New Japan Architecture Geeta Mehta, Deanna MacDonald, 2012-07-09 Featuring dozens of high quality photographs schematic designs and insightful commentary this Japanese architecture book is a must have for architects or collectors The past five years are widely considered to have been the most innovative period in contemporary Japanese design history The projects featured in New Japan Architecture were completed during this extraordinarily fertile time Featuring breathtaking images of modern Japan this volume presents forty eight extraordinary projects by forty two of the world's leading architects including Hitoshi Abe Ward Kishi Tadao Ando Chiba Manabu Architects Toyo Ito Kengo Kuma Kazuyo Sejima This architecture book features a wide range of buildings some exhibiting the ultimate ideal of the white Zen cube while others exemplify the search for the new wow factor in iconic design In many cutting edge modernity is counterbalanced by a concern for sustainability an issue that has motivated many architects to rethink and reintroduce concepts drawn from traditional Japanese architecture Projects big and small private and public residential and commercial are included Insightful text by two leading experts in the field of Japanese architecture highlights the remarkable aspects of each building and places these developments within the wider context of world architecture Offering an essential overview of current trends New Japan Architecture points the way to modern architecture's future *New Japanese Architecture* Udo Kultermann, 1961 Neue Japanische Architektur Egon Tempel, 1969 *The New Japanese Architecture* Botond Bognár, 1990 Om japansk arkitektur hovedsagelig fra 1980'erne og 1990'erne **New Directions in Japanese Architecture** Robin Boyd, 1968 Japan has managed to build up one of the most consistent and instantly recognizable styles of modern architecture and has done this in hardly more than a decade The full impact of the international modern movement did not strike Japanese architects until well after World War II and then their vision was concentrated on the work of one master Le Corbusier Yet in a remarkably short time after that they turned from copying to creating subtly flavoring the international movement with the essence of their own country Today Japan is one of the growth points of world architecture Why this sudden surge of sophistication How could so many Japanese architects step up so quickly and with such unison into command of the modern building arts and technologies How genuine is their style The question of its validity and the reasons for its rapid maturation provide the theme underlying this study of the new direction which Japanese architecture is now forcefully taking Robin Boyd finds some reasons in the inescapable if indirect influences of Japan's great architectural traditions some in the social background of today and some in the special kind of insularity which colors the Japanese experience poised as they see it between East and West The new work of a number of Japanese architects is illustrated and analyzed Some of these architects are world famous all are working in the forefront of national development and share responsibility for the vigor and promise that cannot fail to excite a visitor from the West New Japanese Architecture. The Constructed Other: Japanese Architecture in the Western Mind Kevin Nute,2021-09-30

The Constructed Other argues that the assumed otherness of Japanese architecture has made it both a testbed for Western architectural theories and a source of inspiration for Western designers The book traces three recurring themes in Western accounts of Japanese architecture from the reopening of Japan in the mid nineteenth century to the present day a wish to see Western architectural theories reflected in Japanese buildings efforts to integrate elements of Japanese architecture into Western buildings and a desire to connect contemporary Japanese architecture with Japanese tradition It is suggested that together these narratives have had the effect of creating what amounts to a mythical version of Japanese architecture often at odds with historical fact but which has exercised a powerful influence on the development of building design internationally
