Russias Economic Transitions From Late Tsarism To The New Millennium:

Russia's Economic Transitions Nicolas Spulber, 2003-04-10 Russia's Economic Transitions examines the three major transformations that the country underwent from the early 1860s to 2000. The first transition under Tsarism involved the partial break up of the feudal framework of land ownership and the move toward capitalist relations. The second, following the Communist revolution of 1917, brought to power a system of state ownership and administration, a sui generis type of war economy state capitalism subjecting the economy's development to central commands. The third, started in the early 1990s and still unfolding, is aiming at reshaping the inherited economic fabric on the basis of private ownership. The three transitions originated within different settings but with a similar primary goal, namely, the changing of the economy's ownership pattern in the hopes of providing a better basis for subsequent development. The treatment's originality, impartiality, and historical breadth have cogent economic, social, and political relevance. *Oil and the Economy of Russia* Nat Moser, 2017-10-20 This book examines the development of the Russian economy from tsarist times to the present through the lens of the oil industry. It considers the role of the state, business, state relations, foreign participation, enterprise performance, and technology. Besides providing much rich detail on the changing nature of the oil industry, the book also puts forward important conclusions, including the fact that in the late nineteenth century private enterprise, rather than the state, was the principal driver of economic development and that after the collapse of the Soviet Union, incumbent managers were more effective in running their companies than financier entrants whose main concern was short-term gain.

Misinterpreting Modern Russia Bruno S. Sergi, 2011-10-27 When President Vladimir Putin ascended to the Kremlin at the end of the 1990s, he had to struggle with the after-effects of Boris Yeltsin's political agenda: outrageous corruption, endless social injustice, and deeply entrenched interests dating back to Gorbachev and beyond. From the outset, Putin saw his task as leveling out the political scenery. Discontent had been building up among ordinary Russians on these consequences of the dramatically unstable 1990s. Stabilization of the political system and cleaning up the widespread corruption were Putin's aims, and the Russian people supported him wholeheartedly. Many observers in the West were quick to condemn Putin and depict him as an authoritarian, dishonest leader who was still linked to the KGB. When asked why Russians were supporting the new Kremlin, many experts explained that it was a paradox that combined the country's supposed history of tyranny and its people's inclination towards it. These explanations shaped the West's understanding of modern Russia, and they appear to be unshakeable in cultural circles today. Bruno Sergi argues in this new study that the way to know the complete story behind how Putin's presidency has been viewed in Russia is to examine closely the hard realities that conditioned Putin's policies and responses. *Misinterpreting Modern Russia: Western Views of Putin and his Presidency* looks beyond the stereotypes to the hard logic of the 1990s and asks a range of provocative questions about the disintegration of the old Soviet empire and the extraordinary riches that have caused so much opportunity and turmoil in recent years. *Russia in the Twentieth Century*

David R. Marples,2014-01-14 The history of Russia as the natural successor to the Soviet Union is of crucial importance to understanding why communism ultimately lost out to Western democracy and the free market system David Marples presents a balanced overview of 20th century Russian history and shows that although contemporary Russia has retained many of the practices and memories of the Soviet period it is not about to revert back to the Soviet example

From Religious Empires to Secular States Birol Başkan,2014-03-26 In the 1920s and the 1930s Turkey Iran and Russia vehemently pursued state secularizing reforms but adopted different strategies in doing so But why do states follow different secularizing strategies The literature has already shattered the illusion that secularization of the state has been a unilinear homogeneous and universal process and has convincingly shown that secularization of the state has unfolded along different paths Much however remains to be uncovered This book provides an in depth comparative historical analysis of

state secularization in three major Eurasian countries Turkey Iran and Russia To capture the aforementioned variation in state secularization across three countries that have been hitherto analyzed as separate studies Birol Ba kan adopts three modes of state secularization accommodationism separationism and eradicationism Focusing thematically on the changing relations between the state and religious institutions Ba kan brings together a host of factors historical strategic and structural to account for why Turkey adopted accommodationism Iran separationism and Russia eradicationism In doing so he expertly demonstrates that each secularization strategy was a rational response to the strategic context the reformers found themselves in

Energy Security along the New Silk Road Anatole Boute, 2019-06-13 Guaranteeing energy security is one of the most complex challenges of energy law and policy Energy insecurity threatens economic development social peace and stability This book focuses on energy security in the strategically important region of Central Asia The region holds huge energy reserves but its energy systems are highly inefficient and unreliable and thus require urgent reform However endemic corruption discrimination and the strong centralization of power have so far blocked initiatives to reorganize energy supply The case of Central Asia is uniquely relevant for understanding the informal constraints on energy law and policy In addition Central Asian energy insecurity illustrates the impact of geopolitics on the regulation of energy markets The region is strategically located in Russia's sphere of influence and along China's New Silk Road Its energy situation highlights the complex interactions amongst energy law geopolitics and institutions

The Poverty of Clio Francesco Boldizzoni, 2011-07-05 The Poverty of Clio challenges the hold that cliometrics an approach to economic history that employs the analytical tools of economists has exerted on the study of our economic past In this provocative book Francesco Boldizzoni calls for the reconstruction of economic history one in which history and the social sciences are brought to bear on economics and not the other way around Boldizzoni questions the appeal of economics over history which he identifies as a distinctly American attitude exposing its errors and hidden ideologies and revealing how it fails to explain economic behavior itself He shows how the misguided reliance on economic reasoning to interpret history has come at the expense of insights from the humanities and has led to a rejection of valuable past historical research Developing a better alternative to new institutional economics and the rational choice approach Boldizzoni builds on the extraordinary accomplishments of twentieth century European historians and social thinkers to offer fresh ideas for the renewal of the field Economic history needs to rediscover the true relationship between economy and culture and promote an authentic alliance with the social sciences starting with sociology and anthropology It must resume its dialogue with the humanities but without shrinking away from theory when constructing its models The Poverty of Clio demonstrates why history must exert its own creative power on economics

Fandom, Authenticity, and Opera A. Fishzon, 2013-09-11 In Russia at the turn of the twentieth century printed literature and performances from celebrity narratives and opera fandom to revolutionary acts and political speeches frequently articulated extreme emotional states and passionate belief A uniquely intense approach to public life and

private expression the melodramatic imagination is at the center of this study Previously scholars have only indirectly addressed the everyday appropriation of melodramatic aesthetics in Russia choosing to concentrate on canonical texts and producers of mass culture Collective fantasies and affects are daunting objects of study difficult to render and almost impossible to prove empirically Music and art historians with some notable exceptions have been reluctant to discuss reception for similar reasons By analyzing the artifacts and practices of a commercialized opera culture author Anna Fishzon provides a solution to these challenges Her focus on celebrity and fandom as features of the melodramatic imagination helps illuminate Russian modernity and provides the groundwork for comparative studies of fin de siècle European popular and high culture selfhood authenticity and political theater

Japan's Economic Planning and Mobilization in Wartime, 1930s-1940s Yoshiro Miwa, 2015-01-22 Although most economists maintain a mistrust of a government's goals when it intervenes in an economy many continue to trust its actual ability They retain in other words a faith in state competence For this faith they adduce no evidence Sharing little skepticism about the government's ability they continue to expect the best of governmental intervention To study government competence in World War II Japan offers an intriguing laboratory In this book Yoshiro Miwa shows that the Japanese government did not conduct requisite planning for the war by any means It made its choices on an ad hoc basis and the war itself quickly became a dead end That the government planned for the war incompetently casts doubts on the accounts of Japanese government leadership more generally

Russian Electricity and Energy Investment Law Anatole Boute, 2015-08-11 Electricity supply plays a strategic role for Russia's economic development and for social peace As a main consumer of natural gas electricity is also of central importance for the efficient management of Russia's energy resource basis Today however the electricity sector is in an obsolete condition Investments are needed in the modernization of the infrastructure

This book analyzes the liberalization and privatization program that Russia is implementing to attract private investments in this modernization process. Taking a comparative approach, this analysis critically assesses Russian electricity law in the light of the European liberalization experience. Given the strategic importance of electricity, investors face significant risks of government intervention. This book identifies these regulatory risks and examines investment protection mechanisms under Russia's national and international investment obligations.

Christopher L. Nobbs, 2013
This text argues that the major economic problems of the present century involve issues of public goods and common pool resources with which orthodox economic theory based as it is on private markets is ill equipped to deal.
