Russian Nuclear Shield From Stalin To Yeltsin The Cold War And Beyond:

The Russian Nuclear Shield from Stalin to Yeltsin J. Mathers, 2000-08-09 This book makes extensive use of Soviet sources to provide the first full analysis of Moscow's ballistic missile defence policy from its origins to the most recent post Soviet developments It considers the Soviets motivations for pursuing an anti ballistic missile capability and the extent of their success and reveals that ballistic missile defence policy was used by every political leadership from Krushchev to Yeltsin as a means of sending signals about Moscow's intentions to the West *Russian Foreign Policy toward Missile Defense*

Bilyana Lilly, 2014-08-21 This book is devoted to one of the central issues in U S Russian and NATO Russian relations ballistic missile defense Drawing on more than 2 000 primary sources interviews with Russian and NATO officials and a variety of Russian and Western publications this book offers an unparalleled in depth analysis of the reasons behind Russia's policy towards the construction of a U S ballistic missile defense in Europe It provides a critical assessment of the decision making mechanisms that shape Russia's position on ballistic missile defense as well as Russia's strategic relations with the United States and Russia's interaction with European and non European powers Lilly argues that contrary to Moscow's official claims during the Putin era Russian objections to the construction of ballistic missile defense in Europe have not been wholly dictated by security concerns To Russia missile defense is not purely an issue in and of itself but rather a symbol and instrument of broader political considerations At the international level the factors that have shaped Russia's response include Moscow's perception of the overall state of U S Russian relations the Kremlin's capacity to project influence and power abroad and NATO's behavior in the post Soviet space Domestically the issue of missile defense has been a facilitating instrument for strengthening Putin's regime and justifying military modernization Taken together these instrumental considerations and their fluctuating intensity in different periods prompt the Russian leadership to pursue contradictory policy approaches simultaneously On the one hand the Kremlin seeks U S cooperation while on the other hand it threatens retaliation and reinforces Russian offensive capabilities The result is Moscow's incoherence inconsistency and double speak over the issue of missile defense [Surviving the Unipolar Era](#) A.B. Abrams, 2025-01-01 On June 29 1950 the U S launched its first ever air strikes on the North Korean capital Pyongyang marking the start of what would become the longest conflict in history between two industrial powers Four decades later the end of the Cold War in 1989 and the disintegration of the Soviet Union in 1991 marked the beginning of a new phase of the conflict with a new unipolar world order centered on the power of the U S and Western world leaving North Korea in unprecedented isolation Now unsupported in its fight against a Western superpower intent on its destruction the small but technologically adept and heavily militarized East Asian state would need to adopt more radical measures to ensure its security Over the next 35 years the conflict would transform from a period of North Korean decline in the face of tremendous economic and military pressure to one of an ascent in its power and decline in the West as international order evolved past the unipolar era *Surviving the Unipolar Era* elucidates the conflict's

transformation beginning with unprecedented U S led efforts to achieve North Korea s total collapse and elimination through maximum pressure and ending three decades later with a subsiding of Pyongyang s international isolation and the modernization of its economy armed forces and nuclear deterrent A B Abrams highlights how the small state has been able to hold its own in multiple standoffs with the world s superpower successfully weather economic sanctions and prevent penetration of its information space and the implications that this has had for the country the region and the wider world He details the strong consistency in American objectives and the evolution of consensus across five separate administrations on how these should be pursued as the circumstances of the conflict transformed In the context of prevailing geopolitical economic and security trends Abrams projects the future course of the conflict including aspects such as Western difficulties coming to terms with North Korea s ascent U S policy priorities going forward and the growing opportunities that an emerging new global cold war is likely to provide Pyongyang
