**The Mind of Empire** Christopher A. Ford, 2010-05-28 Ford's reading of Confucius is both shrewd and instructive with implications for contemporary policymakers a scholarly analysis of Chinese history The Weekly Standard China's prosperity has increased dramatically in the last two decades propelling the nation to a prominent position in the international community Yet China's ancient history still informs and shapes its understanding of itself in relation to the world As a highly developed and modern nation China is something of a paradox In The Mind of Empire China's History and Modern Foreign Relations Christopher A Ford demonstrates how China's historical awareness shapes its objectives and how the resulting national consciousness continues to influence the country's policymaking Despite its increasing prominence among modern developed nations China continues to seek guidance from a past characterized by

Confucian notions of hierarchical political order and a moral geography that places China at the center of the civilized world. The Mind of Empire describes how these attitudes have clashed with traditional Western ideals of sovereignty and international law. Ford speculates about how China's legacy may continue to shape its foreign relations and offers a warning about the potential global consequences. He examines major themes in China's conception of domestic and global political order, describes key historical precedents, and outlines the remarkable continuity of China's Sinocentric stance. Expertly synthesizing historical, philosophical, religious, and cultural analysis into a cohesive study of the Chinese worldview, Ford offers revealing insights into modern China. A much needed and an erudite contextualization, this book will benefit immensely those interested in the history and strategic culture of China's foreign policy. *The China Quarterly*

**Toward a Poetics of Genesis 1-11** Daniel D. Lowery, 2013-04-15 Daniel Lowery commences this work by suggesting that history is a subjective enterprise; it is controlled by those who record it. The power of the present decides what is counted as history, and how the rest of us are told about the past shapes our view of it and concomitantly our outlook for the future. In this sense, then, history fundamentally shapes the future. Few questions are more basic to human existence than: Who am I? Where did I come from? What is my place in this world? The earliest chapters of Genesis have oriented hearers and readers for millennia in their attempts to address these concerns. And so, in several respects, Genesis shapes the future. In this study, Lowery sets out to understand more accurately ancient Near Eastern language and claims about origins, specifically claims found in Gen 1-11. He uses Gen 4:17-22 as a test case representing the Hebrew tradition explaining how the world came to be civilized. Lowery observes that this passage serves a function within the larger narrative of Gen 1-11, akin to other ancient Near Eastern traditions of civilized beginnings. Moreover, it occupies a place in the overarching narrative of beginnings corresponding to what we find elsewhere throughout the ancient world. Lowery focuses mainly on Mesopotamia, leaving other cultures for later study. This study aims to demonstrate that much of the language of Gen 1-11 is similar in many ways to its Mesopotamian counterparts. More explicitly, here is an exploration of the nature of the language and terms of Gen 1-11 to ascertain what truths it communicates and how it communicates them. At its core, this is a study of the genre and generic claims of protohistory as found in Gen 1-11.
