Ehrenreich, B. (2001). *Nickel and dimed: On (not) getting by in America*. New York: Henry Holt and Company.

In this book of nonfiction based on the journalist's experiential research, Ehrenreich attempts to ascertain whether it is currently possible for an individual to live on a minimum wage in America. Taking jobs as a waitress, a maid in a cleaning service, and a Wal-Mart sales employee, the author summarizes and reflects on her work, her relationships with fellow workers, and her financial struggles in each situation.

An experienced journalist, Ehrenreich is aware of the limitations of her experiment and the ethical implications of her experiential research tactics and reflects on these issues in the text. The author is forthcoming about her methods and supplements her experiences with scholarly research on her places of employment, the economy, and the rising cost of living in America. Ehrenreich's project is timely, descriptive, and well-researched.

The annotation above both summarizes and assesses the book in the citation. The first paragraph provides a brief summary of the author's project in the book, covering the main points of the work. The second paragraph points out the project's strengths and evaluates its methods and presentation. This particular annotation does not reflect on the source's potential importance or usefulness for this person's own research.

Why write an annotated bibliography?

Writing an annotated bibliography exposes you to different authors' perspectives on your topic, equipping you with the knowledge you will need to develop a thesis and write a research paper.

If you were to morph your annotated bibliography into the form of an essay showing the many different authors' perspectives on a topic and how they relate to one another, you would have a literature review. Many college research projects require a literature review, and it often appears as a section toward the beginning of the final written project. Writing an annotated bibliography is excellent preparation for writing a literature review.

Scholars write book-length annotated bibliographies to provide their colleagues in the field with quick information about a great number of sources. Because these bibliographies exist, we can read a hundred one-paragraph summaries rather than trudge through a hundred 20-page articles to find information relevant to our topic.
