[Two-Track Democracy in South](#)

Korea Seongyi Yun, 2023-03-02 This book examines three ironic phenomena of South Korean democracy that have developed after its democratic transition in 1987 While the evaluation of South Korea's political system by external institutions has steadily improved people's trust in the nation's political system continues to decline However in the face of political distrust unlike in Western democracies voter turnout has increased Even though political participation and the political influence of citizens have been strengthened over time the political influence of civic organizations that fostered the initial democratization movement in the 1980s has weakened parallel to the decline in citizens' confidence in these organizations Why is South Korean democracy witnessing ironic phenomena that cannot be succinctly explained by existing theories of political development or democracy This book seeks these answers within the framework of a two-track democracy that is the interplay between institutional and contentious politics A model of democracy that combines contentious politics with formal politics can shed light on this phenomenon Yun proposed that the traditional hierarchical and elite-centered political system is no longer sustainable In order to resolve the democratic deficiency perceived by citizens it is necessary to consider a new model of democracy beyond the improvement of representative democracy Moreover the new model of democracy should be based on a fusion of institutional politics and contentious politics The book will appeal to scholars and students interested in the politics of South Korea democratization and democracy more generally *Creating Public Value* Mark H.

Ericson, University of Toronto. Centre of Criminology, 1982-01-01 Professor Ericson and his colleagues followed the work of patrol officers in a large Canadian regional police force From their direct observations comes a wealth of information quantitatively assembled and qualitatively discussed with insights into the nature of policing This book reveals that the police are not mere referees of our legal lives blowing the whistle on our infractions They are censors of certain types of possibly wrong actions They are selective in their invocation of criminal law and use the law artfully to restore settings to orderliness Ericson emphasizes the routine manner in which the patrol officer intervenes and gains compliance from the citizenry He demonstrates that when the criminal process is invoked the police maintain fundamental control over the court outcome Using these findings he addresses basic questions about the role of police in relation to crime and how it is produced literally by the patrol officer Crime is also seen as the primary basis of police legitimacy which in turn enables the police to engage in broad surveillance and information gathering The author's conclusions about the nature of policing and his discussion of the implications of proposals for reform of police will generate better informed deliberation in political and public decision making and in the general study of sociological theory

How Organizations Develop Activists Hahrie Han, 2014 Why are some civic associations better than others at getting and keeping people involved in activism From MoveOn.org to the National Rifle Association Health Care for America Now to the Sierra Club membership based civic associations constantly seek to engage people in civic and political action What makes some more effective than others Using in person observations surveys and field experiments this book compares organizations with strong records of engaging people in health and environmental politics to those with weaker records To build power civic associations need quality and quantity or depth and breadth of activism They need lots of people to take action and also a cadre of leaders to develop and execute that activity Yet models for how to develop activists and leaders are not necessarily transparent This book provides these models to help associations build the power they want and support a healthy democracy In particular the book examines organizing mobilizing and lone wolf models of engagement and shows how highly active associations blend mobilizing and organizing to transform their members motivations and capacities for involvement This is not a simple story about the power of offline versus online organizing Instead it is a story about how associations can blend both online and offline strategies to build their activist base In this compelling book Hahrie Han explains how civic associations can invest in their members and build the capacity they need to inspire action
