Mobilizing Against Nuclear Energy A Comparison Of Germany:

Mobilizing Against Nuclear Energy Christian Joppke, 2023-09-01 In the past two decades young people environmentalists church activists leftists and others have mobilized against nuclear energy Anti nuclear protest has been especially widespread and vocal in Western Europe and the United States In this lucid richly documented book Christian Joppke compares the rise and fall of these protest movements in Germany and the United States illuminating the relationship between national political structures and collective action He analyzes existing approaches to the study of social movements and suggests an insightful new paradigm for research in this area Joppke proposes a political process perspective that focuses on the interrelationship between the state and social movements a model that takes into account a variety of forces including differential state structures political cultures movement organizations and temporal and contextual factors This is an invaluable work for anyone studying the dynamics of social movements around the world In the past two decades young people environmentalists church activists leftists and others have mobilized against nuclear energy Anti nuclear protest has been especially widespread and vocal in Western Europe and the United States In this lucid ri

The Politics of Nuclear Energy in Western Europe Wolfgang C. Müller, Paul W. Thurner, 2018-01-26 This volume investigates nuclear energy policies in Western Europe over the entire post war period but with special attention to the two most recent decades The comparative analytical perspective draws on the interplay between voters attitudes challenging movements party competition and coalition formation Spanning more than 60 years and 16 countries the researchers examine the underlying causal processes leading to the observed varieties of Western European nuclear energy policies Based on a mixed methods approach using both structured case studies as well as quantitative analyses the study shows that the nature of party competition under given institutional contexts is a key driver for as a rule tactically motivated governmental policy changes and stability respectively Part I introduces the practical and theoretical relevance of the topic It outlines the reasoning of the major scientific contributions with regard to nuclear energy policies and offers a theoretical alternative to the previous literatures that has been predominantly movements oriented Additionally it provides core economic and political indicators of the changing role of nuclear energy in the countries Part II consists of seven in depth case studies where the outlined theoretical perspective is applied Part III consists of a general summary short narratives of the countries not covered in case studies qualitative comparison and an assessment of the factors for policy change from multivariate analysis

The Anti-Nuclear Power Movement and Discourses of Energy Justice Jesse P. Van Gerven, 2022-01-31 Jesse P Van Gerven critically analyzes the movement for a carbon free and nuclear free energy future in the U S using an environmental justice framework Van Gerven explores how different social and environmental justice discourses are constructed through the claims of social movement organizations This study shows how ideas of distribution recognition and representation structure the arguments made by anti nuclear groups against the production of nuclear power Through this analysis the author identifies general principals of

energy justice These principles can guide future energy policy and energy system development to ensure social and environmental justice

Nuclear Power in Britain and Germany: Trust, Democracy, and Futures Christian Götter, 2025-07-28 Split into two volumes volume 2 is a cultural history of technology that provides new insights into the international history of nuclear energy by examining the perspectives of six nuclear power plants host communities in Britain and Germany from the 1950s to the late 1980s Based upon a continuous qualitative analysis of the public debates in these communities this book demonstrates that the societal conflicts about atomic power were never confined to the risks of one exceptional energy technology Instead they were shaped by larger societal issues which they in turn heavily influenced Therefore the local discourses about nuclear energy provide an insight into transformations the British and German societies underwent during the Cold War The book will be of value for scholars and students interested in the history of technology environmental political and contemporary history as well as science and technology studies It will be of interest to researchers and members of the public interested in the local history of Biblis Hinkley Point Lingens Oldbury on Severn Stade and Torness as well as the wider public interested in the ongoing debates about nuclear power as a source of energy and a potential answer to the challenges of climate change

Mothers and the Mexican Antinuclear Power Movement Velma García-Gorena, 2022-08-09 In the early 1970s construction began on a nuclear power plant at Laguna Verde in the Mexican state of Veracruz Initially most local citizens were largely unconcerned with the prospect of having the nuclear plant in their community With the accidents at Three Mile Island and Chernobyl however residents complacency toward the power plant soon turned to opposition Protest groups such as the Madres Veracruzanas emerged to join existing environmental groups in a fight to close down the facility In Mothers and the Mexican Antinuclear Power Movement Velma García-Gorena traces the protest movement against the Mexican government's Laguna Verde nuclear plant outlining the movement's formation development and decline Documenting the movement's key players and turning points in superb detail she interweaves important historical narrative with a deft examination of the events framing her analysis in terms of social movement literature In a departure from the more conventional New Social Movements approach to analyzing antinuclear movements García-Gorena demonstrates how in many ways movements of this kind are not so new and how a modified political process approach fits much better With a sophisticated application of various social movements paradigms García-Gorena

incorporates perspectives such as resource mobilization political process paradigms and feminist theory Timely well written and thoroughly researched Mothers and the Mexican Antinuclear Power Movement fills a major gap in the literature on grassroots environmental movements in Latin America Both rich in empirical detail and convincing in its conclusions this study provides a broader understanding of Mexican social movements and the quest for democracy in developing countries

Handbook of Anti-Environmentalism Tindall, David, Stoddart, Mark C. J., Dunlap, Riley E., 2022-03-22 This thought provoking Handbook provides a theoretical overview of the wide variety of anti environmentalisms and offers an integrative research agenda for future research on the topic Probing the ways in which groups have organized to oppose environmental movements and pro environmental policies in recent decades it examines those involved in these countermovements and studies their motivations and support systems This Handbook explores core topics in the field including contestation over climate change wind power mining forestry food sovereignty oil and gas pipelines and population issues **Transforming the Transformation?** Michael Minkenberg, 2015-03-24 Transforming the transformation The East European Radical Right in the Political Process examines the significance of radical right parties along with other organizations in terms of their involvement in the political process of new democracies This groundbreaking study highlights firstly the radical right s interaction with other political actors such as parties governments and interest groups in their respective countries Secondly the contributors analyze the effects of such interaction with regard to agenda setting and policies in loaded policy fields namely minorities and immigration law and order religion territorial issues and democratization Through an examination of the role of radical right actors in political processes and an assessment of the resulting measurable outcomes this book shows how policies election results and regime changes indicate shifts away from the liberal democratic order institutionalized in the course of post Communist transformation Offering a unique cross national comparison of particular facets and themes as well as in depth analysis of country cases this book will be of interest to undergraduate and postgraduate students as well as scholars of European politics and far right studies **Chain Reactions** Lucy Jane Santos, 2024-11-05 Tracing uranium s past and how it intersects with our understanding of other radioactive elements Chain Reactions aims to enlighten readers and refresh our attitudes about the atomic world Chain Reactions looks at the fascinating often forgotten stories that can be found throughout the history of uranium From glassworks to penny stocks from medicines to atomic weapons from something to be feared to a powerful source of energy this global history explores the scientific narrative of this unique element but also shines a light on its cultural and social impact By understanding our nuclear past we can move beyond the ideological opposition to technologies and encourage a more nuanced dialogue about whether it is feasible and desirable to have a genuinely nuclear powered future **Cheap and Clean** Stephen Ansolabehere, David M. Konisky, 2016-10-07 How Americans make energy choices why they think locally not globally and how this can shape U S energy and climate change policy How do Americans think about energy Is the debate over fossil fuels

highly partisan and ideological Does public opinion about fossil fuels and alternative energies divide along the fault between red states and blue states And how much do concerns about climate change weigh on their opinions In Cheap and Clean Stephen Ansolabehere and David Konisky show that Americans are more pragmatic than ideological in their opinions about energy alternatives more unified than divided about their main concerns and more local than global in their approach to energy Drawing on extensive surveys they designed and conducted over the course of a decade in conjunction with MIT's Energy Initiative Ansolabehere and Konisky report that beliefs about the costs and environmental harms associated with particular fuels drive public opinions about energy People approach energy choices as consumers and what is most important to them is simply that energy be cheap and clean Most of us want energy at low economic cost and with little social cost that is minimal health risk from pollution The authors also find that although environmental concerns weigh heavily in people's energy preferences these concerns are local and not global Worries about global warming are less pressing to most than worries about their own city's smog and toxic waste With this in mind Ansolabehere and Konisky argue for policies that target both local pollutants and carbon emissions the main source of global warming The local and immediate nature of people's energy concerns can be the starting point for a new approach to energy and climate change policy **After**

Disaster Thomas A. Birkland, 1997 Examines how disasters like earthquakes oil spills and nuclear power plant accidents can act as focusing events which cause both citizens and policymakers to pay more attention to a public problem and often to press for solutions Explains how and why some public disasters change political agendas and ultimately public policies P 4 of cover Red Army Faction, A Documentary History J. Smith, André Moncourt, 2009-02-01 The first in a two volume series this is by far the most in depth political history of the Red Army Faction ever made available in English Projectiles for the People starts its story in the days following World War II showing how American imperialism worked hand in glove with the old pro Nazi ruling class shaping West Germany into an authoritarian anti communist bulwark and launching pad for its aggression against Third World nations The volume also recounts the opposition that emerged from intellectuals communists independent leftists and then explosively the radical student movement and countercultural revolt of the 1960s It was from this revolt that the Red Army Faction emerged an underground organization devoted to carrying out armed attacks within the Federal Republic of Germany in the view of establishing a tradition of illegal guerilla resistance to imperialism and state repression Through its bombs and manifestos the RAF confronted the state with opposition at a level many activists today might find difficult to imagine For the first time ever in English this volume presents all of the manifestos and communiqués issued by the RAF between 1970 and 1977 from Andreas Baader's prison break through the 1972 May Offensive and the 1975 hostage taking in Stockholm to the desperate and tragic events of the German Autumn of 1977 The RAF's three main manifestos The Urban Guerilla Concept Serve the People and Black September are included as are important interviews with Spiegel and le Monde Diplomatique and a number of communiqués and court statements explaining their actions Providing

the background information that readers will require to understand the context in which these events occurred separate thematic sections deal with the 1976 murder of Ulrike Meinhof in prison the 1977 Stammheim murders the extensive use of psychological operations and false flag attacks to discredit the guerilla the state s use of sensory deprivation torture and isolation wings and the prisoners resistance to this through which they inspired their own supporters and others on the left to take the plunge into revolutionary action Drawing on both mainstream and movement sources this book is intended as a contribution to the comrades of today and to the comrades of tomorrow both as testimony to those who struggled before and as an explanation as to how they saw the world why they made the choices they made and the price they were made to pay for having done so

Site Fights Daniel P. Aldrich, 2011-03-15 One of the most vexing problems for governments is building controversial facilities that serve the needs of all citizens but have adverse consequences for host communities Policymakers must decide not only where to locate often unwanted projects but also what methods to use when interacting with opposition groups In *Site Fights* Daniel P Aldrich gathers quantitative evidence from close to five hundred municipalities across Japan to show that planners deliberately seek out acquiescent and unorganized communities for such facilities in order to minimize conflict When protests arise over nuclear power plants dams and airports agencies regularly rely on the coercive powers of the modern state such as land expropriation and police repression Only under pressure from civil society do policymakers move toward financial incentives and public relations campaigns Through fieldwork and interviews with bureaucrats and activists Aldrich illustrates these dynamics with case studies from Japan France and the United States The incidents highlighted in *Site Fights* stress the importance of developing engaged civil society even in the absence of crisis thereby making communities both less attractive to planners of controversial projects and more effective at resisting future threats
