Human Rights and Conflict Resolution Claudia Fuentes Julio, Paula Drumond, 2017-11-22 Human rights and conflict resolution have been traditionally perceived as two separate fields sometimes in competition or in tension and occasionally with contradictory approaches towards achieving a lasting peace Although human rights norms have been incorporated and institutionalized by various national regional and international organizations that deal with conflict resolution negotiators and mediators are often pressured in practice to overlook international human rights principles in favor of compliance and more immediate outcomes The chapters in this volume navigate the relationship between human rights and conflict resolution by fleshing out practical conceptual and institutional encounters of the two agendas and engaging with lessons learned and windows of opportunities for mutual learning Recognizing the increasing relevance of this debate and important gaps in the current research on the topic this book addresses the following questions How can we improve our practical and theoretical understanding of the complementarity between human rights and conflict resolution How would a human rights based approach to conflict resolution look like How are international regional and national organizations promoting implementing and or adapting to better coordinate between human rights and conflict resolution Building on empirical evidence from contemporary conflict resolution processes how have human rights been integrated in different efforts on the ground What are the main lessons learned in this regard Examining a wide range of countries and issues this work is essential reading for human rights conflict resolution and security experts including scholars diplomats policy makers civil society representatives and students of international politics

Music and Solidarity Felicity Laurence, 2017-07-12 The philosopher Christopher Small suggests that musical meanings are concerned with relationships both with other human beings and with the world and that music

functions as a means of exploration affirmation and celebration of those relationships If members of different social groups have different values or different concepts of ideal relationships then the kinds of performances that enact those relationships will differ from one another Using music to express benevolent intentions is not in general one of its most obvious functions In fact military music has been used throughout history to destroy cross cultural communion Music is also a powerful and ubiquitous tool in propaganda and in facilitating various political projects in all kinds of inventive ways that have nothing much to do with the pursuit of peaceful and cooperative intercultural understanding or with helping people address issues of injustice This text moves far beyond the knowledge of music s power upon humans however this may be conceived and explained It addresses a field of inquiry that is still a tiny endeavor at least in comparison with all other academic efforts in the world The sparseness of serious theoretical engagement with the topic of music s potential role in the area of peace and policy is echoed by how little music is directly used in the real world for building a more humane consciousness Finding ways to that goal is the purpose of this work *Theatre for Development* C. P. Epskamp,2006-10 The Theatre for Development TFD is a learning strategy in which theatre is used to encourage communities to express their own concerns and think about the causes of their problems and possible solutions This overview contributes to both the theory and practice of Theatre for Development The author contextualises it historically within the evolving range of development theories strategies and practices notably including the now widely accepted notion of participatory approaches to achieving social change *Transforming conflict through social and economic development* Sandra Buchanan,2016-05-16 Transforming conflict through social and economic development examines lessons learned from the Northern Ireland and Border Counties conflict transformation process through social and economic development and their consequent impacts and implications for practice and policymaking with a range of functional recommendations produced for other regions emerging from and seeking to transform violent conflict It provides for the first time a comprehensive assessment of the region s transformation activity largely amongst grassroots actors enabled by a number of specific funding programmes namely the International Fund for Ireland Peace I II and III and INTERREG I II and IIIA These programmes have been responsible for a huge increase in grassroots practice which to date has attracted virtually no academic analysis this book seeks to fill this gap In focusing on the politics of the socioeconomic activities that underpinned the elite negotiations of the peace process key theoretical transformation concepts are firstly explored followed by an examination of the social and economic context of Northern Ireland and the border counties The three programmes and their impacts are then assessed before considering what policy lessons can be learned and what recommendations can be made for practice This is underpinned by a range of semi structured interviews and the author s own experience as a project promoter through these programmes in the border counties for more than a decade The book will be essential reading for students practitioners and policymakers in the fields of peace and conflict studies conflict transformation peacebuilding post agreement reconstruction and the political economy
