Never Lose From Globetrotter To Addict To Phd An Autobiography:

Icons of Black America Matthew Whitaker, 2011-03-09 This stunning collection of essays illuminates the lives and legacies of the most famous and powerful individuals, groups and institutions in African American history. The three volume Icons of Black America: Breaking Barriers and Crossing Boundaries is an exhaustive treatment of 100 African American people, groups and organizations viewed from a variety of perspectives. The alphabetically arranged entries illuminate the history of highly successful and influential individuals who have transcended mere celebrity to become representatives of their time. It offers analysis and perspective on some of the most influential black people, organizations and institutions in American history from the late 19th century to the present. Each chapter is a detailed exploration of the life and legacy of an individual icon. Through these portraits, readers will discover how these icons have shaped and been shaped by the dynamism of American culture as well as the extent to which modern mass media and popular culture have contributed to the rise and sometimes fall of these powerful symbols of individual and group excellence.

Memoirs of an Addicted Brain Marc Lewis, 2011-10-04 A gripping, ultimately triumphant memoir that is also the most comprehensive and comprehensible study of the neuroscience of addiction written for the general public. FROM THE INTRODUCTION We are prone to a cycle of craving what we don't have, finding it, using it up or losing it, and then craving it all the more. This cycle is at the root of all addictions: addictions to drugs, sex, love, cigarettes, soap operas, wealth and wisdom itself. But why should this be so? Why are we desperate for what we don't have or can't have, often at great cost to what we do have, thereby risking our peace and contentment, our safety and even our lives? The answer, says Dr. Marc Lewis, lies in the structure and function of the human brain. Marc Lewis is a distinguished neuroscientist. And for many years he was a drug addict himself, dependent on a series of dangerous substances from LSD to heroin. His narrative moves back and forth between the often dark, compellingly recounted story of his relationship with drugs and a revelatory analysis of what was going on in his brain. He shows how drugs speak to the brain, which is designed to seek rewards and soothe pain in its own language. He shows in detail the neural mechanics of a variety of powerful drugs and of the onset of addiction itself, a distortion of normal perception. Dr. Lewis freed himself from addiction and ended up studying it. At the age of 30, he traded in his pharmaceutical supplies for the life of a graduate student, eventually becoming a professor of developmental psychology and then of neuroscience, his field for the last 12 years. This is the story of his journey, seen from the inside out.
