Barnes,2018-07-05 During and after the breakdown of the Soviet Union a wide range of competitors fought to build new political and economic empires by wresting control over resources from the state and from each other In the only book to examine the evolution of Russian property ownership in both industry and agriculture Andrew Barnes uses interviews archival research and firsthand observation to document how a new generation of capitalists gained control over key pieces of the Russian economy by acquiring debt ridden factories and farms once owned by the state He argues that although the Russian government made policies that affected how actors battled one another it could never rein in the most destructive aspects of the struggle for property Barnes shows that dividing the spoils of the Soviet economy involved far more than the experiment with voucher privatization or the scandalous behavior of a few Moscow based oligarchs In Russia the control of property yielded benefits beyond mere profits and these high stakes fueled an intense enduring and profound conflict over real assets This fierce competition empowered the Russian executive branch at the expense of the legislature dramatically strengthened managers in relation to workers created a broad array of business conglomerates and fundamentally shaped regional politics not only blurring the line between government and business but often erasing it **Journal of Economic Literature** ,2005

Lavelle Professor,2004-09-24 Emerging market stock issuance relative to GDP rose in the late twentieth century to levels that roughly matched that of advanced industrial markets Nonetheless the connection between owning shares of emerging market stock and the ability to influence the management of these firms remains fundamentally different from the analogous institutional connection that has evolved in industrial markets The reasons for the differences in emerging markets are both historical and political in nature That is local equity markets have had the objective of providing for some degree of local ownership and control of large economic entities since the late nineteenth century However local markets have operated under different global political structures since that time ranging from imperialism to world wars to sovereign developmental states to neo liberal states Shares issued under these different structures have been reconfigured over time resulting in a lack of convergence along either the Anglo American or Continental models of corporate governance The author uses a political science paradigm to explain the growth of emerging equity markets She departs from conventional economic

explanations and examines politics at the micro level of large issues of emerging market stock The second half of the book presents case studies dealing with emerging market countries in Latin America Asia Russia and Eastern Europe Africa and the Middle East The case studies connect the regional state and firm levels to detail the multiple ownership and control arrangements and to dispel the notion that mere quantitative growth of these markets will lead to a convergence in financial institutional structures along the lines of the industrial core of the world economy

Democracy After Communism Larry Diamond, Marc F. Plattner, 2002-09-23 The last quarter of the twentieth century was marked by two dramatic political trends that altered many of the world's regimes the global resurgence of democracy and the collapse of communism Was the process that brought down communism in Eastern Europe and the former Soviet Union fundamentally different from the process that gave birth to new democracies in other regions of the world Were the transitions away from communism mostly like or mostly unlike the transitions away from authoritarianism that took place elsewhere Is the challenge of building and consolidating democracy under postcommunist conditions unique or can one apply lessons learned from other new democracies The essays collected in this volume explore these questions while tracing how the countries of Eastern Europe and the former Soviet Union have fared in the decade following the fall of communism Contributors Anders slund Carnegie Endowment for International Peace in Washington D C Leszek Balcerowicz Warsaw School of Economics Archie Brown Oxford University and St Antony's College Zbigniew Brzezinski Johns Hopkins
