Smith and The Fall: Art, Music and Politics Mr Benjamin Halligan, Mr Michael Goddard, 2013-01-28 This volume offers a comprehensive range of approaches to the work of Mark E Smith and his band The Fall in relation to music art and politics Mark E Smith remains one of the most divisive and idiosyncratic figures in popular music after a recording career with The Fall that spans thirty years Although The Fall were originally associated with the contemporaneous punk explosion from the beginning they pursued a highly original vision of what was possible in the sphere of popular music While other punk bands burned out after a few years only to then reform decades later as their own cover bands The Fall continue to evolve while retaining a remarkable consistency even with the frequent line up changes that soon left Mark E Smith as the only permanent member of the group The key aspect of

the group that this volume explores is the invariably creative unfailingly critical and often antagonistic relations that characterize both the internal dynamics of the group and the group's position in the pop cultural surroundings. The Fall's ambiguous position in the unfolding histories of British popular music and therefore in the new heritage industries of popular culture in the UK from post punk to anti Thatcher politics to the Factory fiction of Manchester and on into Mark E Smith's current role as ageing enfant terrible of rock illustrates the uneasy relationship between the band their critical commentators and the historians of popular music. This volume engages directly with this critical ambiguity. With a diverse range of approaches to The Fall this volume opens up new possibilities for writing about contemporary music beyond traditional approaches grounded in the sociology of music Cultural Studies and music journalism an aim which is reflected in the variety of provocative critical approaches and writing styles that make up the volume.

Sites of Popular Music Heritage Sara Cohen, Robert Knifton, Marion Leonard, Les Roberts, 2014-08-27 This volume examines the location of memories and histories of popular music and its multiple pasts exploring the different places in which popular music can be situated including the local physical site the museum storeroom and exhibition space and the digitized archive and display space made possible by the internet. Contributors from a broad range of disciplines such as archive studies popular music studies media and cultural studies leisure and tourism sociology museum studies communication studies cultural geography and social anthropology visit the specialized locus of popular music histories and heritage offering diverse set of approaches. Popular music studies has increasingly engaged with popular music histories exploring memory processes and considering identity collective and cultural memory and notions of popular culture's heritage values yet few accounts have spatially located such trends to focus on the spaces and places where we encounter and engender our relationship with popular music's history and legacies. This book offers a timely re-evaluation of such sites reinserting them into the narratives of popular music and offering new perspectives on their function and significance within the production of popular music heritage. Bringing together recent research based on extensive fieldwork from scholars of popular music studies cultural sociology and museum studies alongside the new insights of practice based considerations of current practitioners within the field of popular music heritage this is the first collection to address the interdisciplinary interest in situating popular music histories heritages and pasts. The book will therefore appeal to a wide and growing academic readership focused on issues of heritage cultural memory and popular music and provide a timely intervention in a field of study that is engaging scholars from across a broad spectrum of disciplinary backgrounds and theoretical perspectives.
