Geography and National Identity David Hooson,1994-10-20 This volume of especially commissioned essays explores the geography of and the role of geography in national and proto national identity Place and national identity are bound together Attachment to the one is almost always inseparable from the sense of the other Yet as this volume shows the articulated self conscious linking of place and identity is by and large a modern phenomenon that took root in nineteenth century Europe The formation of supranational states and the much vaunted globalization of culture led many to believe there would be a progressive dilution of national identities and a growing agglomeration of places and nations into larger state units Precisely the reverse has taken place This book

explores the connections between identity and homeland showing how a place may be perceived as archetypal endowed with love and celebrated in music and poetry yet be a pretext for violence and war It examines the evolution of ideas about identity and their manifestations in a wide variety of settings from the former Soviet Union to the island states of the South Pacific

Grounds for Review Andrew Theokas, 2004-10-01 Garden Festivals are more than temporary horticultural expositions Complex and phased these projects have additional significance as planning stratagems reclamation projects public art venues and precursors of new urban parks Their scope extends well beyond that implied by the term garden festival Typically exceeding 50 hectares they stimulate development and steer site design through a unique merger of domestic garden culture with a large scale urban project A general discussion of the origins formative elements and chronology of the generic event followed by cross cultural reviews and analyses of numerous recent festivals and their site legacies form the core of this first comprehensive book on the subject Recent installations have been responsive to the ascendance of open space as a critical planning element while forthcoming events now develop in the midst of a trend towards the holistic initiatives of urban landscape planning giving them a renewed relevance for urban design The author has explored over fifteen festival sites and documents this study using government reports interview transcripts thematic maps master plans and other primary source material

The Gods' Machines Wun Chok Bong, 2008-05-27 Based on the author's decipherment of prehistoric carvings and the application of mathematical measurements *The Gods Machines* shows how unknown phenomena from Angkor Wat to Stonehenge to crop circles are actually powerhouses built by an advanced extraterrestrial civilization for tapping electromagnetic energy The book traces the development of that civilization on Earth over 5 000 years revealing how all these structures are aligned according to a universal formula an angle of 135 degrees at which Earth's energy has been tapped by the alien creators of these monuments These fascinating theories not only explain our distant past but also open the door to a future of power technology and space travel Megalithic sites such as Newgrange and Stonehenge are constructed with quartz and iron rich stones with electrical conduction properties minerals also found atop Aztec temple and inside crop circles These stones according to the author served as dry cell batteries when heated and stressed and supplied energy to the builders traveling vehicles Most interestingly the author has tested his theory on today's crop circles *The Gods Machines* is certain to stimulate debate among readers interested in alternative history ancient civilization and extraterrestrial intelligence
