Mistaken Identity The Mind Brain Problem Reconsidered Suny Series In Science Technology And Society:

Mistaken Identity Leslie Brothers,2001-11-01 This unauthorized biography of cognitive neuroscience unveils hidden errors in current mind body accounts and sheds new light on basic scientific issues *Mistaken Identity* Leslie Brothers,2001-11-01 Neuroscientist Leslie Brothers argues that our understanding of the brain is determined by popular beliefs about the mind She critiques neuroism which explains the mind in terms of individual brains and shows that widely held assumptions about the promise of contemporary brain research are largely false This book opens up new territory as it uncovers the real connections among human biology human sociality and the mind The Power of Specificity in Psychotherapy Howard A. Bacal,Lucyann Carlton,2010-12-28 In The Power of Specificity in Psychotherapy When Therapy Works And When It Doesn t Howard Bacal presents specificity theory a contemporary process theory of psychotherapy that holds that therapy happens at the fit between the patient s particular therapeutic needs and the therapist s capacity to respond to them both of which will emerge and change within the unique process of each particular dyad Specificity theory challenges the traditional method and epistemology of psychoanalysis wherein the understanding of the patient and the therapeutic response are apprehended through rules and prescriptions that are generated through the application of structure theories The therapeutic engagement must necessarily and continually be monitored and adjusted to fit the specific and changing needs capacities and limitations of both participants regardless of the therapist s formal working theories Grounded in the innovative thinking of Sandor Ferenczi and drawing as well from the creative work of Michael Balint Wilfred Bion Donald Winnicott Marion Milner and Heinz Kohut the perspectives of specificity theory are corroborated by cutting edge findings in contemporary neurobiology and infant research The Power of Specificity in Psychotherapy challenges psychotherapists to reconsider how treatment is optimally practiced **American Book Publishing Record** ,2002

Cairns-Smith,2012-01-25 Written in a provocative witty and highly accessible style this is not only a splendid general introduction to the central questions of consciousness and brain science but also an answer to some of them The author noted Glaswegian chemist A G Cairns Smith believes our feelings and sensations are not simply alternative descriptions of neural events but have themselves evolved and have physical effects in the brain as well as physical causes *Secrets of the Mind* portrays a vision of the world as it may come to be seen by a future science Sand sea water air and the atoms from which such materials are made are now well understood by science but the same can not be said of our personal feelings our sensations and emotions Science tells us that these too must be forms of quantum energy if they evolved yet is only now beginning to explain how
