Econometric Advances in Spatial Modelling and Methodology Daniel A. Griffith, C. Amrhein, Jean-Marie Huriot, 2013-04-17 The purpose of models is not to fit the data but to sharpen the questions S Karlin 11th R A Fisher Memorial Lecture Royal Society 20 April 1983 We are proud to offer this volume in honour of the remarkable career of the Father of Spatial Econometrics Professor Jean Paelinck presently of the Tinbergen Institute Rotterdam Not one to model solely for the sake of modelling the above quotation nicely captures Professor Paelinck's unceasing quest for the best question for which an answer is needed His FLEUR model has sharpened many spatial economics and spatial econometrics questions Jean Paelinck arguably is the founder of modern spatial econometrics penning the seminal introductory monograph on this topic Spatial Econometrics with Klaassen in 1979 In the General Address to the Dutch Statistical Association on May 2 1974 in Tilburg he coined the term spatial econometrics to designate a growing body of the regional science literature that dealt primarily with estimation and testing problems encountered in the implementation of multiregional econometric models Anselin 1988 p 7 he already had introduced this idea in his introductory report to the 1966 Annual Meeting of the Association de Science Regionale de Langue Fran aise Penser la ville Pierre-Henri Derycke, Jean-Marie Huriot, Denise Pumain, 1996

Handbook on Entropy, Complexity and Spatial Dynamics Reggiani, Aura, Schintler, Laurie A., Czamanski, Danny, Patuelli, Roberto, 2021-12-14 This ground breaking Handbook presents a state of the art exploration of entropy complexity and spatial dynamics from fundamental theoretical empirical and methodological perspectives It considers how foundational theories can contribute to new advances including novel modeling and empirical insights at different sectoral spatial and temporal scales

Theories and Models of Urbanization Denise Pumain, 2020-01-02 This book provides a thorough discussion about fundamental questions regarding urban theories and modeling It is a curated collection of contributions to a workshop held in Paris on October 12th and 13th 2017 at the Institute of Complex Systems by the team of ERC GeoDiverCity There are several chapters conveying the answers given by single authors to problems of conceptualization and modeling and others in which scholars reply to their conception and question them Even the chapters transcribing keynote presentations were rewritten according to contributions from the respective discussions The result is a complete state of the art of what is our knowledge about urban processes and their possible formalization **Handbook on Cities and Complexity** Portugali,

Juval, 2021-09-16 Written by some of the founders of complexity theory and complexity theories of cities CTC this Handbook expertly guides the reader through over forty years of intertwined developments the emergence of general theories of complex self organized systems and the consequent emergence of CTC **The Modeling Process in Geography** Yves Guermond, 2013-03-01 This title focuses on the evolution of the modeling process and on new research perspectives in theoretical and applied geography as well as spatial planning In the last 50 years the achievements of spatial analysis models opened the way to a new understanding of the relationship between society and geographical space In this book these

models are confronted by the real conditions of territorial prospect regional dynamism cultural policy HMO and spatial segregation This confrontation takes into account the instability of social behavior and the permanence of partial determinist trajectories

Handbook of Cities and Networks Neal, Zachary P., Rozenblat, Céline, 2021-07-31 This Handbook of Cities and Networks provides a cutting edge overview of research on how economic social and transportation networks affect processes both in and between cities Exploring the ways in which cities connect and intertwine it offers a varied set of collaborations highlighting different theoretical historical and methodological perspectives

Megacities and the Coast Mark Pelling, Sophie Blackburn, 2014-01-03 Based on a major international study this volume provides a synthesis of scientific knowledge on megacity urbanization on the coast environmental impacts risks and management choices including a focus on adaptation mitigation and disaster risk management It is the primary output of a major international scientific project sponsored by the International Geosphere Biosphere Programme the Land Ocean Interactions at the Coastal Zone programme of IHDP IGBP and others It brings together the work of over 60 contributing authors and an international review board It presents the international policy and academic community with an unbiased and high quality assessment of the state of the art in areas of social ecological systems interaction One of its main messages is that while we know a great deal about megacities of more than ten million people and about urban processes and about coasts and their physical and ecological processes aquatic physical and atmospheric there is relatively little work that focusses primarily at points of intersection between large scale urbanization and the coast The book responds to this gap by providing the first global synthesis of megacity and large urban region urbanization on the coast Its focus is on environmental and development challenges climate change and disaster It is interdisciplinary and brings together world recognised scientists including many IPCC lead authors on urban climate and atmosphere disaster risk management demography and coastal environments

Coasts and Estuaries Eric Wolanski, John W. Day, Michael Elliott, Ramachandran Ramesh, 2019-01-24 Coasts and Estuaries The Future provides valuable information on how we can protect and maintain natural ecological structures while also allowing estuaries to deliver services that produce societal goods and benefits These issues are addressed through chapters detailing case studies from estuaries and coastal waters worldwide presenting a full range of natural variability and human pressures Following this a series of chapters written by scientific leaders worldwide synthesizes the problems and offers solutions for specific issues graded within the framework of the socio economic environmental mosaic These include fisheries climate change coastal megacities evolving human nature interactions remediation measures and integrated coastal management The problems faced by half of the world living near coasts are truly a worldwide challenge as well as an opportunity for scientists to study commonalities and differences and provide solutions This book is centered around the proposed DAPSI W R M framework where drivers of basic human needs requires activities that each produce pressures The pressures are mechanisms of state change on the natural system and Impacts on societal welfare including well being These problems then require responses which are the solutions relating to governance socio economic and cultural measures Scharin et al 2016 Covers estuaries and coastal seas worldwide

integrating their commonality differences and solutions for sustainability Includes global case studies from leading worldwide contributors with accompanying boxes highlighting a synopsis about a particular estuary and coastal sea making all information easy to find Presents full color images to aid the reader in a better understanding of details of each case study Provides a multi disciplinary approach linking biology physics climate and social sciences Non-standard Spatial Statistics and Spatial Econometrics Daniel A. Griffith, Jean H. Paul Paelinck, 2011-01-11 Despite spatial statistics and spatial econometrics both being recent sprouts of the general tree spatial analysis with measurement some may remember the debate after WWII about theory without measurement versus measurement without theory several general themes have emerged in the pertaining literature But exploring selected other fields of possible interest is tantalizing and this is what the authors intend to report here hoping that they will suscite interest in the methodologies exposed and possible further applications of these methodologies The authors hope that reactions about their publication will ensue and they would be grateful to reader s motivated by some of the research efforts exposed hereafter letting them know about these experiences

talentueuses de Rousseau Spengler Thoreau ont contribué à propager. Alors que la majorité de la population habite désormais dans les villes, les projections sur un avenir urbain radieux demeurent l'exception. Le catastrophisme semble particulièrement de rigueur dans les médias pour les villes des pays en développement. Lagos a aujourd'hui pris la place du Londres de Dickens comme incarnation du destin funeste promis aux trop grandes concentrations humaines. Pourtant, rares sont les recherches consacrées à l'urbaphobie, et encore plus rares sont celles qui ont tenté d'aller au fond des origines des contenus et de la portée de la pensée urbaphobe. Cet ouvrage tente ainsi un exercice original et important à travers des textes qui dévoilent l'ampleur de la pensée et des effets de l'urbaphobie dans différents contextes nationaux. Il offre au lecteur une somme de réflexions dont l'ambition est de convaincre des enjeux scientifiques, économiques et sociaux de ce phénomène, encore peu considéré dans la réflexion et la pratique urbaine.

La communication touristique Collectif, 2018-07-10T00:00:00-04:00 La communication touristique est plus qu'une information sur les attraits du territoire et sur ses activités. Cette communication informe le territoire et contribue à lui donner une forme. On découvre ainsi une autre dimension du tourisme.

Mobilités et temporalités Bertrand Montulet, Michel Hubert, 2006 La question des relations entre mobilités et temporalités conjugue deux préoccupations contemporaines qui semblent s'alimenter l'une l'autre. D'une part, la question des mobilités et particulièrement des congestions liées aux mobilités est inscrite à l'agenda politique depuis plus de vingt ans. D'autre part, la question du temps du discours sur son accélération, celui sur son individualisation semble merger timidement depuis le début de ce siècle dans la sphère politique. La question des relations entre mobilités et temporalités apparaît d'une extrême complexité car elle suppose pour l'éclaircir d'interroger tout aussi bien la transformation des temps sociaux, les effets des dynamiques temporelles sur les structures socio-spatiales, l'organisation des modes de transports ou encore les attitudes temporelles propres à l'usage des divers modes de transport. Cet ouvrage reprend dix contributions issues du colloque Mobilités et temporalités organisé aux Facultés universitaires Saint Louis Bruxelles en mars 2004. Cette réunion s'inscrivait dans le cadre des travaux du groupe de travail Mobilités spatiales et fluidités sociales de l'Association internationale des sociologues de langue française AISLF.

La politique des modèles en Afrique Dominique Darbon, 2009 La thématique des modèles et transferts traverse de larges domaines des sciences sociales et humaines. Dans cet ouvrage, il s'agit en effet d'interroger, dans une perspective de croisement disciplinaire, ce que signifient ces notions transferts et modèles dans les pratiques sociales contemporaines qui se déroulent dans et avec les Afriques. En sciences politiques et administratives, ces thèmes ont d'abord trouvé leur place dans les travaux consacrés aux pays en développement. On s'y interrogeait sur la manière d'accélérer les processus de modernisation, mais aussi sur les difficultés d'appropriation de ces innovations importées par d'autres sociétés et confrontées à d'autres trajectoires sociales. La révolution néolibérale de la fin des années 1970 a été marquée par la multiplication des mouvements d'export-import des modèles de gestion sociale, politique et économique portés par les grands organismes

internationaux dans le sillage de la Banque mondiale et de l'OCDE. Ce mouvement a été amplifié ensuite par la libération des anciennes républiques populaires d'Europe de l'Est et par l'émergence des nouvelles puissances asiatique et latino-américaine en partie fondée sur les transferts et l'appropriation des modèles de régulation. La littérature consacrée aux pays du Nord ou l'impact de l'aide internationale sur les États et sociétés bénéficiaires a remis aujourd'hui au centre de ses interrogations les transferts de modèles qui accompagnent systématiquement ces mutations soit pour analyser les phénomènes de globalisation et d'harmonisation soit pour tenter d'en interpréter les significations sociales et de les valuer. On ne peut cependant que regretter le peu d'empressement que les spécialistes des sciences sociales travaillant sur des terrains particuliers ici le Nord manifestent pour lire des recherches menées dans les pays du Sud.
