Studies MECAS in 1947 The knowledge that a western government was taking pains to teach its citizens Arabic and inform them of Arab history society and religion made the Arabs suspicious The success of MECAS in producing specialists who were the envy of other governments produced doubt and anxiety The power of MECAS to attract British but also foreign diplomats and businessmen should have made it a profitable enterprise instead there was constant penny pinching and reluctance to invest In retrospect it looks like an excellent idea developed by improvisation through its early troubles which was then allowed to die in its prime Was it yet another example of a British invention unexploited **Free Radical** Tony Benn,2004-01-06 In 2001 Tony Benn one of the most influential socialist politicians in Europe retired from the British House of Commons after almost 50 years in politics to devote more time to politics One of the ways in which he carried out his resolution was to write a series of weekly columns for the Morning Star a British socialist daily newspaper These columns reflect the breadth of Benn s political concerns covering both domestic and international politics and the best of them have been collected here Benn writes with a controlled passion about the Labour party old and new the threats to democracy and the need for a viable protest movement and the events and repercussions of September 11 2001 **Oil and the Arab-Israeli Conflict, 1948-1963** U. Bialer,1998-11-08 Bialer focuses on Israel s attempts to ensure a regular oil supply in the first decade of its existence He reveals that its main problems derived from the context of the Arab Israeli conflict which categorically influenced the stand of governments and international oil companies who held the keys to decision making The author provides an analysis of the reciprocal relations between Israel and these players and clarifies the unique method which the state adopted in attempting to secure its oil supply **Oil and the Economy of Russia** Nat Moser,2017-10-20 This book examines the development of the Russian economy from tsarist times to the present through the lens of the oil industry It considers the role of the state business state relations foreign participation enterprise performance and technology Besides providing much rich detail on the changing nature of the oil industry the book also puts forward important conclusions including the fact that in the late nineteenth century private enterprise rather than the state was the principal driver of economic development and that after the collapse of the Soviet Union incumbent managers were more effective in running their companies than financier entrants whose main concern was short term gain
