Macroeconomics ; Microeconomics : the Canadian Context, 2nd Edition. Study Guide and Workbook Alexander MacMillan,1983 **Canadiana** ,1985 *Microeconomics ; Macroeconomics : the Canadian Context, 2nd Edition. Instructor's Manual* Alexander MacMillan,1983 Canadian Books in Print ,1997 Public Administration Series--Bibliography ,1987 **An Introduction to Canadian Financial Markets** Alexander MacMillan,1989 The Microeconomics Anti-Textbook Rod Hill,Tony Myatt,2021-12-02 Mainstream textbooks present economics as an objective science free from value judgements The Microeconomics Anti Textbook demonstrates this to be a myth one which serves to make such textbooks not only off puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives In this fully updated and expanded edition of their celebrated book Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way before presenting an anti text analysis and critique Challenging the assumptions arguments and models Hill and Myatt provide the essential guide to decoding the textbooks and show that real economics is far more interesting and subversive than the simplistic version presented to students **The Economics Anti-Textbook** Rod Hill,Tony Myatt,2010-03-11 Mainstream textbooks present economics as an objective science free from value judgements that settles disputes by testing hypotheses that applies a pre determined body of principles and contains policy prescriptions supported by a consensus of professional opinion The Economics Anti Textbook argues that this is a myth one which is not only dangerously misleading but also bland and boring It challenges the mainstream textbooks assumptions arguments models and evidence It puts the controversy and excitement back into economics to reveal a fascinating and a vibrant field of study one which is more an art of persuasion than it is a science The Economics Anti Textbook s chapters parallel the major topics in the typical text beginning with a boiled down account of them before presenting an analysis and critique Drawing on the work of leading economists the Anti Textbook lays bare the blind spots in the texts and their sins of omission and commission It shows where hidden value judgements are made and when contrary evidence is ignored It shows the claims made without any evidence and the alternative theories that aren t mentioned It shows the importance of power social context and legal framework The Economics Anti Textbook is the students guide to decoding the textbooks and shows how real economics is much more interesting than most economists are willing to let on **Economics** Roy Vogt,Beverly J. Cameron,Edwin G. Dolan,1993 Resource Economics Jon M. Conrad,2010-06-14 A text for students with a background in calculus and intermediate microeconomics and a familiarity with the spreadsheet software Excel Canadian Books in Print 2002 Edited by Butler Marian,Marian Butler,2002-02 Containing more than 48000 titles of which approximately 4000 have a 2001 imprint the author and title index is extensively cross referenced It offers a complete directory of Canadian publishers available listing the names and ISBN prefixes as well as the street e mail and web addresses **Dateline Canada** Peter Kennedy,Gary Dorosh,1990 *Confidentiality, Privacy Issues* Anthony G.

White,1987 **Positive Learning in the Age of Information** Olga Zlatkin-Troitschanskaia,Gabriel Wittum,Andreas Dengel,2017-12-15 While information and communication technology has a vast influence on our lives little is understood about its effects on the way we learn In the Age of Information students consciously or not are learning in diverse formal and informal environments from a broad variety of sources with scientific knowledge competing against unfounded assertions and misinformation and biased data spreading through social and mass media The Positive Learning in the Age of Information PLATO program illustrated by the contributions in this book unites outstanding and highly innovative expertise on the fundamentals of information processing and human learning to investigate a new paradigm of positive learning as a vital morally and ethically oriented approach which is of existential importance to maintaining the civilization standards of a modern society in the digital age **Applied Welfare Economics** Massimo Florio,2014-02-05 What is the effect of a new infrastructure on the well being of a local community Is a tax reform desirable Does the privatization of a telecommunication provider increase social welfare To answer these questions governments and their policy advisors should have in mind an operative definition of social welfare and cannot rely on simple official statistics such as GDP The price we observe are often misleading as welfare signals and costs and benefits for the society should be based on shadow prices revealing the social opportunity costs of goods and of changes of the world This book explains how to apply these welfare economics ideas to the real world After a theoretical discussion of the concept of social welfare a critical analysis of the traditional doctrine of welfare economics embodied in the Two Fundamental Theorems and a presentation of social cost benefit analysis the book introduce the readers to an applied framework This includes the empirical estimation of shadow prices of goods of the social cost of labour and capital the assessment of risk This book also includes the state of the art of international experience with CBA including ex post evaluation of major projects economic rates of return in different sectors and a case study on privatisation is presented This book offers a unique and original blend of theory empirics and experience The theoretical discussion clarifies why shadow prices are not virtual market equilibrium prices as they arise as the solution of a planning problem often with governments and economic agents constrained in their information and powers The empirical chapters show how to compute proxies of the shadow prices in simple ways The experience chapters draw from first hand research gained by the Author and his collaborators over many years of advisory work for the European Commission and other international and national institutions **Needs and Limits** Frank Martin Rotering,2009-11 Humankind faces two formidable challenges in the 21st century rapid ecological decline and continuing world poverty The author argues that both problems are rooted in our economic concepts which for the past 500 years have been powerfully shaped by the reality and ideology of capitalism We must now develop a new mode of economic thought to guide us through the profound changes required to achieve sustainable and global well being To this end the author proposes a set of terms concepts and analytical tools that are collectively known as the Economics of Needs and Limits or ENL Unlike conventional economic theories which

explain how an economy functions ENL is a set of guiding principles that permits analysts to establish rational economic objectives Such a framework is a requirement for moving our civilization beyond destructive growth and into the equitable post expansionary stage of its evolution **A New Public Management in Mexico** Esteban Moctezuma Barragán, Andrés Roemer, 2017-09-20 This title was first published in 2001 This innovative text applies new institutional economics public choice theory and new public management concepts to the political arena of the Mexican administration Including cutting edge benchmarking analysis about best practices of human resources and the modernization of the public sector the book also considers the history and situation of other countries from the Mexican perspective especially those of Latin America and the OECD An essential text for all those with an interest in public policy or Latin American politics American Book Publishing Record ,2003 *The British Library General Catalogue of Printed Books 1976 to 1982* British Library,1983

The Moralization of the Markets Christoph Henning, 2017-07-12 Nothing affects the modern economy and society more than decisions made in the market place especially but not only decisions made by consumers Although it is not startling to suggest that decisions made in production are affected by choices consumers make consumers have long been viewed not only by academic economists as individual isolated rational actors that make or refrain from purchases purely on the basis of narrow financial considerations Markets are not and never were morally neutral Market relations have always had an often taken for granted moral underpinning The moralization of the markets refers to the dissolution and replacement of the conventional moral underpinnings of market conduct for example in the music market financial markets and corporate governance It further implies not only the heightened importance of new ethical precepts but the significant change in the role of moral ideals in market behavior These profound transformations of economic conduct are accompanied and co determined by societal conflicts The moralization of markets represents thus a new stage in the social evolution of markets The book is divided into four parts in which the twelve chapters written by contributors from different social science disciplines deal with the context of the moralization of the markets the major social institutions and present case studies that examine European and American attitudes and behavior towards tobacco and GMO expansion of the private and ethics in business and how workers respond to the new corporate norms This volume will be of interest to sociologists economists social scientists and the general consumer alike
