Oxford Of Health Foods:

The Oxford Book of Health Foods J. G. Vaughan, P. A. Judd, 2006-04-13 Health foods and dietary supplements are widely used throughout the world it is estimated that more than seventy million people in Europe regularly buy these products and it is a billion dollar business in the USA Health foods include vitamins minerals cereals nuts herbal medicines functional foods and many others A large number of people use these foods in the belief that they contribute to their general health while in most countries little or no information is given on products explaining their therapeutic values The Oxford Book of Health Foods begins with an account of modern concepts of human nutrition followed by a series of over one hundred accounts of individual health foods and dietary supplements In all cases the importance of these products in human health is explained and for herbal medicines the evidence for their claimed therapeutic value is given and toxic effects are described Full colour illustrations accompany these accounts The Oxford Book of Health Foods will be of interest not just to health professionals but to all people with an interest in health foods and healthy eating The text is supplemented throughout by beautifully drawn botanical illustrations

The Oxford Book of Health Foods John Griffith Vaughan, Patricia Ann Judd, 2003 This text begins with an account of modern concepts of human nutrition followed by a series of over 100 accounts of individual health foods and dietary supplements The evidence for the claimed therapeutic value of herbal medicines is given

The Oxford Book of Health Foods, 2010 Health, Food and Social Inequality Carolyn Mahoney, 2015-02-20 Health Food and Social Inequality investigates how vast amounts of consumer data are used by the food industry to enable the social ranking of products food outlets and consumers themselves and how this influences food consumption patterns This book supplies a fresh social scientific perspective on the health consequences of poor diet Shifting the focus from individual behaviour to the food supply and the way it is developed and marketed it discusses what is known about the shaping of food behaviours by both social theory and psychology Exploring how knowledge of social identities and health beliefs and behaviours are used by the food industry Health Food and Social Inequality outlines for example how commercial marketing firms supply food companies with information on where to locate snack and fast foods whilst also advising governments on where to site health services for those consuming such foods disproportionately Giving a sociological underpinning to Nudge theory while simultaneously critiquing it in the context of diet and health this book explores how social class is an often overlooked factor mediating both individual dietary practice and food marketing strategies This innovative volume provides a detailed critique of marketing and food industry practices and places class at the centre of diet and health It is suitable for scholars in the social sciences public health and marketing

Food and Cooking Skills Education

Anita Tull, 2018-01-29 Food and Cooking Skills Education FCSE is a complex mix of policy and practicality educational theory and pedagogy classroom and government policy This book shows how FCSE has been at the centre of a tussle between education and policy for decades It reviews how FCSE has grappled with various significant issues of concern that threaten to marginalise it and pose problems for educational practicalities as expectations are increased but resources are squeezed It assesses the debate about the significance and importance of acquiring practical food and cooking skills in a society where the purchase of ready made food has become commonplace and public knowledge of where our food comes from is noticeably lacking This has contributed to the escalating incidence of diet related diseases and the attendant cost to society and threatened environmental sustainability In turn governments have reacted by proposals to make practical cooking skills a statutory National Curriculum subject as part of the armoury for tackling such costs Based on detailed research conducted across England and Wales as well as comparisons with thirty five other countries or states the author makes recommendations for policy to manage this challenge facing contemporary society

Food, Morals and Meaning John Coveney, 2002-01-04 Food Morals and Meaning examines our need to discipline our desires our appetites and our pleasures at the table However instead of seeing this discipline as dominant or oppressive it argues that a rationalisation of pleasure plays a positive role in our lives allowing us to better understand who we are The book begins by exploring the way that concerns about food the body and pleasure were prefigured in antiquity and then how these concerns were recast in early Christianity as problems of natural appetite which had to be curbed The following chapters discuss how scientific knowledge about food was constructed out of philosophical and religious concerns about indulgence and excess in 18th and 19th Century Europe Finally by using research collected from in depth interviews with families the last section focuses on the social organisation of food in the modern home to illustrate the ways that the meal table now incorporates the principles of nutrition as a form of moral training especially for children Food Morals and Meaning will be essential reading for those studying nutrition public health sociology of health and illness and sociology of the body Key Features | Health sociology is a rapidly growing subject area

The Business of Food Gary Allen, Ken Albala, 2007-10-30 The business of food and drink is for better and worse the business of our nation and our planet and to most consumers how it works remains largely a mystery This encyclopedia takes readers as consumers behind the scenes of the food and drink industries The contributors come from a wide range of fields and the scope of this encyclopedia is broad covering from food companies and brands to the environment health science and technology culture finance and more The more than 150 essay entries also cover those issues that have been and continue to be of perennial importance Historical context is emphasized and the focus is mainly on business in the United States Most entries include Further Reading The frontmatter includes an Alphabetical List of Entries and a Topical List of Entries to allow the reader to quickly find subjects of interest Numerous cross references in the entries and blind entries provide other search strategies The person and subject index is another in depth search tool Sample entries
