Migrants And Identity In Japan And Brazil The Nikkeijin:

Migrants and Identity in Japan and Brazil Daniela de Carvalho, 2003-08-27 Economic and social difficulties at the beginning of the 20th century caused many Japanese to emigrate to Brazil. The situation was reversed in the 1980s as a result of economic downturn in Brazil and labour shortages in Japan. This book examines the construction and reconstruction of the ethnic identities of people of Japanese descent firstly in the process of emigration to Brazil up to the 1980s and secondly in the process of return migration to Japan in the 1990s. The closed nature of Japan's social history means that the effect of return migration can clearly be seen. Japan is to some extent a unique sociological specimen owing to the absence of any tradition of receiving immigrants. This book is first of all about migration but also covers the important related issues of ethnic identity and the construction of ethnic communities. It addresses the issues from the dual perspective of Japan and Brazil. The findings suggest that mutual contact has led neither to a state of conflict nor to one of peaceful coexistence but rather to an assertion of difference. It is argued that the Nikkeijin consent strategically to the social definitions imposed upon their identities and that the issue of the Nikkeijin presence is closely related to the emerging diversity of Japanese society.

Transnational Faiths Hugo Córdova Quero, Rafael Shoji, 2016-02-17 Japan has witnessed the arrival of thousands of immigrants since the 1990s from Latin America especially from Brazil and Peru. Along with immigrants from other parts of the world they all express the new face of Japan: one of multiculturalism and multi-ethnicity. Newcomers are having a strong impact in local faith communities and playing an unexpected role in the development of communities. This book focuses on the role that faith and religious institutions play in the migrants' process of settlement and integration. The authors also focus on the impact of immigrants' religiosity amidst religious groups formerly established in Japan. Religion is an integral aspect of the displacement and settlement process of immigrants in an increasingly multi-ethnic, multicultural and pluri-religious contemporary Japan. Religious institutions and their social networks in Japan are becoming the first point of contact among immigrants. This book exposes and explores the often missed connection of the positive role of religion and faith-based communities in facilitating varied integrative ways of belonging for immigrants. The authors highlight the faith experiences of immigrants themselves by bringing their voices through case studies, interviews and ethnographic research throughout the book to offer an important contribution to the exploration of multiculturalism in Japan.

Multilingual Brazil Marilda C. Cavalcanti, Terezinha M. Maher, 2017-09-22 This book brings together cutting edge work by Brazilian researchers on multilingualism in Brazil for an English speaking readership in one comprehensive volume. Divided into five sections each with its own introduction tying together the themes of the book, the volume charts a course for a new sociolinguistics of multilingualism challenging long held perceptions about a monolingual Brazil by exploring the different policies, language resources, ideologies and social identities that have emerged in the country's contemporary multilingual landscape. The book elucidates the country's linguistic history to demonstrate its evolution to its present state: a country shaped by political

economic and cultural forces both locally and globally and explores different facets of today's multilingual Brazil including youth on the margins and their cultural and linguistic practices the educational challenges of socially marginalized groups and minority groups efforts to strengthen languages of identity and belonging In addition to assembling linguistic research done in Brazil previously little known to an English speaking readership the book incorporates theoretical frameworks from other disciplines to provide a comprehensive picture of the social political and cultural dynamics at play in multilingual Brazil This volume is key reading for researchers in linguistic anthropology sociolinguistics applied linguistics cultural studies and Latin American studies

Japanese Brazilian Saudades Ignacio López-Calvo, 2019-07-01 Japanese Brazilian Saudades explores the self definition of Nikkei discourse in Portuguese language cultural production by Brazilian authors of Japanese ancestry Ignacio L pez Calvo uses books and films by twentieth century Nikkei authors as case studies to redefine the ideas of Brazilianness and Japaneseness from both a national and a transnational perspective The result suggests an alternative model of postcoloniality particularly as it pertains to the post World War II experience of Nikkei people in Brazil L pez Calvo addresses the complex creation of Japanese Brazilian identities and the history of immigration showing how the community has used writing as a form of reconciliation and affirmation of their competing identities as Japanese Brazilian and Japanese Brazilian Japanese in Brazil have employed a twofold strategic rhetorical engineering the affirmation of ethno cultural difference on the one hand and the collective assertion of citizenship and belonging to the Brazilian nation on the other L pez Calvo also grapples with the community's inclusion and exclusion in Brazilian history and literature using the concept of epistemicide to refer to the government's attempt to impose a Western value system Brazilian culture and Portuguese language on the Nikkeijin while at the same time trying to destroy Japanese language and culture in Brazil by prohibiting Japanese language instruction in schools Japanese language publications and even speaking Japanese in public Japanese Brazilian Saudades contributes to the literature criticizing the cognitive injustice that fails to acknowledge the value of the global South and non Western ways of knowing and being in the world With important implications for both Latin American studies and Nikkei studies it expands discourses of race ethnicity nationality and communal belonging through art and narrative

Searching for Home Abroad Jeffrey Lesser, 2003-09-15 A multidisciplinary study of the transnational cultural identity of Brazilian nationals of Japanese descent and their more recent attempts to re settle in Japan *Global Japan* Roger Goodman, Ceri Peach, Ayumi Takenaka, Paul White, 2005-06-27 The Japanese have long regarded themselves as a homogenous nation clearly separate from other nations However this long standing view is being undermined by the present international reality of increased global population movement This has resulted in the establishment both of significant Japanese communities outside Japan and of large non Japanese minorities within Japan and has forced the Japanese to re conceptualise their nationality in new and more flexible ways This work provides a comprehensive overview of these issues and examines the context of immigration to and emigration from Japan It considers the development of important Japanese

overseas communities in six major cities worldwide the experiences of immigrant communities in Japan as well as assessing the consequences for the Japanese people's view of themselves as a nation

Latin Americans of Japanese Origin (Nikkeijin) Working in Japan Jun'ichi Gotō, 2007 Since the revision of the Japanese immigration law in 1990 there has been a dramatic influx of Latin Americans mostly Brazilians of Japanese origin Nikkeijin working in Japan This is because the revision has basically allowed Nikkeijin to enter Japan legally even as unskilled workers while the Japanese law in principle prohibits foreigners from taking unskilled jobs in the country In response the number of these Latin American migrants has increased from practically zero to more than 250 000 The migration of Nikkeijin is likely to have a significant impact on both the Brazilian and the Japanese economies given the substantial amount of remittances they send to Brazil The impact is likely to be felt especially in the Nikkeijin community in Brazil In spite of their importance the detailed characteristics of Nikkei migrants and the prospect for future migration and remittances are under researched The purpose of this paper is therefore to provide a more comprehensive account of the migration of Nikkeijin workers to Japan The paper contains a brief review of the history of Japanese emigration to Latin America mostly Brazil a study of the characteristics of Nikkeijin workers in Japan and their current living conditions and a discussion on trends and issues regarding immigration in Japan and migration policy The final part of the paper briefly notes the limitation of existing studies and describes the Brazil Nikkei Household Survey which is being conducted by the World Bank's Development Research Group at the time of writing this paper The availability of the survey data will contribute to a better understanding of the Japan Brazil migration and remittance corridor

a process of identity in motion responding to the push and pull between being positioned and positioning in a historically changing world She examines Japanese immigrants and their descendants historically shifting sense of identity which comes from their experiences of historical changes in socioeconomic and political structure in both Brazil and Japan Each chapter illustrates how their identity is perpetually in formation across generation across gender across class across race and in the movement of people between nations Diaspora and Identity makes an important contribution to the understanding of the historical development of ethnic racial and national identities as well as construction of the Japanese diaspora in Brazil and its response to time place and circumstances
