China's Economic Development Strategies: Transformation And Innovation Rui Liu, 2020-04-28 China is a powerful engine of the global economy and the country s rise is undoubtedly the outcome of its protracted campaign of designing and implementing national development strategies since the founding of the People s Republic of China in 1949 This book reviews the transformation and innovation of China s economic development strategies especially Deng Xiaoping s Three Step strategy and Xi Jinping s internal and external strategies By introducing the concept of strategic paradigm it analyzes the theoretical basis of myriads of economic development strategies and predicts China s choice With the evolutionary process and the outstanding problems in national development planning as the main thread it discusses the improvement of

the national planning system specifically of the national overall planning system the regional planning system the interplay and conflict between regional planning It also studies the reform of city county planning system major function oriented zones MFOZs and planning legislation and institutionalization It also attempts to put forward proposals to coordinate the interests of planning departments and make different types of planning at different administrative levels compatible

Regional Planning Kanan Chatterjee, 2017-01-01 Region according to the eminent geographers is economically the most gainful administratively the most convenient sectoral and spatial unit where planning is a mere process economic growth is a mere outcome and general welfare is the ultimate goal Whether they were large or small these regions provided the framework for determinist research on the man environment relationship To speak of a region is to understand its past to grasp the attachment to explain its economic political and social functioning in a local and world context it is to address the prospects for its future The regional planner while visualizing the spatial processes attempt to identify the flows that reflect interdependence among the spatial units in terms of economic activities that bind them Thus it is possible to identify in the interrelated spatial sub systems one which acts as the dominant over the others the development of this type of spatial system could be explained in economic terms by factors such as transport cost economics of scale and agglomeration while the core one emerges as the dominant highest order pole in a hierarchical structure of spatial system For cities and towns planning issues are of two general kinds First there is a need to think ahead to accommodate the city's growth deciding which lands should be built on and when and whether they should be used for residential development for industry or for some more specialized function such as a shopping centre or playing fields Besides definition concept scope objectives and content of regional planning basic principles aspects planning development strategies theories of regional growth and case studies have been emphasized in this study At present the techniques in relation to R S and G I S are widely utilized for the delineation of areal units or regions for planning purposes Various data sets of the area are often used for interpreting and unifying them within G I S and Image Processing environment and analyzing the given data for identifying and delineating the prospective area that may be industrial agricultural urban etc within the selected study area In fact this book identifies many such aspects of development in regional planning which are found to be relevant not only in the present day context but also for the days ahead *India's Economic Development Strategies 1951-2000 A.D.* J.N. Mongia, 2012-12-06 It has been often said even by dispassionate observers that our economic policies built on ideological considerations and economic assumptions are far removed from the realities of our situation For more than three decades we have been striving to design an economic policy and a planning procedure that are distinctly Indian but the effort has often resulted in only mixing and merging borrowed ideas and experiences However whatever may have been the ideological elements influencing the thinking on economic policies in the formative period of the pre independence days the situation has changed considerably in the actual formation of economic policies since Independence and the effort has been not to be too closely identified with any

ideology but to work out a policy that will draw upon all these ideological positions To what extent we have succeeded required a detailed examination Accordingly I brought out a few years ago a treatise on India s Economic Policies which continues to be extremely popular with the intellectual elite the world over In this the learned contributors dwelt at length on the different aspects of India s Economic Policies from 1947-77 and brought out the strength and weaknesses of the Indian economic scene The present work on India s Economic Development Strategies is born out of the conviction that what India needs now is a set of strategies which are a consistent set of policies and that there is an urgent need for the same in Indian Planning
