only by interests and tastes of the authors but also by modern tendencies in applied statistics and orientation of the given work The book contains a series of concrete proposals for improvement of statistic practice many of them are based on our experience in practical statistical activity in statistical organs of USSR and Estonia A comparability aspect of the Soviet statistic school inheriting many traditions of the worldwide known Russian school of probability theory and statistics with western statistics can be a rather interesting to the English speaking reader *Applied Mechanics Reviews* ,1994
