An Accounting Thesaurus Richard L. Chambers, 2014-06-28 A compilation drawn from over 500 years of English language accounting literature reflecting a lifetime of scholarly enquiry this book comprises over 5000 quotations of between 1 20 lines in length The book aims to give an historical perspective as well as an up to date overview of what accounting and accountants were are and do and is intended both as a reference book and a research tool Its range extends from general interest to the advanced covering rules practices and standards professional and academic opinions and the social and logical foundations of accounting it also draws on the work of scholars in other fields that have some bearing on accounting work and thought

Reality and Accounting Richard Mattessich, 2013-07-31 This book discusses and summarizes the revived interest in reality issues ontology within accounting economics and the information sciences with a view to informing scholars from these different disciplines about each other s endeavours in ontological research Even more importantly the book aims at familiarizing scholars from various disciplines with an evolutionary approach for examining questions about reality in the social sciences The book is based on a partly pluralistic approach that assures unity in diversity Unity because all existence arises from physical reality diversity because emergent properties create biological and social realities that cannot be reduced to physical phenomena Hence the book recognizes not only concrete but also abstract entities It shows however that the actualization of these abstract entities requires objectification and concrete manifestation This pluralistic approach is central to this book It also is a challenge to those who reject abstract entities as socially real as well as to those who defend a non realist position The major task of this book is to explore proposals towards a uniform ontological basis This uniform and universal presentation extends beyond traditional

ontology asking what is real to such questions as on which reality level is something real and in which temporal and modal way is it real Such an extended analysis is relevant to accountants economists information scientists other social scientists as well as philosophers
