Russian Military Power

Pavel K. Baev

Russian Military Power:

The Russian Military in the 21st Century Aleksei Arbatov, 1997 The very title of this monograph is quite ambiguous On the one hand only 3 years are left until the 21st century This is too short a time to forecast or propose any serious change in a huge and complicated organization like the armed forces of a great power On the other hand each century lasts 100 years and without a crystal ball it is impossible to predict the evolution of armed forces over such a long period least of all at a time of dynamic and revolutionary shifts in the world's technologies economics the geopolitical scene and the relative military balance between nations Hence in addressing the prospects for Russia's armed forces it seems realistic to discuss the future some 10-15 years ahead to 2010 This is an appropriate timeframe for the fulfillment of large cycles of economic and military development in Russia and in other major states It allows consideration of the possible realignment of principal international coalitions and it provides time to implement major weapons programs Accordingly with a timeframe of 10-15 years future trends are sufficiently imbedded in present reality to be discussed without entering the world of science fiction Present policy choices may tangibly affect developments in 10-15 years Besides as presently being considered the Russian military reform initiative is planned to proceed through its first two stages through the year 2005 What happens in that process will define how the Russian military proceeds from 2005 through 2010 the third stage of the reform initiative Within this temporal framework the following monograph discusses Russia's military alternatives appropriate to its new security requirements projected economic conditions technological capabilities and possible changes in the international situation which might affect Russia and its relationship with other major powers Even at that many issues relevant to the subject like industrial and financial projections problems of defense conversion possible advances in military technology demographic considerations the draft and mobilization have to be left out or discussed only superficially All of these issues are part of the comprehensive notion of military reform something larger than the narrow notion of reforming the armed forces In this monograph based strictly on unclassified sources the latter topic will be the subject of analysis

Russia's Military Way to the West Christopher Duffy, 2015-10-05 This book provides an historical perspective on the growth of Russian military power studying the emergence of the Russian regular army from 1700 until the end of the eighteenth century In the process he evaluates the relative importance of Western and native influences on the creation of this formidable military machine and indicates the ways in which Russian power was projected in the West The book includes general discussions of the Russian soldier the Russian officer and the rapacious Cossacks and concludes by identifying certain important continuities between the Russian past and present

The Russian Military Steven E. Miller, Dmitri Trenin, 2004-08-27 Russian military capacity remains a major consideration for global security even in the post Soviet era This book assesses today's Russian military and analyzes its possible future direction The contributors experts on the subject from both Russia and the West consider not only how Russia has built its military capacity but also the policies and doctrines that have shaped Russia's defense posture

They discuss such topics as the downsizing of the Russian military Russia's use of military power in regional conflicts and the management of Russia's nuclear weapons For more than a decade Russian leaders have struggled to formulate security and defense policies that protect Russia's borders and project Russia's influence The contributors to *The Russian Military* find that the choices Russian leaders have made have been significantly influenced by the military reforms Russia has attempted to implement since the collapse of the Soviet Union The protracted and intense debate over military reform has been and will continue to be decisive in shaping Russian military capacity

Russian Energy Policy and Military Power

Pavel K. Baev, 2012-12-06 This book examines the interplay between energy policy and security policy under Vladimir Putin and his drive to re-establish Russia's greatness Assessing the internal contradictions of this policy the book argues that Russia's desire to strengthen its role of energy security provider is undermined by its inability to secure growth in production of oil and gas Further the pressing demand to channel more resources into the military industrial complex clashes with the growing need to invest in the energy complex and the priority granted to strategic forces deprives the conventional forces of strike power and strategic mobility In conclusion the author anticipates how these contradictions could be resolved and suggests three short scenarios for Russia's continuing transition in the next decade This book will be of interest to students of Russian politics European politics and international security

Russia and Postmodern Deterrence

Stephen J. Cimbala, Peter Jacob Rainow, 2007 Russia is a post communist country struggling to adapt to the modern world economically and politically In the twenty first century Russia faces postmodern social cultural and political problems with its old policy of deterrence For Russia's political leaders and military planners three scenarios define their postmodern setting 1 the world's leading military and economic powers with the exception of China are market based economies and political democracies 2 the revolution in military affairs based on advances in information electronics and communications is driving both civil and military technology innovation and 3 the Cold War's fundamental war fighting premises such as deterrence based on nuclear weapons and on conventional armed forces organized and trained for massive wars of attrition have changed radically These points implications for future Russian strategy are profound Stephen J Cimbala and Peter Rainow argue Russia faces an increased presence of its former adversary the United States in adjacent territories an increasingly assertive NATO which includes many of Moscow's former allies and continued fighting in Chechnya Ominously China aspires to overtake Russia as the world's second ranked military power and establish its hegemony over the Pacific basin In short Russia confronts a radically new political and military world order that demands adapting to postmodern thinking about deterrence and defense The danger is that Russia realizing that it lags behind in leveraging modern technology for military purposes and that it must scrap its dependence on conscription now relies on nuclear weapons as its first line of deterrence against either nuclear or conventional attack

The Evolution of Military Power in the West and Asia Pauline Eadie, Wyn Rees, 2015-09-16 This book investigates how states in both the West and Asia have responded to multi dimensional security challenges since the end of

the Cold War focusing on military transformation Looking at a cross section of different countries this volume assesses how their armed forces have responded to a changing international security context The book investigates two main themes First how the process of military transformation in terms of technological advances and new ways of conducting warfare has impacted on the militaries of various countries These technologies are hugely expensive and the extent to which different states can afford them and the ability of these states to utilise these technologies differs greatly Second the volume investigates the social dimensions of military transformation It reveals the expanding breadth of tasks that contemporary armed forces have been required to address This includes the need for military forces to work with other actors such as non governmental agencies and humanitarian organisations and the ability of armed forces to fight asymmetric opponents and conduct post conflict reconstruction tasks The conflicts in Iraq and Afghanistan exemplified how important the relationship between technological and social transformation has become This book will be of much interest to students of strategic studies military innovation Asian politics security studies and International Relations

The Devolution of Russian Military Power Stephen M. Meyer,1995 **Russian Military Thought** Gudrun Persson,2025 Gudrun Persson introduces readers to the evolution of Russian military strategic thought from the Crimean War 1853 56 to the present day The book surveys the pivotal strategic thinkers from Dmitrii Miliutin Aleksandr Svechin and Andrei Snegarev to Makhmut Gareev Andrei Kokoshin and Valerii Gerasimov Russian military thought is understudied in the West but it is critical to fill this gap in order to avoid strategic surprise Furthermore Persson shows that military strategic thought is closely linked to Russia's existence as a state and explains patterns of Russian confrontation Strategy in Russia encompasses the broader context of foreign and domestic policy as well as the military's ties to the country's leadership Persson sheds light on Russia's self image and national identity which in turn has fundamental consequences for Russia and its neighbors The book helps readers understand the mindset of the current Russian leadership and the constraints that shape Russia's future possibilities The Russian Military Into the Twenty-first Century Stephen J. Cimbala,2001 This work attempts to clarify the major problems facing Russia's armed forces in the present and immediate future It covers threats from terrorists break away republics and threats from outside Russia's borders The book also includes political and economic problems facing the military **The Russian Armed Forces at the Dawn of the Millennium** ,2000 This anthology is an outgrowth of a conference titled The Russian Armed Forces at the Dawn of the Millennium held at the Collins Center of the Army War College's Center for Strategic Leadership from 7 through 9 February 2000 The genesis for the conference was the realization by several members of the staff of the Collins Center and Army War College faculty that the U S led NATO operation in Kosovo resulted in a significant shift of Russian views on the United States and NATO The conference also complemented our general objective of examining the changing environment in which the United States including its armed forces finds itself The conference brought together over 50 individuals from academia and the policy and intelligence communities to examine the current state

of the Russian military Focusing primarily on the socio political dimension of the military but not ignoring the military technical dimension the presentations delivered during the conference looked at Russia s domestic environment the state of the military perceived threats and Russia s capacity to generate responses to those threats DTIC web site **Russia's Military Revival** Bettina Renz,2018-04-27 Russian annexation of Crimea and the subsequent air campaign over Syria took the world by surprise The capabilities and efficiency of Moscow s armed forces during both operations signalled to the world that Russia was back in business as a significant military actor on the international stage In this cutting edge study Bettina Renz provides an in depth and comprehensive analysis of Russia s military revival under Putin s leadership Whilst the West must adjust to the reality of a modernised and increasingly powerful Russian military she argues that the renaissance of Russian military might and its implications for the balance of global power can only be fully understood within a wider historical context Assessing developments in Russian Great Power thinking military capabilities Russian strategic thought and views on the use of force throughout the post Soviet era the book shows that rather than signifying a sudden Russian military resurgence recent developments are consistent with longstanding trends in Russian military strategy and foreign policy **Soviet Military Power** Army Library (U.S.),1959 [The International Politics of Eurasia: v. 5: State Building and Military Power in Russia and the New States of Eurasia](#) S. Frederick Starr,Karen Dawisha,2024-11-01 This ambitious ten volume series develops a comprehensive analysis of the evolving world role of the post Soviet successor states Each volume considers a different factor influencing the relationship between internal politics and international relations in Russia and in the western and southern tiers of newly independent states The collapse of the Soviet Union and the discrediting of Marxism Leninism as a source of political legitimacy have prompted a search for fresh principles of political organization that will shape the nature of political culture in all the post Soviet countries This volume looks at military power and state building

Russia's Military Modernisation: An Assessment The International Institute for Strategic Studies (IISS),2020-09-29 This new IISS Strategic Dossier examines the recent development of Moscow s armed forces and military capabilities It analyses the aspirations underpinning Russia s military reform programme and its successes as well as its failures The book also provides insights into Russia s operational use of its armed forces including in the intervention in Syria the goals and results of recent state armament programmes and the trajectory of future developments This full colour volume includes more than 50 graphics maps and charts and over 70 images and contains chapters on Russia s armed forces since the end of the Cold War Strategic forces Ground forces Naval forces Aerospace forces Russia s approach to military decision making and joint operations Economics and industry At a time when Russia s relations with many of its neighbours are increasingly strained and amid renewed concern about the risk of an armed clash this dossier is essential reading for understanding the state capabilities and future of Russia s armed forces **Russian Military Reform** Carolina Vendil Pallin,2008-08-29 This book examines reform of the Russian military since the end of the Cold War It explores the legacy of the Soviet era explaining

why at the time of the fall of the Soviet Union radical reform was long overdue in the wake of changing military technology new economic and political realities and the emergence of new threats and challenges It discusses the problems encountered by Gorbachev in his attempts to promote military reform in the late 1980s and goes on to analyse in detail the mixed fortunes of the policies of his successors Yeltsin and Putin It describes how the onset of war in Chechnya in 1994 provided clear evidence of the weaknesses of the Russian military in modern conflicts and shows that although the Chechnya debacle did provide some impetus for reforms in the armed forces in 1997-98 the momentum was not continued under the Putin government It argues that Putin's policies of bolstering central control over all aspects of decision making has left untouched many key problems facing the Russian military including infighting between different force structures lack of transparency and independent scrutiny over defence spending and absence of consensus on the main threats to Russia and optimum force posture Moreover it argues that in his attempts to concentrate all means of control to a corrupt and inefficient Kremlin bureaucracy Putin has deprived himself of all alternative channels of independent scrutiny control and oversight thus exacerbating the problems that continue to plague the Russian military
