Politics and the International System Keith R. Legg, James F. Morrison, 1971

The Summer Trade Alan MacEachern, Edward

MacDonald,2022-04-15 Tourism has been a central part of Prince Edward Island's identity for more than a century. What began as a seasonal sideline in the nineteenth century evolved into an economic powerhouse that now attracts over 1.5 million visitors each year, employs one in ten Islanders and is the province's second leading industry. Spanning from the Victorian era to the COVID-19 pandemic, *The Summer Trade* presents the first comprehensive history of tourism in any Canadian province. Over time, the Island has marketed a remarkably durable set of tourism tropes: seaside refuge from urban industrial angst, return to innocence, literary shrine to L.M. Montgomery, cradle of Confederation, garden of the Gulf. As private enterprise and the state sought to manage the industry, the Island's own identity became caught up in the wish-fulfillment of its summer visitors. The result has been a complicated, sometimes conflicted relationship between Islanders and tourism, between a warm welcome to visitors and resistance to the industry's adverse effects on local culture. Lavishly illustrated with postcards, tourist guides and memorabilia, *The Summer Trade* also presents a history of Prince Edward Island in cameo that tracks cultural, economic, political and environmental developments and tensions. Across the strait, the Island beckons.

Design for Life Stuart Walker,2017-04-21 Stuart Walker's design work has been described as life-changing, inspiring, disturbing and ferocious. Drawing on an extraordinarily diverse range of sources and informed by creative practice, *Design for Life* penetrates to the heart of modern culture and the malaise that underlies today's moral and environmental crises. The author argues that this malaise is deep-seated and fundamental to the modern outlook. He shows how our preoccupation with technological progress, growth and the future has produced a constricted view of life, one that is both destructive and self-reinforcing. Based on over twenty-five years of scholarship and creative practice, he demonstrates the vital importance of solitude, contemplation, inner growth and the present moment in developing a different course, one that looks squarely at our current precarious situation while offering a positive, hopeful way forward, a way that is compassionate, context-based, human-scale, ethically motivated and critically creative. *Design for Life* is an intensely original contribution that will be essential reading for design practitioners and students. Written in a clear, accessible style, it will also appeal to a broader readership, especially anyone who is concerned with contemporary society's rising inequalities and environmental failings and is looking for a more constructive, balanced and thoughtful direction. *Writing Sites* Jon Stratton,1990 A provocative analysis of the theories of Marx, Foucault and Derrida. *Paperbound Books in Print*, 1991. **This Book Is Not Required** Inge Bell, Bernard McGrane, John Gunderson, 2005. Revised by a team of university students, the purpose of this book remains the same: to encourage students to be active participants in university life as a whole. In a personable and refreshingly straightforward style, Bell and McGrane's critical discussion of academic life distinguishes between learning the institutional rules of higher education and internalizing those rules. It demystifies professors and teaching assistants by discussing their institutional roles and incentives and invites students to take responsibility for and make the most of their educational experiences. *The Diffusion of Western Economic Ideas in East Asia* Malcolm Warner, 2016-12-19 This book examines the

diffusion of economic ideas in East Asia assessing the impact of external ideas on internal theory and practice It considers economists from Adam Smith onwards including Marx Keynes Hayek and contemporary economists and covers the subject both historically and also includes present day and likely future developments The book covers all the major countries of East Asia and pays particular attention to specific economists who have had a strong impact in specific countries and to important developments in economic theory in East Asia exploring how far these have been driven by Western economic ideas This book will be welcomed by students and scholars of East Asia and South east Asia as well as those interested in economics economic history and management

Uniquely Human: the Basis of Human Rights Gabriel Moran, 2013-08-21 The basis of human rights remains in need of exploration The effectiveness of the language of human rights is threatened by its widespread but uncritical use This book is neither a sermon to believers nor an attack by a skeptic It is a critical look at the basis of those few rights that are genuinely universal for example a right not to be tortured or a right to basic subsistence A human right is a claim that every human being can make on the whole human race The rights that are specifically human arise from a human respect for all living beings There is still a widespread assumption that human rights is just another name for the confused idea of natural rights from the eighteenth century rights that were promulgated by and for adult white males The authors of the UNs Universal Declaration of Human Rights in 1948 assumed that they were reformulating an old idea Instead they were beginning a new idea Human rights can be realized only through conversations across differences

within gender age culture and religion This book traces those continuing conversations that fill out the diversity within the unity of the human race The convergence of many particular traditions creates a human tradition that can sustain human rights as a standard of moral conduct for all nations
