussing it in rigorously historical terms How was the understanding of photographic realism cultivated in the first place What do cases of staged and manipulated photography reveal about that realism's hold on audiences across the medium's history Have doubts about photography's testimonial power stimulated as much knowledge as its realism Edited by Sabine T Kriebel and Andrés Mario
